SCIENTIFIC MOTIVATION

- Understanding the character of neutron-rich nuclear matter is a key to understanding the neutron star mergers and nucleosynthetic r-process.
- The accurate knowledge of neutron star composition play a vital role in the prediction of masses of neutron star (NS) neutron star (NS) mergers.
- Fusion of neutron rich nuclei play role in origin of X-ray super-burst.

Recent investigation related to the fusion of neutron rich carbon isotopes at above barrier energies suggests their rate of increase of experimental fusion cross sections with neutron number is much higher than predicted by theoretical models such as RMF-SE model and Time Dependent Hartree-Fock model (TDHF).

This is to obtain the importance of studying fusion of neutron rich nuclei at below and above barrier energies.
