# Study Scheme & Syllabus of Master of Science in Clinical Research (M.Sc. Clinical Research)

# **Batch 2019 Onward**

By

Board of Study Clinical Research Main Campus IK Gujral Punjab Technical University

# IK Gujral Punjab Technical University

#### Vision

To be an institution of excellence in the domain of higher technical education that serves as the fountainhead for nurturing the future leaders of technology and techno-innovation responsible for the techno-economics, social, cultural and environmental prosperity of the people of the State of Punjab, the Nation and the World

#### Mission

To provide seamless education through the pioneering use of technology, in partnership with industry and society with a view to promote research, discovery and entrepreneurship and to prepare its students to be responsible citizens of the world and the leaders of technology and techno-innovation of the 21<sup>st</sup> Century by developing in them the desirable knowledge, skill and attitudes base for the world of work and by instilling in them a culture for seamlessness in all facets of life.

#### **Department of Food Science and Technology**

#### Vision

To create competent professionals those contribute towards the economic development of the nation by going in line with the policy of Government of India in the field of food processing, food safety, health and nutrition.

#### Mission

- Development of human resource in the field of food science and technology to serve the cause of nation
- Development of human resource in the area of clinical nutrition and research to contribute effectively in making India healthy
- Providing a strong theoretical and practical background across the food science discipline with an emphasis on developing sustainable resources to cater food and nutrition related challenges
- Create favourable environment for innovation to translate theoretical knowledge into practical applications
- Inculcating professional ethical values, innovative research capabilities and leadership abilities
- Holistic development of the youth through the process of self evaluation and continuous improvement

# **MSc.** Clinical Research

# **Programme Educational Objectives**

PEO1	To accomplish the demand for well qualified clinical researchers in academia and industry
PEO2	To pursue successful industrial, academic and research careers in specialized fields of clinical research and drug safety
PEO3	Solve problems through application of critical thinking and evidence-based processes
PEO4	To sensitize students about the importance of ethical practices in clinical research and practice
PEO5	Pursue self-learning to remain abreast with latest developments for continuous professional growth

# **Programme Outcomes**

PO1	Ability to participate and contribute effectively as clinical research team member
PO2	Understand the roles and responsibilities of the different stakeholders in clinical research
PO3	Compare and summarize international regulations, clinical requirements and best practices for the clinical research process
PO4	Integrate knowledge from foundational sciences and pharmaceutical sciences for effective planning and implementation of study protocols
PO5	Apply knowledge of disease pathophysiology and current therapy in designing clinical trial protocols and analyzing data
PO6	Evaluate the suitability, accuracy, and reliability of clinical study data by analyzing experimental design, statistical tests, interpreting results, and formulating conclusions
PO7	Ability to review existing evidence in literature
PO8	Describe Good Clinical Practices in different aspects of the clinical studies
PO9	Communicate professionally both orally and in writing within the clinical research environment

2: Moderately

3: Substantially

Duration of course	Two Academic Years		
Maximum duration for course	4 Years		
completion & award of			
degree			
Eligibility	Graduation with minimum 50% marks in Life		
	Sciences/Sciences/Medical Sciences/Pharmacy		
Attendance Requirement	75%		
Examination System	Semester		
Marks Allocation	• Theory courses of 04 credits = 100 marks		
	• Theory courses of 02 credits = 50marks		
	• Practical courses of 02 credits = 50 marks		
Minimum Credits for Award	• 90		
of Degree			
Programme Structure	1. Compulsory Foundation Course		
	2. Core Courses		
	3. Elective Courses		
	3.1.Discipline Specific Elective Courses		
	3.2.Generic Elective Courses		
	4. Ability Enhancement Courses		
	5. Skill Enhancement Courses		

# **Programme Structure**

- 1. **Compulsory Foundation Course:** This course is a foundation course designed with the object to enhance the knowledge base of students.
- 2. **Core Courses:** These courses are compulsory courses studied by students as core requirement of the programme. These courses aim to impart students the basics of the MSc. Clinical Research programme.
- 3. **Discipline Specific Elective (DSE) Courses:** Discipline specific elective courses comprise a pool of courses offered under the main discipline/subject of study. Students will choose DSE courses from a pool of courses provided to them.
- 4. Generic Elective (GE) Courses: Generic elective comprise a pool of courses designed with a purpose to offer the students the opportunity to explore disciplines of interest beyond the choices they make in core and discipline specific elective courses. Students will choose GE courses from a pool of courses provided to them.
- 5. Ability Enhancement Courses: These courses are designed with the aim to improve the knowledge base and skills of the students to facilitate employability.
- 6. **Skill Enhancement Courses:** These courses are designed with the aim to improve the knowledge base and skills of the students to facilitate employability.

# **Internal Assessment**

- The internal assessment will have two components i.e., Continuous Mode and Sessional Exams
- 1. For Theory Courses having Internal of 30 Marks the scheme of internal award is:
  - Sessional Exams: 20 Marks
  - Continuous Mode: 10 Marks

#### Sessional Exams

- The number of sessional exams and criteria for computation i.e. average marks or best of sessional exams conducted shall be according to guidelines provided by Academic Council IKG-PTU from time to time.
- Sessional exam shall be conducted for 30 marks for theory and shall be computed for 20marks.

#### **Continuous Mode Scheme**

Criteria	Maximum Marks
*Attendance (as per table given below)	4
Academic activities (Average of any 3 activities e.g.,	6
quiz, assignment, open book test, field work, group	
discussion and seminar)	
Total	10

- 2. For Theory Courses having Internal of 15 Marks the scheme of internal award is:
  - Sessional Exams: 10 Marks
  - Continuous Mode: 05 Marks

#### Sessional Exams

- The number of sessional exams and criteria for computation i.e., average marks or best of sessional exams conducted shall be according to guidelines provided by Academic Council IKG-PTU from time to time.
- Sessional exam shall be conducted for 20 marks for theory and shall be computed for 10marks.

#### **Continuous Mode Scheme**

Criteria	Maximum Marks
*Attendance (as per table given below)	2
Academic activities (Average of any 3 activities e.g.,	3
quiz, assignment, open book test, field work, group	
discussion and seminar)	
Total	5

# **Evaluation Scheme of Laboratory Courses**

Internal (30 Marks)		Continuous and Comprehensive Evaluation (class performance/practical record/viva etc.) = 26
		*Attendance (as per table given below) = 04
		Synopsis = 05
External (20 Marks)		Performance = 10
		Viva = 05
	Tatal	50 Marks
	Total	50 Marks

# \*Guidelines for the Allotment of Marks for Attendance

Percentage of Attendance	Theory	Theory	Practical
e	(Attendance	(Attendance	(Attendance
	Maximum Marks	Maximum	Maximum
	04)	Marks 02)	Marks 04)
More Than 93	4	2	4
87 - 92	3	1.5	3
81-86	2	1	2
75 - 80	1	0.5	1
Less than 75	0	0	0

#### **Evaluation Scheme Journal Club**

Paper Selection and Content Delivery	10
Power Point Presentation	05
Post Presentation Discussion	10
Total	25

Note: Student will present minimum two papers in each semester

Objective Type Questions (5x2) (Answer all the questions)	5x2=10
Short Answers (Answer 2out of 3)	2x5 =10
Long Answers (Answer 1 out of 2)	1x10=10
Total	30 Marks

# **Question Paper Pattern for Theory Sessional Examinations of 30 Marks**

# **Question Paper Pattern for Theory Sessional Examinations of 20 Marks**

Objective Type Questions(5x1) (Answer all the questions)	5x1=05
Short Answers(Answer 1out of 2)	1x5 = 05
Long Answers(Answer1out of 2)	1x10=10
Total	20 Marks

# **Question Paper Pattern for Theory External Exam of 70 Marks**

	Total	70 Marks
Long Answer (Answer 3 out of 4)		$3 \ge 10 = 30$
Short Answer (Answer 4 out of 5)		$4 \ge 5 = 20$
(Answer all the questions)		$10 \ge 2 = 20$
$(01^{+})^{+}$ T $(10^{-})^{+}$		10 2 20

# **Question Paper Pattern for Theory External Exam of 35 Marks**

(Answer all the questions) Short Answer (Answer 2 out of 3)	$2 \ge 5 = 10$
Long Answer (Answer 2 out of 3)	$2 \times 10 = 20$
Total	35 Marks

Co-curricular Activities (Attending Conference, Scientific Presentations and Other Activities)	04
Total Credit Points	$86 + 4^* = 90$

- \*Credits for Co-curricular Activities
- \*Credits not included towards calculation of CGPA
- The award of credits for co-curricular activities will have only internal component
- The student will earn the credits for co-curricular activities anytime during the duration of MSc.
- Head of Department will award the credits based upon the submission of relevant documents pertaining to criteria as below by student.

Name of the Activity	<b>Credit Points</b>
Successful completion of MOOCs Courses (4 weeks)	04
Successful completion of MOOCs Courses (2 weeks)	02
Hospital Training (minimum 4weeks)	02
Participation in Seminar/ Conference/ Symposium (related to the specialization of the student)	01
Participation in Workshop/ Training Programs of duration one week (05 days) or more (related to the specialization of the student)	02
Presentation in Seminar/ Conference/ Symposium / (related to the specialization of the student)	02
Presentation in Seminar/ Conference/ Symposium / (related to the specialization of the student) and with award	03
Research / Review Publication in indexed in Scopus / Web of Science*	03
Research / Review Publication in peer reviewed journals*	02
Minimum ten days residential camp organized by NSS/ Youth Affairs	02
Inter University participation in cultural or sports activity	02
Inter University award in cultural or sports activity	03
Inter College participation in cultural or sports activity	01
Inter College award in cultural or sports activity	02

# **Guidelines for Awarding Credits for Co-curricular Activities**

\*Only those research / review publications will be considered which have been published during the tenure of M. SC. Course.

# Module-I

Chemistry

Solution — Methods of expressing the concentration (molality, molarty, normality, formality etc)

Laws of mass action, reaction quotient, chemical equilibrium constant, relation of Kp & Kc, pH, buffer, buffer index, buffer capacity, arrhenius equation

Principles, classification and applications of chromatographic techniques

Basics of Spectroscopy and applications

#### Module-II

#### **Biochemistry and Cell Biology**

Biomolecules - carbohydrates, amino acids/proteins, lipids and nucleotides; enzymes: characteristics and nomenclature

Introductory cell biology & microbiology: prokaryotes & eukaryotes; the cell and its composition; cell organelles and subcellular fractionation; viruses, viroid's, virusoids and prions: bacterial culture and growth curve

Immunology – natural and acquired immunity; humoral and cellular immunity; vaccines and immunization; Clonal selection theory; Cells of immune system; immunoglobulins, haptens, antigens and immunogens; monoclonal & polyclonal antibodies

Clinical biochemistry: common biochemical tests; acid base disorders; liver function tests; kidney function tests

#### **Module-III**

#### **Environmental Sciences**

Biodiversity — concept, levels and conservation of biodiversity Climate change and its consequences Ecosystem - producers, consumers and decomposers of food chain

Environmental pollution, bioremediation

#### **Module-IV**

#### **Genetics and Biotechnology**

Genetics of inheritance - laws of inheritance, recombination and segregation of traits, segregation ratio, interaction between traits and quantitative inheritance

Molecular Biology - the genetic material, RNA as genetic material, fidelity of DNA replication, transcription, translation and transduction, mutation and mutagenesis, ames test Genetic Engineering - essentials of gene manipulation, vectors & enzymes used in recombinant technology

Biotechnology: stem cell, its application and ethical aspects

**Co- requisite:** Fundamentals of Clinical Research (UC-MSCR102-19) & General Pharmacology (UC-MSCR103-19)

**Course Objectives:** To give students hands on training for preparing standard operating procedures and clinical trial protocols. To acquaint students with different routes of drug exposure and pre-clinical non-invasive techniques in drug testing.

Course Outcomes: At the end of the course, the student will be able to													
CO1	Prepare s	tandard dr	ug solutio	ns of vario	us concentra	ations							
CO2	Perform of	common b	iochemica	l test of cli	nical signifi	cance							
CO3	Prepare clinical trial protocol												
CO4	Perform validation and prepare standard operating procedures of laboratory equipments												
CO5	Understand the different routes of drug administration and pre-clinical non-invasive techniques for drug testing												
	Ν	Mapping o	of course of	outcomes	with the pro	ogramme	outcomes						
	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9				
CO1	3	1	2	2	1	1	3	3	1				
CO2	1	3	2	2	2	1	3	3	1				
CO3	3	3	3	3	3	3	3	3	3				
CO4	1 2 3 1 1 3 3 2												
CO5	1	2	1	3	3	1	3	3	1				

- 1. To prepare molar, molal and normal solutions
- 2. To prepare buffer solutions and determination of their pH
- 3. Validation of machines and analytical instruments
- 4. Extraction of DNA
- 5. Biochemical test: renal function test

- 6. Biochemical test: lipid profile
- 7. Preparation of manuals as per GLP for biochemical tests
- 8. Demonstration of routes of exposure/administration of drugs
- 9. Demonstration of some non invasive techniques in preclinical screening of drug
- 10. Bioethics- do's and don'ts, confidentiality, cultural/social ethics
- 11. Preparation of SOPs for various equipments

#### Module-I Reading

Long texts where the subject matter ranges from the descriptive and factual to the discursive and analytical (the texts taken should be from books, journals, magazines and newspapers). Reading extracts from books, magazines, newspapers, notices, advertisements, company handbooks and guidelines encounter on a daily basis in an English-speaking environment.

#### Module-II Writing

Topics of general interest and suitable for candidates planning to work in Clinical Research Organisations

Describe, summarise or explain the information in own words based on a graph, table, chart or diagram. The writing would be based on the description and explanation of the given data, describe the stages of a process, flowchart of how something works or describe an object or event in a formal and academic style.

Essay writing in response to a point of view, argument or problem in a formal and academic style. Arguments should be supported by relevant examples.

Letter writing: requesting information or explaining a given situation.

# Module-I

#### **Smooth Muscles**

Morphology, electrical and mechanical activity, molecular basis of contraction, relation of length to tension and plasticity.

#### **Gastrointestinal System**

Gross anatomy of the gastro-intestinal tract, functions of its different parts including those of liver, pancreas and gall bladder, various gastrointestinal secretions and their role in the absorption and digestion of food

02 Hrs

#### Haemopoietic System

**Cardiovascular System** 

Composition and functions of blood and its elements, their disorders, blood groups and their significance, mechanism of coagulation, disorders of platelets and coagulation.

#### **Module-II**

#### 05 Hrs

06 Hrs

Morphology, electrical properties of cardiac muscle, pacemaker tissue, basic anatomy of the heart, physiology of heart, blood vessels and circulation, cardiac cycle, heart sounds, cardiac cycle, blood pressure and its regulation Central Nervous System 05 Hrs

Basic anatomy and physiology of brain, spinal cord **Endocrine System** 

Basic anatomy and physiology of pituitary, thyroid, parathyroid, adrenals, pancreas, testes and ovary, their hormones and functions

Instructions

- 1. Students are to work with assigned mentor to chose and analyze an appropriate article followed by a power point presentation.
- 2. Power-point presentations should be organized as follows: 10 minutes background, 10 minutes article 15 minutes analysis 5 minutes discussion
- 3. Students are encouraged to critically appraise the literature, and develop their own independent criticisms

UC- MSCR 203-19	Clinical Research Lab II	-	-	4	30	20	1.5	3	4

**Pre-requisite:** Fundamentals of Clinical Research (UC-MSCR102-19)

**Co- requisite:** Clinical Research Regulations (UC-MSCR 202-19) and Medical Writing (UC-MSCR 205-19)

**Course Objectives:** The course is designed to impart practical knowledge to students about the various aspects of clinical research in accordance to GCP, GLP and clinical trial regulations

<b>Course Outcomes:</b> At the end of the course, the student will be able to													
CO1 Understand the practical application of clinical trial regulations for conduct of clinical trials													
CO2	Trained complian	about the ce with G	sample LP	collection	and anal	ysis and	interpretatio	on of lab	data in				
CO3	Develop	SOPs and	various do	ocuments re	equired for	conduct c	of quality cli	nical studi	es				
CO4	Apply GCP in collection of clinical data												
CO5	CO5 Appreciate the significance of statistical analysis in clinical research												
Mapping of course outcomes with the programme outcomes													
	Mapping of course outcomes with the programme outcomesPO1PO2PO3PO4PO5PO6PO7PO8PO9

CO4	2	2	2	3	3	3	2	3	1				
CO5	3	1	1	3	2	2	3	2	2				

- 1. Measurement of pulse rate and body temperature
- 2. Effect of exercise on blood pressure
- 3. Biochemical tests: protein estimation by Lowry's method
- 4. Biochemical tests: liver function test
- 5. Biochemical tests: blood glucose

- Demography: assessment of age, sex, height, weight, waist, BMI, smoking, educational attainment, area-based measure (eg. index of deprivation or disadvantage, rurality distance from health centres etc)
- 7. Application of simple statistical test to the results obtained in above experiments
- 8. Haematology tests: haemoglobin, total leukocyte count, differential leukocyte count, erythrocyte sedimentation rate
- 9. Interpreting Electrocardiography (ECG)
- 10. Case studies solutions
- 11. Summary of Product Characteristics (SmPC) development

# Module-I Listening English

A conversation between two people set in an everyday social context, e.g. a conversation in an accommodation agency

A monologue set in an everyday social context, e.g. a speech about local facilities A conversation between up to four people set in an educational or training context, e.g. a tutor and a student discussing an assignment

A monologue on an academic subject, e.g. a classroom lecture

# **Module-II**

# **Speaking English**

Candidates will be asked to answer general questions about themselves and a range of familiar topics, such as their home, family, work, studies and interests. This activity lasts between 4 and 5 minutes

Candidates will be given a minute to prepare their thoughts on an assigned topic, before being invited to speak for up to two minutes. The examiner will then ask one or two questions on the same topic to finish this part of the test

Candidates will be asked further questions connected to the topic in Part 2. These questions will provide an opportunity to discuss more abstract issues and ideas. This part lasts between four and five minutes

### Suggested Books/ Manuals

#### **Module-I**

Measures of disease occurrence and disease association

Mortality indicators and morbidity indicators

The different mechanisms of bias in clinical research (study, response, information, interviewer, site selection, measurement, and confounding); and a conceptual approach to multivariable analysis

Instruction in the research implications of evidence-based clinical medicine, including the specifications of diagnostic tests, screening tests, and prognostic tests Pharmacoepidemiological studies

Calculation of relative risk and odds ratio

#### **Module-II**

13 Hrs

Introduction to the concepts, principles, and use of molecular and genetic methods in epidemiology and clinical research

Human Genome Project

Framework for interpreting, assessing, and incorporating molecular and genetic measures in research

Meaning of race, ethnicity, social class, and culture, their effects on the conduct and interpretation of clinical research

Pharmacogenomics and its application in clinical research, genome-wide association study (GWAS)

# Module-I

12 Hrs

Types of data and its analysis (categorical vs quantitative)

Organization of data, distribution of data and calculation of central tendencies

Confidence interval, SD, SE, regression and correlation

Comparison of data between different groups: using null hypothesis and test of significance (paired t-test, unpaired t-test, Analysis of variance (ANOVA), Analysis of covariance (ANCOVA)

# Module-II

Comparison of data between different groups: Coefficient of Variation, chi-square test, Fischer exact, Mann-Whitney, Wilcoxon, McNemar test, Kruskal Wallis

Intention-to-treat (ITT) and Per-protocol (PP) and Treatment-received (TR) analyses of results in clinical research, sample size calculation

Introduction to common statistical software packages used in clinical research (e.g. SAS, SPSS)

#### Module-I

12 Hrs

Selection of clinical trial sites, clinical investigators and making budget and vendor selection

The roles and responsibilities of the following in CT: sponsor, institution, clinical trial coordinator, clinical investigator

Documents required at site, site initiation and conduct activities, protocol, CRF, ICD, investigator brochure, clinical trial agreement, ethics committee and regulatory approval,

site-initiation visits

Recruitment, IP/IMP/pharmacy file receipt and storage, clinical trial site master file, databases, SOPs

Roles and responsibilities of monitors and auditors/inspectors, monitoring visits, audits and inspections, independent data monitoring activities

# **Module-II**

Contingency planning to prepare for unexpected situations Site close-out activities, suspending and premature termination of a trial Handling missing data, query and resolution, database lock Site close-out report, clinical study report, submission to ethics committee and regulatory agency, publication of results

Instructions

- 1. Students are to work with assigned mentor to chose and analyze an appropriate article followed by a power point presentation.
- Power-point presentations should be organized as follows: 10 minutes background, 10 minutes article 15 minutes analysis 5 minutes discussion

- 3. Students are encouraged to critically appraise the literature, and develop their own independent criticisms
- 4. Minimum two presentations in a semester by each student
