Basic knowledge	Discipline knowledge	Experiments and practice	Tools Usage	Profession and society	Environment and sustainable	Ethics	Individual and team work	Communication	Life-long learning	Employ technical comprehension in varied areas of Computer Applications to help attain skills to pursue thriving career and higher studies.	Comprehend, explore and build up computer programs in the allied areas like Algorithms, System Software, Web Design and Data Analytics.	Able to use latest trends in technology/development and thereby build innovative new ideas and solutions to varied problems.
