Improve placement cell

Na

No

The curriculum has been instrumental in providing a strong foundation of technical knowledge and practical skills. However, incorporating more hands-on training, industry-based case studies, and exposure to emerging technologies like AI, IoT, and blockchain could enhance its relevance to current industry demands. Improved collaboration with top industry leaders for internships and placements would also be beneficial. The availability of more online resources and interactive sessions could further support the learning experience. Overall, the efforts towards continuous improvement are commendable.

Changing with time

Had a great experience at Mohali Campus 1, spending four golden years filled with learning and creating cherished memories.

Please take a look on pass-out students who didn't get placed.
