Bachelor of Architecture (B. Arch. 1st Semester) 2021

Course Code	Course Name	L-1, ST-4	Int. : Ext.	Duration of E	am
BARCH101-21	Architectural Design & Theory – 1	Credits - 05	60:40	06 Hours	

Course Objective:

The main objective of the course is to get the students interested in and to familiarize them with the basic concepts of Design. To enhance and promote visualization, expressional skills and sensitivity to surrounding environment and to develop the ability to translate principle of design into architecture solution.

Course Outcomes:

At the end of the course, the students will able to-

- Understand & will gain a fundamental knowledge of architecture design and its basic principles.
- To apply visual and formal analysis of architecture in their mind and they will be able to appreciate well-designed buildings.
- Understand the skill required to interpret a work of architecture and to evaluate, identify and analyse artistic expression of architectural forms.
- Understand the relationship between human activities of Space.

Detailed Syllabus:

UNIT-I (Theory)

- Introduction to Basic Design
- Objectives of Design
- Elements of Design
- Principles of Design
- Scale and proportion in Architecture.
- Anthropometrics (including norms for physically challenged persons)
- Human functions and their interactions for space requirements.
- Minimum and optimum areas for various human activities & functions.

UNIT-II (Design Exercise & Application)

- 2D compositions with basic geometric shapes, colour, texture and pattern.
- Experience in 3D Design, compositions with simple forms like cube, cuboids, cylinder, cone, prism etc.
- Compositions with 3-D Solids.
 Note Stress is given to 2D, 3D exercise (Black & white and colours.)
- Functional furniture layout, circulation as anthropometric/Activity pattern

UNIT-III

Gazebo/ rain shelter/ Milk booth/Florist kiosk/ park layout etc...

Evaluation Criteria for Exam / Question Paper Setting:

Bachelors of Architecture (1st Year)

The examiner will set five questions from Unit- I and two from Unit-III & students are required to attempt any three question from Unit-I and only one from Unit-III during the six hour examination. No question to be set from Unit- II

Important Note:

The evaluation is to be done through Viva - voce conducted at the institute level by Internal / External jury members appointed in consultation with the university from the appointed panel list of examiners. The answer sheet shall be retained at the institute after the exam for the viva voce.

Instructions for the Faculty:

Design faculty should encourage and motivate the students for live projects of their immediate surrounding. (Identifying need, Framing requirements and solution for the same and it should be marked as an assignment.)

The stress should be given on making students grasp the concept and do the design assignment as a creative fun activity.

Core References:

The assigned Faculty is required to provide updated references/E-resources related to the content of the subject by ensuring the availability of the same in the department library, on web portals/online i.e. E-learning. The Faculty is also advised to keep on updating the reference list and submit the latest one in the Library & Academic department of the Campus.

Bachelor of Architecture (B. Arch. 1st Semester) 2021

Course Code	Course Name	L - 1, ST - 3	Int. : Ext.	Duration of E	am
BARCH102-21	Architectural Drawing –I	Credits - 04	60:40	03 Hours	

Course Objective:

The objective is to make the students familiarize with good drafting and lettering techniques use in architecture. To gain the basic knowledge for preparing the architectural drawings by learning about the orthographic projections of simple geometric forms and representation of 3-D & 2-D forms.

Course Outcomes:

At the end of the course, the students will able to -

- Gain the comprehensive understanding of the fundamental techniques of technical drawing and its architectural representation.
- Attain the knowledge to visualize the geometrical forms through plans, elevations and sections.

Detailed Syllabus:

UNIT- I

- Drafting Technique & its Principles
- Line Types of Lines and Dimensioning of line
- Lettering free hand & block lettering
- Scales Different types of scale and its uses in the Architectural Drawing.

UNIT- II

 Orthographic Projections - Point, Lines, Plane and Solid in various positions in the First Quadrant.

UNIT- III

• Section of Solids- Cube, Cuboids, Cone, Cylinder, Pyramid, Prism etc.

UNIT- IV

- Development of Surfaces Simple Geometrical Solids (Cube, Cuboids, Cone, Cylinder, Pyramid, Prismatic)
- Interpenetration of Solids

Instructions for the Faculty:

Emphasis should be laid on learning by doing and students have to be encouraged to make proper models to understand the geometry of forms.

Evaluation Criteria for Exam / Question Paper Setting:

Total eight questions are to be set (two questions from each unit) and the students are required to attempt total four questions (one from each unit).

Core References:

The assigned Faculty is required to provide updated references/E-resources related to the content of the subject by ensuring the availability of the same In the department library, on web portals/online i.e. E-learning. The Faculty is also advised to keep on updating the reference list and submit the latest one in the Library & Academic department of the Campus.

Bachelor of Architecture (B. Arch. 1st Semester)

Course Objective:

The objective is to make the students familiar with visual arts and its basic principles and to explore the potential of Pencil of different grades and Coloured pencils as a powerful tool of Graphic Communication.

Course Outcomes:

At the end of the course, the students will able to -

- Gain a fundamental knowledge of architecture Graphics and its principles.
- Achieved a comprehensive understanding of architectural presentation techniques.

Detailed Syllabus:

UNIT- I (Pencil as fundamental tool of drawing)

- Free hand line-work with different strokes/grades in pencil.
- Effect of light and shade on simple geometrical solids.
- Textures of different building materials (such as bricks, stones, grass, glass, timber etc.) in pencil through shading and surface finishes of wall and floor.
- B/W Composition by using different geometric forms with charcoal pencil.

UNIT- II (Pencil as presentation medium)

- Freehand (proportionate) sketching of human figures, different types of vegetation, different transport modes and buildings etc.
- Indoor and outdoor furniture/antique items & Staircase-shading/role with light
- Sketches of scenes and activities from memory involving public spaces, markets, festivals, recreational spaces etc.
- Live sketching indoor and outdoor area

UNIT-III (Rendering with coloured pencils/crayons/dry pastels)

- Colour rendering of human figures, different types of vegetation, different transport modes and buildings etc.
- Colour Rendering of various scenes such as Garden/Park Scene, Street Scene, Lake Scene, Village/Market Scene, etc.
- Live sketching indoor and outdoor area
- Role of light in rendering co-relation with different shapes of geometry and some building elements.

UNIT-IV (Art & Illusion)

- Different exercises involving Logo Design, Collage making etc.
- Mural and Sculpture design in different materials like POP, Clay, ceramic/Mosaic etc.

Instructions for the Faculty:

 Workshops related to above stated units should be organised, highlighting its technique and style which can be organised indoor or outdoor. The students must be encouraged to appreciate the natural/man-made landscape and to understand the interrelationship of nature and architecture. Emphasis should be on enhancing the observation skills & aesthetics sensibility of the students.

Evaluation Criteria for Exam / Question Paper Setting:

Total four questions are to be set from all the units and students are required to attempt all the questions.

Core References:

The assigned Faculty is required to provide updated references/E-resources related to the content of the subject by ensuring the availability of the same in the department library, on web portals/online i.e. E-learning. The Faculty is also advised to keep on updating the reference list and submit the latest one in the Library & Academic department of the Campus.

plas

Bachelor of Architecture (B. Arch. 1st Semester)

PARCH104 31	Warkshan I	Cradite 01	100.0	No even eals lateral dis uses
Course Code	Course Name	P - 2	Int. : Ext.	Duration of Exam

Course Objective:

The student will gain basic hands on experience and fundamental knowledge in carpentry, brick masonry and model making.

Course Outcomes:

At the end of the course, the students will able to -

- · Gain the basics knowledge of the carpentry tools and its joints.
- Attain skill to work with different materials for making architectural model.

Detailed Syllabus:

UNIT-I 2D/ 3D composition

- Exercise in 2-D compositions (formal, informal, abstract or modern etc.)
- Block making of 3-D geometrical blocks (by choosing different forms and different materials).
- Soap carving for creating three dimensional forms in space

UNIT-II Carpentry

 Carpentry – Introduction to the types, use of carpentry Tools and various joints in Carpentry.

UNIT-III Model Making

- Model Making—making of different types of trees and other landscape elements like street lamps, pathways, plantation, water-bodies and different types of automobiles.
- Preparation of wooden base for model making.

UNIT-IV Masonry Construction

• Brick/Stone Masonry – Low height wall construction by using either bricks or stones for the understanding of various bonds, jallies etc.

Instructions for the Faculty:

 The Faculty is required to give a complete demonstration of brick work, stone work, textured & timber work and other various exterior finishes through audio-visual aids or through site visits.

Evaluation Criteria for Exam / Question Paper Setting:

In the end of the semester internal jury Viva-voce to be conducted (the jury comprises of the subject incharge and the HOD nominee)

Core References:

The assigned Faculty is required to provide updated references/E-resources related to the content of the subject by ensuring the availability of the same In the department library, on

web portals/online i.e. E-learning. The Faculty is also advised to keep on updating the reference list and submit the latest one in the Library & Academic department of the Campus.

Prast

Bachelors of Architecture (1st Year)

Bachelor of Architecture (B. Arch. 1st Semester)

Course Code	Course Name	L-1, ST-3	Int. : Ext.	Duration of Exam
BARCH105-21	Building Construction & Materials -	Credits - 04	60:40	03 Hours

Course Objective:

• The objective is to introduce the elementary building materials and their applications. To familiarize students with construction details of various basic components of construction.

Course Outcomes:

At the end of the course, the students will able to -

- Understand the properties, types, uses and application of various building materials i.e. brick, lime, cement, mortar, sand, stones etc.
- Gain the fundamental knowledge of building Construction especially in brick and stone.

Detailed Syllabus (This subject consists of two Parts)

Part A: Building Materials

UNIT-I (Brick As A Construction Material)

- Brief introduction to mud, sand, clay, surkhi, aggregates, lime and cement etc.
- Different types of mortar like mud mortar, lime mortar, cement mortar etc.- their properties and uses
- Classification & types, uses, sizes and properties of bricks
- Cost-effective bricks, AAC blocks, Fly-ash bricks etc. their properties and uses in construction industry.

UNIT-II (Stone As A Construction Material)

- Classification & types, uses, sizes and properties of Stone available in India
- Stone dressing, and deterioration and preservation measures.
- Application properties and visual check for different types of stone.
- Properties and uses of artificial stone.

Part B: Building Construction

UNIT-III (Brick masonry)

- Introduction to various components of a building (sub-structure to super-structure), their structural and functional roles.
- Brick masonry –different types of bonds (English, Flemish, Rat trap, etc.) and junctions (L-junctions, T-Junctions, cross junction) of varying wall thickness (not more than 2 brick thick).
- Attached and detached brick Piers of varying thickness (net more than 3'-0")
- Brick jalli-design and construction details

achelors of Architecture (1st Year)

UNIT-IV (Stone masonry)

- Stone masonry of various types
- Lintels and sill level details
- Coping and threshold details.
- Arches-Flat, Segmental and Semi-circular

Instructions for the Faculty:

 The assigned Faculty is advised to undertake 2-3 site visits for better understanding of Brick/Stone bonds, Brick Jalli and different types of exterior finishes. Faculty is advised to read the preamble of the syllabus carefully.

Evaluation Criteria for Exam / Question Paper Setting:

Total eight questions are to be set two from each unit & students are required to attempt total four questions i.e. one from each unit. The distribution of marks for **Part A** (Unit I&II): **Part B** (Unit III&IV) is 12: 28 marks.

Core References:

The assigned Faculty is required to provide updated references/E-resources related to the content of the subject by ensuring the availability of the same In the department library, on web portals/online i.e. E-learning. The Faculty is also advised to keep on updating the reference list and submit the latest one in the Library & Academic department of the Campus.

Prachy

Bachelor of Architecture (B. Arch. 1st Semester)

Course Code	Course Name	L-2, T-1	Int. : Ext.	Duration of Exam
BARCH106-21	Theory of Structures - I	Credits - 03	40:60	03 Hours

Course Objective

Give introduction of basic principles governing structural systems. Make students understand basic properties of solids and sections, which influence their behaviour under the effect of various types of forces.

Course Outcomes:

At the end of the course, the students will able to -

- 1. Develop techniques for analysing forces in statically determinate structures.
- Apply basic knowledge of Maths and Physics to solve real life problems related to structures.
- 3. Describe Hooke's law relationships and perform calculations

Detailed Syllabus:

UNITI

- Various types of Gravitational and Lateral Loads (I.S. 875) such as Dead, Live, Wind, Earthquake etc.
- Type of Forces, Cause- Effect, Concurrent Forces, Coplanar Forces and Parallel Forces. Triangle Law of Forces, Parallelogram Law of Forces, Equilibrium of Forces, Concept of Resultant, Conditions of Equilibrium.
- Centre of Gravity, Definition, Centroid, Centre of Gravity of Plane Figures, Moment of Inertia; Radius of Gyration of simple cross-section of beams and columns, Theorem of Parallel and Perpendicular Areas.

UNIT II

Classification of Frames, Type of stresses and strains, Analysis of determinate trusses by Method of Joints, Design examples.

UNIT III

 Moment of Resistance, Theory of Bending, Bending Stresses, Sectional Modulus of Rectangular and Circular Sections, bending and shear stress distribution across a section.

UNIT IV

Types of Stresses & Strains, Hooke's law, Young Modulus, Shear Modulus, Bulk Modulus.

Instructions for the Faculty -

The student of architecture must be clear about the Basic structure design concepts.

Evaluation Criteria for Examination/ Question Paper Setting:

The examiner is required to set eight questions with minimum two from each unit. Students are required to attempt five questions with a minimum one from each unit.

Bachelors of Architecture (1st Year)

Core References:

The assigned Faculty is required to provide updated references/E-resources related to the content of the subject by ensuring the availability of the same in the department library, on web portals/online i.e. E-learning. The Faculty is also advised to keep on updating the reference list and submit the latest one in the Library & Academic department of the Campus.

pas

Bachelors of Architecture (1st Year)

Bachelor of Architecture (B. Arch. 1st Semester)

Course Code	Course Name	2 - L	Int. : Ext.	Duration of Exam
BTHU101-18	Communicative English	Credit - 2	40:60	03 Hours

Course Objective:

The student will gain basic hands on experience and fundamental knowledge English and become the independent users of English Language.

Course Outcomes:

At the end of the course, the students will able to -

- Have proficiency in reading & listening, comprehension, writing and speaking skills.
- Understand spoken and written English language, particularly the language of their chosen technical field.
- Converse fluently.
- Produce clear and coherent texts on their own.

Detailed Syllabus:

UNIT-I Vocabulary Building & Basic Writing Skills

- The concept of Word Formation
- Root words from foreign languages and their use in English
- Acquaintance with prefixes and suffixes from foreign languages in English to
- form derivatives.
- Synonyms, antonyms, and standard abbreviations.
- Sentence Structures
- Use of phrases and clauses in sentences
- Importance of proper punctuation
- Creating coherence
- Organizing principles of paragraphs in documents
- Techniques for writing precisely

UNIT-II Identifying Common Errors in Writing

- Subject-verb agreement
- Noun-pronoun agreement
- Misplaced modifiers
- Articles
- Prepositions
- Redundancies
- Clichés

UNIT-III Mechanics of Writing

- Writing introduction and conclusion
- Describing
- Defining

- Classifying
- Providing examples or evidence

UNIT-IV

Writing Practices

- Comprehension
- Précis Writing
- Essay Writing
- Business Writing-Business letters, Business Emails, Report Writing, Resume/CV, Architectural Report Writing

Evaluation Criteria for Exam Question Paper Setting:

One objective type compulsory question to be set covering the entire syllabus in addition to eight others (two from each unit). The students are requiring attempting total 05 questions i.e. compulsory question and one from other from each unit.

Core References:

The assigned Faculty is required to provide updated references/E-resources related to the content of the subject by ensuring the availability of the same In the department library, on web portals/online i.e. E-learning. The Faculty is also advised to keep on updating the reference list and submit the latest one in the Library & Academic department of the Campus.

A mining (

Bachelor of Architecture (B. Arch. 1st Semester)

Course Code	Course Name	P-2	Int : Ext	Duration of Exam
BTHU102-18	Communicative Skill Laboratory	Credit - 1	100:0	No exam only
				Internal viva-voce

Course Objective:

The objective of the course is to help the students become the independent users of English language.

Course Outcomes:

At the end of the course, the students will able to -

- Students will acquire basic proficiency in listening and speaking skills.
- Students will be able to understand spoken English language, particularly the language of their chosen technical field.
- They will be able to converse fluently
- They will be able to produce on their own clear and coherent texts.

Detailed Syllabus:

Interactive practice sessions in Language Lab on Oral Communication:

- Listening Comprehension
- Self-Introduction, Group Discussion and Role Play
- Common Everyday Situations: Conversations and Dialogues
- Communication at Workplace
- Interviews
- Formal Presentations

Instructions for the Faculty:

• The available software/ language lab must be put to use by the students.

Evaluation Criteria for Exam / Question Paper Setting:

In the end of the semester internal jury Viva-voce to be conducted (the jury comprises of the subject incharge and the HOD nominee)

Core References:

The assigned Faculty is required to provide updated references/E-resources related to the content of the subject by ensuring the availability of the same In the department library, on web portals/online i.e. E-learning. Bachelors of Architecture (1st Year)

Bachelor of Architecture (B. Arch. 1st Semester)

Course Code	Course Name	L-2	Int : Ext	Duration of Exam
HSMC122-18	Human Values and Professional Etl	hics Credits -	2 40:60	03 Hours

Course Outcomes:

To help the students to discriminate between valuable and superficial in the life. To help develop the critical ability to distinguish between essence and form, or between what is of value and what is superficial, in life - this ability is to be developed not for a narrow area or field of study, but for everyday situations in life, covering the widest possible canvas. To help students develop sensitivity and awareness; leading to commitment and courage to act on their own belief. It is not sufficient to develop the discrimination ability, it is important to act on such discrimination in a given situation. Knowingly or unknowingly, our education system has focused on the skill aspects (learning and doing) - it concentrates on providing to its students the skills to do things. In other words, it concentrates on providing "How to do" things. The aspects of understanding "What to do" or "Why something should be done" is assumed. No significant cogent material on understanding is included as a part of the curriculum. A result of this is the production of graduates who tend to join into a blind race for wealth, position and jobs. Often it leads to misuse of the skills; and confusion and wealth that breeds chaos in family, problems in society, and imbalance in nature. This course is an effort to fulfill our responsibility to provide our students this significant input about understanding. This course encourages students to discover what they consider valuable. Accordingly, they should be able to discriminate between valuable and the superficial in real situations in their life.

MODULE 1. Course Introduction - Need, Basic Guidelines, Content and Process for Value Education

Purpose and motivation for the course, recapitulation from Universal Human Values-I
 Self-Exploration–what is it? - Its content and process; 'Natural Acceptance' and

Experiential Validation- as the process for self-exploration.

3. Continuous Happiness and Prosperity- A look at basic Human Aspirations

4. Right understanding, Relationship and Physical Facility- the basic requirements for fulfilment of aspirations of every human being with their correct priority

5. Understanding Happiness and Prosperity correctly- A critical appraisal of the current scenario.

6. Method to fulfil the above human aspirations: understanding and living in harmony at various levels.

Include practice sessions to discuss natural acceptance in human being as the innate acceptance for living with responsibility (living in relationship, harmony and coexistence) rather than as arbitrariness in choice based on liking-disliking

MODULE 2. Understanding Harmony in the Human Being - Harmony in Myself!

7. Understanding human being as a co-existence of the sentient 'I' and the material 'Body'

8. Understanding the needs of Self ('1') and 'Body' - happiness and physical facility

9. Understanding the Body as an instrument of 'I' (I being the doer, seer and enjoyer)

10. Understanding the characteristics and activities of 'I' and harmony in 'I'

11. Understanding the harmony of I with the Body: Sanyam and Health; correct appraisal

of Physical needs, meaning of Prosperity in detail

12. Programs to ensure Sanyam and Health.

Include practice sessions to discuss the role others have played in making material goods available to me. Identifying from one's own life. Differentiate between prosperity and accumulation. Discuss program for ensuring health vs dealing with disease.

MODULE 3: Understanding Harmony in the Family and Society- Harmony in Human-Human Relationship

13. Understanding values in human-human relationship; meaning of Justice (nine universal values in relationships) and program for its fulfilment to ensure mutual happiness; Trust and Respect as the foundational values of relationship.

14. Understanding the meaning of Trust; Difference between intention and competence

15. Understanding the meaning of Respect, Difference between respect and

differentiation; the other salient values in relationship.

16. Understanding the harmony in the society (society being an extension of family): Resolution, Prosperity, fearlessness (trust) and co-existence as comprehensive Human Goals.

17. Visualizing a universal harmonious order in society- Undivided Society, Universal Order- from family to world family.

Include practice sessions to reflect on relationships in family, hostel and institute as extended family, real life examples, teacher-student relationship, goal of education etc. Gratitude as a universal value in relationships. Discuss with scenarios. Elicit examples from students' lives.

MODULE 4: Understanding Harmony in the Nature and Existence - Whole existence as Coexistence

18. Understanding the harmony in the Nature

19. Interconnectedness and mutual fulfilment among the four orders of nature - recyclability and self-regulation in nature

20. Understanding Existence as Co-existence of mutually interacting units in all pervasive space

21. Holistic perception of harmony at all levels of existence.

Include practice sessions to discuss human being as cause of imbalance in nature (film "Home" can be used), pollution, depletion of resources and role of technology etc.

MODULE 5: Implications of the above Holistic Understanding of Harmony on Professional Ethics

22. Natural acceptance of human values

23. Definitiveness of Ethical Human Conduct

24. Basis for Humanistic Education, Humanistic Constitution and Humanistic Universal Order

25. Competence in professional ethics:

a. Ability to utilize the professional competence for augmenting universal human order

b. Ability to identify the scope and characteristics of people friendly and eco -friendly production systems,

c. Ability to identify and develop appropriate technologies and management patterns for above production systems.

26. Case studies of typical holistic technologies, management models and production systems.

27. Strategy for transition from the present state to Universal Human Order:

a. At the level of individual: as socially and ecologically responsible architects, engineers, technologists and managers

b. At the level of society: as mutually enriching institutions and organizations.

you

Bachelors of Architecture (1st Year)

28. Sum up.

Include practice Exercises and Case Studies will be taken up in Practice (tutorial) Sessions eg. to discuss the conduct as an engineer or scientist etc.

READINGS:

Text Book

1. Human Values and Professional Ethics by R R Gaur, R Sangal, G P Bagaria, Excel Books, New Delhi, 2010.

Reference Books

1. Jeevan Vidya: EkParichaya, A. Nagaraj, Jeevan VidyaPrakashan, Amarkantak, 1999.

2. Human Values, A.N. Tripathi, New Age Intl. Publishers, New Delhi, 2004.

- 11. India Wins Freedom Maulana Abdul Kalam Azad

12. Vivekananda - Romain Rolland (English)

13. Gandhi - Romain Rolland (English)

OUTCOME OF THE COURSE:

By the end of the course, students are expected to become more aware of themselves, and their surroundings (family, society, nature); they would become more responsible in life, and in handling problems with sustainable solutions, while keeping human relationships and human nature in mind. They would have better critical ability. They would also become sensitive to their commitment towards what they have understood (human values, human relationship and human society). It is hoped that they would be able to apply what they have learnt to their own self in different day-to-day settings in real life, at least a beginning would be made in this direction. This is only an introductory foundational input. It would be desirable to follow it up by a) Faculty -student or mentor-mentee programs throughout their time with the institution. b) Higher level courses on human values in every aspect of living. E.g. as a professional

Evaluation Criteria for Exam / Question Paper Setting:-

One objective type compulsory question to be set covering the entire syllabus in addition to ten others (two from each unit). The students are requiring attempting total 06 questions i.e. compulsory question and one from other from each unit.

Core References

The assigned Faculty is required to provide updated references/E-resources related to the content of the subject by ensuring the availability of the same in the department library, on web portals/online i.e. E-learning. Bachelor of Architecture (B. Arch. 1st Semester)

Course Code	Course Name	L-1	Int. : Ext.	Duration of Exam	
BARCH108-21	Life skills	Non - Credits	s/Us	Non Credit	

Course Objective:

To enable students to cope with challenges of today's world and live a life which is socially and emotionally enriching.

Course Outcomes:

At the end of the course, the students will able to develop an awareness of the self and apply well-defined techniques to cope with emotions and stress. Use appropriate thinking and problem solving techniques to solve new problems

Detailed Syllabus:

UNIT- I

Decision Making

UNIT- II

Critical thinking /lateral thinking

UNIT- III

Communication and Interpersonal skills

UNIT- IV

Self-awareness and empathy, Coping with emotions and stress

Instructions for the Faculty:

Read the preamble of the syllabus & take utmost care to discuss life issues with budding architects.

*NOTE: Educational Tour of 1-2 week duration during or after the first year of studies must be undertaken and Summer Training/ Vacation assignment to be given based on BARCH-211/21. The marking of the same will done in the third semester BARCH-310/21

Course Code	Course Name	L-1, Stu-4	Int. : Ext	Duration of Exam
BARCH-201/21	Architectural Design - II	Credits - 5	60:40	06 Hours + Ext viva-voce

Course Objective

Understand the Architectural design of a small building with reference to function, form and structures.

Course Outcomes - At the end of the course, the students will be able to: Develop a basic understanding of function, form, structure in the design of small structures. Understand & gain a fundamental knowledge of the architecture design process and its principles.

Detailed Syllabus

UNIT-I

Design of small buildings - Security check post, Bus Queue Shelter, Kiosk cum Cafes, etc. (involving circulation, form structure, and function)

UNIT-II

Architect's Office, Doctor's Clinic, Lawyer office & such similar projects of small scale (Cycle stand, E-Rickshaw stand, Taxi stand & Parking layouts, etc.)

Minimum 2 -5 exercises to be taken. (01 major, 02 minor and 02 as time problem)

NOTE - All buildings should have accessibility to the physically challenged persons as per SC guidelines.

Instructions for the Faculty -

The Basic methodology of teaching should be based on

- Library study to understand the basic functions of building and anthropometry.
- Case Study to understand the similar buildings in similar context.
- The emphasis of design should be on the space organisation and built form.
- Stress should be given to new thoughts/ innovation in design.

Design faculty should encourage and motivate the students for live projects of their immediate surroundings.

Evaluation Criteria for Examination/ Question Paper Setting:

One compulsory question is to be set from the entire syllabus.

The answer sheet shall be retained at the institute after the exam for conduct of the viva voce which will be conducted at the institute level by Internal / External jury members appointed in consultation with the university from the approved panel list of examiners.

Core References:

The assigned Faculty is required to provide updated references/E-resources related to the content of the subject by ensuring the availability of the same in the department library, on web portals/online i.e. E-learning. The Faculty is also advised to keep on updating the reference list and submit the latest one in the Library & Academic department of the Campus.

Course Code	Course Name	L-1, ST-3,	Int. :Ext.	Duration of Exam
BARCH-202/21	Architectural Drawing - II	Credits - 4	60:40	03 Hours

Course Objective

To make students learn the techniques to represent different objects through 3-D and developing skill for visualization of 3-D forms through isometric/axonometric views, perspective and sociography to enhance the designing skills.

Course Outcomes- At the end of the course, the students will be able to:

- Understand the fundamental techniques of technical drawing used in 3-D.
- Analyse the 3-dimensional drawings of the building with Sociography.

Detailed Syllabus

UNIT-I (Isometric/ Axonometric projections)

- Principle of Isometric projection, Isometric grid and Scale.
- Isometric /Axonometric Views of simple/complex forms.
- Fundamentals of Sociography (point, line, plane, solids etc.)
- Sociography in Plans and Elevations

UNIT-II (Perspective Drawing)

- Introduction to theory of Geometrical Perspective Drawing.
- Angular (Two Point Perspective) and Parallel (One Point Perspective)
- Perspective of different Solids and Building elements
- Sociography in Perspectives (both one point & two-point perspectives)
- Perspective of one design problem being done in semester with sociography.

Instructions for the Faculty

- The Faculty is required to give maximum examples of the perspective view to enable the students to draw the views by using thumb rules.
- Emphasis should be laid on learning by doing and students have to be encouraged to make proper models to understand the geometry of forms.

Evaluation Criteria for Examination/ Question Paper Setting:

Total four questions are to be set, two from each unit & students are required to attempt a total of two questions i.e. one from each unit. The distribution of marks for unit I: Unit II is 15: 25 marks

Core References:

The assigned Faculty is required to provide updated references/E-resources related to the content of the subject by ensuring the availability of the same I;n the department library, on web portals/online i.e. E-learning. The Faculty is also advised to keep on updating the reference list and submit the latest one in the Library & Academic department of the Campus.

Course Code	Course Name	L-1 , ST-2	Int. : Ext.	Duration of Exam
BARCH-203/21	Architectural Graphics - II	Credits-3	60 : 40	03 Hours

Course Objective

The objective of the course in Architectural Graphics is to make the students familiar with the basic potential of Pencil and colours as a powerful tool of Graphic Communication.

Course Outcomes - At the end of the course, the students will be able to:

- Gain a fundamental knowledge of architecture Graphics and its principles.
- Attain the knowledge about the role of colours in presentation drawing and rendering techniques used in architectural design.

Detailed Syllabus

UNIT-1 (Poster Colours as an effective presentation tool and its use in architecture design)

- Colour theory, Understanding colour value and intensity
- Colour Wheel showing Primary, Secondary and Tertiary colours.
- Colour Schemes & Charts showing Tints and Shades of various colours.
- Effect of colours in relief compositions.

UNIT- II

(Oil Pastels, Charcoal and watercolours as presentation medium)

- Representation of different textures in colour (brick, stone, timber, marble, glass etc.)
- Outdoor/indoor sketching of buildings, huts, group of trees, different kinds of trees/shrubs/grass with varying foliage in colours
- Colour rendering of blocks/geometrical forms, human figures, different types of vegetation, different transport modes and buildings etc.
- Rendering of drawings (Plan, elevation, 3-D views) in oil pastels and water coloured medium of one design problem being done in semester in any one medium.

Instructions for the Faculty

• Workshops related to colour rendering will also be organised, highlighting its technique and style which can be organised indoor or outdoor. The students must be encouraged to appreciate the natural/man-made landscape and to understand the interrelationship of nature and architecture.

Evaluation Criteria for Examination/ Question Paper Setting:

Total four questions are to be set, two from each unit & students are required to attempt one from each unit.

Core References:

The assigned Faculty is required to provide updated references/E-resources related to the content of the subject by ensuring the availability of the same in the department library, on web portals/online i.e. E-learning. The Faculty is also advised to keep on updating the reference list and submit the latest one in the Library & Academic department of the Campus.

Bachelor of Architecture (B. Arch. 2nd Semester)

Course Code	Course Name	L -2, T - 1	Int. : Ext.	Duration of Exam
BARCH-204/21	History of Architecture - I	Credits - 03	40:60	03 Hours

Course Objective

To appreciate the constraints in the Architectural design of an ancient building with reference to its function, form and structures. To make students understand how different Architectural solutions were evolved(in successive historic periods) within the limitations imposed by prevalent social and religious customs, available building materials, climate of region/topography, complex structural problems and the limited technology available at that time period.

Course Outcomes: At the end of the course, the students will be able to -

- Developing a holistic approach to architecture is an integral component of the built environment.
- Develop an understanding of architecture as an outcome of various social, political and economic influences and as a response to the cultural and climate conditions.
- Understand the physical experience of buildings in order to appreciate the complexity of the physical and metaphysical influences bearing on architecture.

Detailed Syllabus

UNIT-I

- Introduction, Definition and scope & importance of History of Architecture Man's early/ prehistoric attempts to colonise and personalise space by taking the examples of early shelters, Stonehenge, tumuli etc. As an expression of man's physical and spiritual needs.
- Introduction to the river valley civilizations- the Origin and the Form of the civilization.
- Architecture and town planning of Harappan civilization such as towns of Lothal, Mohenjo- Daro, Dholavira, Kalibanga etc.

UNIT-II

- Understanding of Vedic architecture, and settlements. The Vedic village-Building typology and its construction details.
- **Buddhist Art and Architecture**: Beginning & origin of Buddhist architecture and the important Sociopolitical factors in selection of sites. Architectural examples of Mahayana and Hinayana Buddhism; Rockcut and free standing. Study of caves, stupas, and viharas of places like Sanchi, Amravati, Karle, Ajanta etc.

UNIT-III

Introduction to architecture and planning of river valley civilizations of ancient Egypt, Mesopotamia. Study of palace, hypostyle hall, temple, tomb architecture.

Nile Valley Civilization

Salient building types: (Egyptian)

- Mastabas development and typical components
- Pyramids –development and typical components, Complex of Zoser, Pyramid of Cheops and Cephren, Standard mortuary complex layout of pyramids
- Temples & temple complexes Cult Temple and Mortuary Temple

Mesopotamian civilization

Salient building types : (Mesopotamian)

- Ziggurats and their development White Temple, Ziggurat of Ur, Ur Nammu and Khorsabad
- Generic Temple Layout Temple Oval and Khafaje
- Palace Complex/Citadel of Khorsabad

<u>UNIT-IV</u>

Introduction to architecture and planning of ancient Greece and Rome. Study of principles of design, proportion, optical corrections and classical orders.

- a) Greek Architecture:- Classical Order Doric, Ionic, Corinthian Salient building types:
 - Temple types on basis of column layout case example of Acropolis, Athens
 - Public Buildings and Square Agora, Stoa, Theatres
- **b)** Roman Architecture: Contribution in new materials and new construction/structural systems, eg, Pozzolana, Cementae, Stone Blocks, Stone Masonry, Arch, Vault, Dome.

Salient buildings types:-

Pantheon, Colosseum, Bath of Caracalla, Basilica of Trajan, Forums of Rome, Aqueduct

Instructions for the Faculty:

- The Faculty is advised to consider limited examples (not more than 05) of each type of Architecture emphasizing on the analysis of architecture style/building typology must include the functional, constructional/structural and ornamentation aspects.
- Educational trip will be organised to impart practical knowledge of the content.

Evaluation Criteria for Exam / Question Paper Setting: -

The examiner is required to set eight questions with minimum two from each unit. Students are required to attempt five questions with a minimum one from each unit.

Core References:

The assigned Faculty is required to provide updated references/E-resources related to the content of the subject by ensuring the availability of the same in the department library, on web portals/online i.e. E-learning. The Faculty is also advised to keep on updating the reference list and submit the latest one in the Library & Academic department of the Campus.

Course Code	Course Name	P - 2	Int. : Ext.	Duration of Exam
BARCH-205/21	Workshop - II	Credits-01	100	No Exam
				only Internal Viva-voce

Course Objective

The student will gain basic hands on experience and fundamental knowledge in model making, sculpture and clay modelling.

Course Outcomes: At the end of the course, the students will able to--

- Proficiency in handling clay as a material.
- Acquire skills in different types of architectural model making using various materials and get hold of skill in sculpture making in various mediums.

Detailed Syllabus

UNIT-I (Clay & Sculpture)

- Clay Modelling, Pinching, Coiling Techniques Slab Techniques
- Sculptures in Plaster of Paris, Wires, Scrap, Wood, Ceramic tiles etc.

UNIT-II (Product design)

• Design & Model Making of Furniture, Lamp shades and other Interior & Exterior Elements.

UNIT- III (Model Making in paper, cardboard and mount board)

- Prepare block model of the design project introduced in the semester along with site plan details such as parking area, green areas and landscape techniques etc.
- To prepare a detailed model of mixed materials for a major design project of one design problem being done in semester.

Instructions for the Faculty

• The Faculty is required to organize one or two Sculpture/Mural workshops to enable the students to understand the concept of "learning by doing".

Evaluation Criteria for Examination/Question Paper Setting

In the end of the semester internal jury Viva-voce to be conducted (the jury comprises of the subject incharge and the HoD nominee)

Core References:

The assigned Faculty is required to provide updated references/E-resources related to the content of the subject by ensuring the availability of the same in the department library, on web portals/online i.e. E-learning. The Faculty is also advised to keep on updating the reference list and submit the latest one in the Library & Academic department of the Campus.

Course Code	Course Name	L-1, ST-3,	Int. :Ext.	Duration of Exam
BARCH-206/21	Building Construction & Materials - II	Credits-4	60:40	03 Hours

Course Objective

The main objective is to introduce the properties of timber as building material and to familiarize the students with traditional construction methods of a single storeyed building-in timber with sloping roofs-

Course Outcomes: At the end of the course, the students will be able to-

- Comprehend timber as a building material and its application in building components and gain knowledge on construction of Door, window, roof made out of it.
- Understand various surface finishes for single storey building and the fundamental knowledge for water proofing details in simple structures.

Detailed Syllabus (This subject consists of two Parts)

Part A: Building Materials

UNIT-I (Materials)

- Timber: Sources of timber, its classification & characteristics, defects of Timber, different Preservation and treatment measures and Uses of Timber in building construction.
- Industrial timber products and their applications-plywood, particleboard, laminated board, block board and batten board etc.

UNIT – II (Waterproofing and Surface finishes)

- Water proofing: Water proofing materials (liquid, semi liquid and solid) Composition, Properties, Applications.
- Surface finishes: -White wash, Distemper, Paints and Varnishes- Types, Applications, Suitability, Advantages and Disadvantages.

Part B: Building Construction UNIT – III (Doors & Windows)

- Doors -Types of Doors, Design and construction details of Framed, Ledged, Braced & Battened Door, Flush Door, and Wire mesh Door, Panelled Door etc. (considering different types of Joints and Joinery details)
- Windows Types of Windows, Design and Construction details of Casement, Bay, Clearstory, Corner window Dormer window etc. (considering different types of Joints and Joinery details)

UNIT – IV (Foundation, Walls and Roofs)

- Foundation introduction and importance of foundations, Types of Foundations (brick and stone) and their design considerations for load bearing structures.
- Damp proof course introduction and types of D.P.C., laying and maintenance of D.P.C. layers Roofs -Construction of R.B.C. roof, Jack Arch Roof, Tiled and Battened Roof and concepts of water proofing & Thermal Insulation of roofs.
- Section through a single storey building covering the foundation, D.P.C. layer, window with sill and lintel level, roof and wall junction, roof insulations and parapet wall details.
- Walls- various types of timber frame walls with details of joints and cladding
- Dhajji wall construction
- Foundation of timber post

Instructions to the Faculty

- The faculty should encourage the students to visit the construction site/conduct market survey w.r.t. the topics covered in the class.
- Audio-visual lectures should be presented.

Evaluation Criteria for Examination/ Question Paper Setting:

Total eight questions are to be set, two from each unit & students are required to attempt a total of four questions i.e. one from each unit. The distribution of marks for **Part A** (Unit I&II): **Part B** (Unit III & IV) is 12: 28 marks.

Core References:

The assigned Faculty is required to provide updated references/E-resources related to the content of the subject by ensuring the availability of the same I;n the department library, on web portals/online i.e. E-learning. The Faculty is also advised to keep on updating the reference list and submit the latest one in the Library & Academic department of the Campus.

Course Code	Course Name	L-1 T-1	Int. : Ext.	Duration of Exam
BARCH-207/21	Theory of Design - I	Credits -2	40:60	03 Hours

Course Objective

The objective is to establish the role and importance of Theory of Design as a broad, comprehensive activity to help students to formulate a responsible opinion and a well-reasoned judgement by looking at the design in depth and in a critical way.

Course Outcomes: At the end of the course, the students will able to-

- Develop a basic understanding of spatial organisation
- Learn about the inter-dependence of function, structure and form in architectural design. .

Detailed Syllabus

UNIT-I

- Primary Elements of Design such as Point, Line, Planes and Volume with building examples.
- Proportion, scale, balance, rhythm, symmetry, hierarchy, pattern, axis with building examples
- Formal Collision of Geometry and Articulation of Forms.

UNIT-II

- Organization of Form and Space.
- Spatial relationships; space within space, interlocking space, adjacent space, space linked by common space.; influencing factors for spatial organization and their types; centralized, linear, radial, clustered etc.

UNIT – III

- Analysis and classification: space usage & inter-relationship of different spaces within a building.
- Form defining Space with Horizontal Elements and Vertical Elements.
- Spatial Organization and Circulation Elements including Approach, Entrance, Configuration of the Path (Path- Space Relation, Form of the Circulation Space).

UNIT – IV

- Proportion and Scales, Proportion System, Visual Scale and Human scales, scalar comparison.
- Aesthetic principles in Indian and western cultures.

Instructions for the Faculty

- The Faculty is required to guide the students with building examples (taken from Indian/world architecture) to understand the necessary relationship between indoor and outdoor space in context to the theory of design and must encourage the students to do in depth study of design theory.
- Audio-visual lectures should be presented and the subject must be taught in coordination to site visits or study tour for topics relating to theory of form, space and basic architectural forms.

Evaluation Criteria for Examination/ Question Paper Setting:

The examiner is required to set eight questions with minimum two from each unit. Students are required to attempt five questions with a minimum one from each unit.

Core References:

The assigned Faculty is required to provide updated references/E-resources related to the content of the subject by ensuring the availability of the same in the department library, on web portals/online i.e. E-learning. The Faculty is also advised to keep on updating the reference list and submit the latest one in the Library & Academic department of the Campus.

IK Gujral Punjab Technical University
Bachelor of Architecture (B. Arch. 2nd Semester)Course CodeCourse NameL-1 P-2Int.: Ext.Duration of ExamBARCH-208/21Computer Applications - ICredits - 260:40No Exam, only Ext.
jury / Viva-Voce

Course Objective: To make students aware of the role and importance of Computers in the field of Architecture.

Course Outcomes: At the end of the course, the students will be able to understand basics of Computers hardware, operating systems and operative languages, being a fundamental course the students will be introduced to the basics of hardware and software. They will be introduced to 2D presentations.

Detailed Syllabus: - Being an advanced learning course, students will be introduced to 2D drawing and rendering techniques.

UNIT- I

- Introduction to MS Office tools (PowerPoint presentation, word file/excel etc.)-basic templates for creating text documents, editing, formatting, spelling/grammar check, dictionary and thesaurus, page layout, fonts, indentation, inserting tables and images, document review and annotation in software like MS Word.
- Image processing: basic image sourcing, editing and insertion for desktop publishing in Adobe Photoshop or similar software.

UNIT- II

- Basic commands like copy, paste, stretch, offset, move fillet, extend, trim and other 2D commands.
- Basic Text writing and dimensioning of the Plans, Elevation and Sections.
- Basic hatching and filling of the Walls in the Plans, Elevations and Sections.
- Understanding of unit settings, scale, limits, line type, line weight, layers, colours, and print commands.
- Simple exercises in to 2D CAD software (AutoCAD/Revit) specifically for proficiency of, drawing/editing objects, text, dimensioning, making and inserting blocks,
- Drawing the basic Plans, Sections, and Elevations
- Basic rendering in the Auto Cad and in other Software's in 2D..

Evaluation Criteria for Exam

The evaluation of students shall be based on practical conducted based on a specific problem given to know the student's understanding of the computers in the field of Architecture.

Instructions for the Faculty –

Emphasis should be laid on developing the skill of 2-D drafting on the Software's

Core References:

The assigned Faculty is required to provide updated references/E-resources related to the content of the subject by ensuring the availability of the same in the department library, on web portals/online i.e. E-learning. The Faculty is also advised to keep on updating the reference list and submit the latest one in the Library & Academic department of the Campus

Course Code	Course Name	P/FW-2	Int. : Ext.	Duration of Exam
BARCH-209/21	Mentoring & Professional Development-I	Non-Credit	S/US	No Exam
Guidelines reg	arding Mentoring and Professional Development			

The objective of mentoring will be development of

- > Overall Personality
- > Aptitude (Technical & General)
- ➢ General Awareness (Current Affairs & GK)
- Communication Skills
- > Presentation Skills

The course shall be split in two sections i.e. class activities and outdoor activities for achieving the above suggestive list of activities to be conducted are:

Part A (Class Activities)

- Expert and video lectures
- Aptitude Test
- Group Discussions
- Quiz (Technical & General)
- Presentation by the Students
- Team Building Exercises

Part B (Outdoor Activities)

- Sports: NSS/NCC
- Society activities in various student chapters i.e. NASA, ISTE, SCIE, SAF, CSI, Various Clubs such as Cultural, Hobby, Adventure etc.

Evaluation shall be based on rubrics for Part A & B

Mentors faculty incharge shall maintain a proper record student wise of each activity conducted and the same shall be submitted to the department.

	Design - III						viva-voce

Course Objective: To make students understand and appreciate the constraints in the designing of a building of a small scale with reference to function and form and to create awareness about the role and Importance of physical factors in Architectural Design. Study of climatic conditions of the site and aesthetics along with spatial attributes like orientation, ventilation, adequate protection from natural elements, and human dimensions in various postures (in applied form), their relation to everyday utilities including table, chair, bed etc.

UNIT-I: Single family user/ Small cluster user

Design of House, Primary School, without urban regulatory controls with emphasis on environmental and local ecological issues.

UNIT-II: Multiple user/Multiple Functions

Design of Post Office, Health Centre/ Dispensary, Community Centre, Restaurant etc.

Course Outcomes:

At the end of the course, the students will able to understand the nuances of house, school, cafeteria and post office design. They will also be well versed with various physical factors of architecture design and is able to take design decisions by considering various aspects of designs.

Teaching Methodology

Minimum two projects/ assignments to be handled by the students individually. Library and prototype studies should be carried out for other projects in groups. Model and perspective should be made integral part of project presentation. Stress should be laid on the understanding the basics of process of design.

Guidelines for Paper Setter

• One compulsory question is to be set from the entire syllabus.

Evaluation Methodology

- Evaluation is to be done through viva voce by external jury appointed by the college.
- Answer sheets should be retained at college level for the viva voce examination.
- The topic of the project is to be displayed on College / Institute Notice Board ten days in advance.

Course Objective: To learn and apply various rendering techniques in Architectural Design & visual composition and to appreciate the role of presentation techniques. The focus of this subject will be more on hand oriented presentation techniques and skills.

UNIT-I: Calligraphy and Hand writing Skills

Calligraphy stroke writing in various fonts and various sizes.

UNIT-II: Interior Rendering

Render a scene of interior of a house/office/ restaurant/factory with any medium giving tints and tones and lighting effects. Single medium or Multiple medium presentation.

UNIT-III: Exterior rendering

Render a scene of Exterior of a house, Office building, playground, Market, railway station, airport station with any medium giving tints and tones and lighting effects. Single medium or Multiple medium presentation.

UNIT-IV: Live sketching

Outdoor live sketching of any institutional building/office building/historical building nearby or market places which enrich the students with understanding of scale and proportion. The students must be encouraged to appreciate the natural/man-made landscape.

Course Outcomes:

At the end of the course, the students will be able to gain a fundamental knowledge of architecture Graphics and its principles. Attain the knowledge about the role of colours in presentation drawing and rendering techniques used in architectural design.

Teaching Methodology

Workshops related to architectural rendering should be organized, highlighting its technique and style which can be organized indoor or outdoor. The students must be encouraged to appreciate the natural/man-made landscape and to understand the interrelationship of nature and architecture

Guidelines for Paper Setter

No Exam

Evaluation Methodology

• Portfolio Submission at the end of semester and internal jury

- Rendering with pen and Ink

Course Objective: To appreciate the constraints in the Architectural design of an ancient building with reference to its function, form and structures. To make students understand how different Architectural solutions were evolved (in successive historical period) within the limitations imposed by prevalent social and religious customs, available building materials, climate of region/topography, complex structural problems and the limited technology available at that time period.

UNIT-I: Hindu Architecture

Early Hindu Architecture: Hindu temple Architecture: Gupta Period (A.D350-650), Chalukyan Architecture (A.D. 450-650), at Aihole, Badami and Pattadakal, Evolution of temple form, Rathas at Mahabalipuram,

Dravidian Architecture: Development of Settlement pattern and worship places. Study of Worshipping places of Dravidian Architecture -Chalukyan Phase (A.D. 600-750), Pallava(A.D. 600-900), Choloas (A.D. 900-1150) Pandyas (A.D1100-1350), Vijanagara (A.D.1350-1560) and Madurai (A.D.1600) etc.

UNIT-II: Islamic Architecture

Architecture of Imperial Style or Delhi Sultanate: Mosques, Tombs and secular buildings: The Qutb Complex: Quwwat-UI-Islam Mosque, Qutb-Minar, Tomb of Iltutmish, extensions and additions by Allaudinkhilji.

Arhai Din Ka jhompra, Khirkee Masjid, Jamaat khana Masjid, Sultan Ghari, Tombs of Ghiyasuddin Tughlaq, Firoz Shah Tughlaq, Balban, SikanderLodhi. Firoz Shah Kotla

UNIT-III: Islamic Architecture

Architecture of Provisional Style: Advent of Islam and its influence in India leading to the Indo-Islamic Style. Evolution of the Mosque & the Tomb design of Jaunpur, Mandu, Sher Shah Suri at Sasaram. Ahmedabad.

UNIT-IV: World Architecture

Early Christian Architecture: Study of Architecture Characteristics and evolution of church form, building typology and building elements. Early Basilica of St. Peter Rome.

Byzantine Architecture: Study of Architecture Characteristics and evolution of church form, building typology and building elements. Pendentive domes construction and church of Hagia Sophia and construction of arches

Romanesque Architecture: Study of Architecture Characteristics of Romanesque Period mainly of Italy, France and Central Europe. Focusing evolution of church form, building typology and building elements. Pointed Arches, Criss Cross arches

Course Outcomes:

At the end of the course, the students will be able to developing a holistic approach to architecture as an integral component of the built environment. Develop an understanding of architecture as

an outcome of various social, political and economic influences and as a response to the cultural and climate conditions. Understand the physical experience of buildings in order to appreciate the complexity of the physical and metaphysical influences bearing on architecture

Teaching Methodology

For each period, stress is to be laid on the Architectural character and elements of Architecture with only one or two representative examples to highlight these features. Emphasis should be laid on understating of evolution of buildings and form. Continuous evaluation shall be made of students work based on various models, assignments and sketching

Guidelines for Paper Setter

- One compulsory question of short answers type containing 6 questions of 2 marks each (12 Marks) is to be set from the entire syllabus.
- Two questions are to be set from each part and students would be required to attempt minimum one question from each part
- Student would be required to attempt five questions in all including compulsory question.
- Question paper is to be set covering entire syllabus by making parts and mixing the topics.

Evaluation Methodology

Course Objective: To develop a fundamental understanding of basic building elements, their functions and behaviour under various condition with specific reference to brick masonry construction. To understand basic principles of R.C.C construction with respect to cantilever slab and staircase To introduce students to flooring and cladding details

UNIT-I: Masonry Structure Double Story

Section of a Double Storied Building: Section of a double storied building through Toilet and Stair case showing the details of Foundation, D.P.C, Floor, Window, Lintel, Chhajja, R.C.C Roof, Terrace and Parapet

UNIT-II: Staircases-RCC

Types of Staircases- RCC only: Design and detailing of RCC staircases. Various types of Staircases in RCC, simply supported and cantilever staircase. Form work and Railing details for RCC Staircase.

UNIT-III: Form work and Shuttering

R.C.C. Form work and Shuttering: R.C.C. Form work and Shuttering details for- Column square, round, rectangle and hexagon. RCC form work for Slab and Beam, Wall, Staircase and basement etc.

UNIT-IV: Flooring and Cladding

Flooring and Cladding: Construction of PCC, Terrazzo, (Cast-in-situ and tiles) and various types of Stone flooring, tile flooring and Contemporary floor must also be studied. Cladding of interior and exterior facades in various commonly used materials like tiles, stones,

Course Outcomes:

At the end of the course student will expand a basic knowledge about building elements and construction techniques of R.C.C. staircases, shuttering of Columns, Beams and slab in R.C.C. and also develop the understanding of flooring and cladding details.

Teaching Methodology

Site Study of scaffolding and shuttering is to be conducted. Emphasis should be laid on making students understand complete construction details of double-storied structure. Field visit to study the complete process of lying of reinforcement and concreting. Preparing Construction sheets on above topics

Guidelines for Paper Setter

- Two questions are to be set from each part and students would be required to attempt minimum one question from each part.
- Students would be required to attempt four questions in all including compulsory question.
- Question paper is to be set covering entire syllabus by making parts and mixing the topics.

Evaluation Methodology

Course	Course Name	Contact Hours		Marks		Credits	Examination
Code		Lecture	Tutorial	int	ext		
BARCH305-21	Structure Design - I	2	1	40	60	3	03 Hours

Course Objective: The aim and objective of the course on structure design-I is to get introduced to basic structural members in masonry and timber, to give knowledge of design of timber beams in buildings and to enable understanding of basic concepts of shear force and bending moment.

UNIT-I: Masonry Foundation and Retaining wall

Design of Foundations in Masonry work-- Safe Bearing Capacity, Load on Foundations, Depth of Foundation, Rankine's formula, Footing Sections.

Design of Retaining Walls in Masonry-- Loads, Resultant Pressure, Stability of Structure, Middle Third Rule, Design examples.

UNIT-II: Analysis of Frame

Bending Moment/ Shear Force, Type of Supports, Loads and Beams, BM and SF diagram for Simply Supported Beams with Point Load and Uniformly Distributed Load--Design examples

UNIT-III: Frame design

Design of Simple Timber Beam, Bending Stress Check, Shear Check, Deflection Check, Bearing Check, Design examples with UDL and Concentrated load.

UNIT-IV: Portal Frame

Analysis of portal frame by slope deflection method (Non-sway)

Course Outcomes:

At the end of the course, the students will able to Design timber beams by applying codal provisions, Design Masonry foundation and retaining walls, Analyse indeterminate structures and to calculate shear force and bending moment in determinate structures.

Teaching Methodology

• Structural design shall be supplemented by structural drawings.

Guidelines for Paper Setter

- One compulsory question of short answers type containing 6 questions of 2 marks each (12 Marks) is to be set from the entire syllabus.
- Two questions are to be set from each part and student would be required to attempt minimum one question from each part.
- Student would be required to attempt five questions in all including compulsory question.
- Question paper is to be set covering entire syllabus by making parts and mixing the topics.

Evaluation Methodology

- Bansal, R. K., "Engineering Mechanics & Strength of Materials Publisher", Laxmi Pvt Limited, 1998.
- Rao, K.L., "Applied Mechanics", McGraw hill education.
- Mehta, J. C., "Applied Mechanics", New Asian, 1963.
- Timoshenko, Stephen., "Strenth of Materials", Krieger, 1976

Course	Course Name	Contact Hours		Marks		Credits	Examination
Code		Lecture	Studio	int	ext		
BARCH306-21	Structure System -I	2	0	100	0	2	No Exam

Course Objective: To make students learn basics principles of structure systems with emphasis on learning by doing and making 3-D models to provide the student with different spatial experience.

UNIT-I: Cellular Structure System,

Cell as a natural unit of space, Cell transformation, Polygonal Cellular Systems leading to evolution of Geodesic Domes. Understanding the geometry of Platonic Solids and its duality in nature. Applications of Cellular System in Building.

UNIT-II: Bulk Active Structure System

Structure acting mainly through material bulk and continuity i.e. Bulk active structure system / structure systems in bending involving: Slabs (One way & Two way), Beams (Simply supported, Cantilever, Continuous, Vierendeel Girders), Columns, Grid (Skew & Square Grid)

UNIT-III: Vector Active Structure System

Structures acting mainly through Composition of Compression and Tension members such as, Space frames, Trusses (Timber & Steel), Domes (Ribbed & Geodesic)

UNIT-IV: Application of Structure System in Architecture

Application of platonic solids. Application of bulk and Vector active structure system in the building by making different models.

Course Outcomes:

At the end of the course, the students will be able to gain ability to comprehend the Design erection process and application of large span structures. To understand the need and importance of prefabricated components and structures as an alternative to cast in situ construction process. To understand the needs, requirements, and selection for various types of structures systems.

Teaching Methodology

Emphasis shall be on making students understand the principles and systems involved in various topics. The students should be made to Coordinate the fabrication of at least four models to demonstrate the various structural system. Students be encourage to visit Pragati Maidan & other Building centres in New Delhi for better exposure. Students be encourage to present a PPT on the topics assigned and submit its report for external evaluation.

Guidelines for Paper Setter

No Exam

Evaluation Methodology

Evaluation is through Internal Viva Voce of the work done by the student during the end of semester with internal faculty and HOD Architecture/Principal.

- Critchlow. Keith., "Order in Space"
- Richard K.Thomas ., "Three Dimensional Design"
- Engel H, "Structure Systems"
- Salvadori Mario, "Building of Building"
- Butler Robert B, "Architectural Engineering Design: Structural Systems"
- Schierle G G, "Architectural Structure"
- Moore Fuller, "Understanding Structure"

Course	Course Name	Contact Hours		Marks		Credits	Examination
Code		Lecture	Tutorial	int	ext		
BARCH307-21	Theory of Design- II	2	1	40	60	3	03 Hours

Course Objective: To understand different design processes and strategies that can be applied in Architecture and to introduce students the development in architecture with specific reference to form, technology and ornament

UNIT-I: Pre industrial and Industrial revolution

Pre industrial and Industrial revolution: Neo Classical and Pre-Industrial, Developments and building examples from Italy. Industrial Revolution and its impact on the development of new towns. e.g. Tony Garnier's Industrial city. Influence of new construction materials, industrial techniques and functional needs on building typology and architectural form through building examples.

UNIT-II: Early modern movement and Art Nouveau

Early modern movement and Art Nouveau: Advances in steel construction like the Great Exhibition. Modern Architecture up to Second World War. Development of the high-rise building. Chicago School of Architecture (1880-1910)- Dankmar Adler and Louis Sullivan. Art Nouveau Architecture (1890-1920) - Antoni Gaudi, Joseph Maria Olbrich. International style and expressionist.

UNIT-III: Master Architects

Walter Gropius : Philosophy and Buildings with Minimum 4- 5 famous works of different era *Frank Lloyd Wright* : Philosophy and Buildings with Minimum 4- 5 famous works of different era

UNIT-IV: Master Architects

Le- Corbusier India and abroad: Philosophy and Buildings Minimum 4- 5 famous works of different era. The works in India should be given preferences.

Ludwig Mies van der Rohe: Philosophy and Buildings Minimum 4-5 famous works of different era

Course Outcomes:

Student will able to understand the architecture as formal, stylistic and structural development.

Teaching Methodology

Study of Master Architect shall focus on his life, approach, philosophy and Architectural works including character and elements of Architecture developed with representative examples to highlight those features. Emphasis should be laid on understating of evolution of buildings and form. Continuous evaluation shall be made of students work based on various assignments and sketching.

Guidelines for Paper Setter

• One compulsory question of short answers type containing 6 questions of 2 marks each (12 Marks) is to be set from the entire syllabus.

- Two questions are to be set from each part and student would be required to attempt minimum one question from each part.
- Student would be required to attempt five questions in all including compulsory question.
- Question paper is to be set covering entire syllabus by making parts and mixing the topics specially form Unit -III and Unit -IV.

BARCH308-21	Climate and	2	0	40	60	2	03 Hours		
	Architecture- I								

Course Objective: To acquaint the students and make them aware of the concept of climate as a significant determinant of built forms and to familiarize them with various climate control devices.

UNIT-I: Introduction to Climatology

Fundamentals of Climatology, Introduction to climatology, Importance of studying Building climatology, Elements of climate, Global climate factors, Interrelationship of climatic elements and Psychometric chart.

UNIT-II: Thermal Comfort for Human

Thermal Comfort, Definition and explanation of Thermal Comfort, Human Heat Balance and Physical Comfort, Relationship of Climatic Elements with Thermal Comfort, Thermal Stress Index, Bio-climatic Chart, Effective Temperature and Corrected Effective Temperature, Histogram with their uses, Wind Movement and Natural Ventilation.

UNIT-III: Sun Path and Building orientation

Movement of Sun, Understanding the movement of Sun, Solar Chart and its importance. Importance of understanding the optimum orientation of buildings and their forms in relation to Sun, Concept and Design of Shading Devices.

UNIT-IV: Climatic Zones

Climatic Zones, Tropics and its Climatic zones, Macro and Micro Climate (site climate). Role of Climate with respect to Shelter, Principles of Architectural Design and Study of various Indigenous Shelters in response to various design solutions of Climate Zones in the Tropical belt of India.

Course Outcomes:

At the end of the course, the students will able to understand climatology in Architecture as an important consideration.

Teaching Methodology

Emphasis should be given to understand the climate is affecting the various shelters and form.

Guidelines for Paper Setter

- One compulsory question of short answers type containing 6 questions of 2 marks each (12 Marks) is to be set from the entire syllabus.
- Two questions are to be set from each part and student would be required to attempt minimum one question from each part.
- Student would be required to attempt five questions in all including compulsory question.
- Question paper is to be set covering entire syllabus by making parts and mixing the topics.

Evaluation Methodology

Course Course Name		Contact Hours		Marks		Credits	Examination
Code		Lecture	Practic al	int	ext		
BARCH309-21	Computer	1	2	60	40	3	No exam.
	Application-II						Internal Viva
							Voce.

Course Objective: The objective of the subject is to enabled students to understand and apply Basic CAD skills to create simple and complex three dimensional objects and skill to render and animate the building models.

UNIT-I: Creating Three Dimensional objects

Introduction to computer aided 3d drafting. Understating tool, command and basic set up for 3D. introduction to 3d modelling techniques and construction planes, drawing objects, 3D surfaces, setting up elevation thickness and use of dynamic projections. Application of various tool bars for three dimensional modelling. Creating and editing simple and complex geometric meshes, surfaces and solids with there combination etc.

UNIT-II: 3D model of Buildings

Understanding and converting plan elevation and section of drawing to three dimensional building model using 3 dimensional tools. Creating building models using building software's by orthographic projections.

UNIT-III: Photorealistic rendering

Making Models photorealistic using materials, lighting, textures, background, etc. creating new materials and environments attributes.

UNIT-IV: Walk through of Interior / Exteriors

Create Interiors walk through for small spaces such as bed room, office, etc. by adding scenes, furniture, textures, finishes, with lighting effects and camera angles.

Create building exteriors walk through by adding scenes, trees, human figures, cars, sun light effects, and camera angles.

Course Outcomes:

At the end of the courses students should have capability to visualise the building Visualise the building and transform sketches from 2 dimensional CAD drawing to 3 dimensional building model and walk through.

Teaching Methodology

Making three dimensional photorealistic rendered architectural model for any one of the architectural design assignment completed in previous semester and to create walk through the same.

Guidelines for Paper Setter

No Exam

Evaluation Methodology

Internal Viva voce is conduction on the portfolio submission at the end of semester with the internal faculty and Head of Department/Principal

Code		Lecture	Studio	int	ex		
					†		
BARCH310-21	Summer Training-	-	-	50	0	s/ns	No Exam
						no credit	

Course Objective: The training is compulsory and is for the orientation of the students of the B. Architecture so that they are aware of/can identify the industrial, departmental, environmental, societal and other issues that are a challenge in the society and develop the ability to find solutions.

UNIT-I: Building Terminology

Assignment on Building Terminology, to be covered as an assignment and submit the report.

UNIT-II: Study of Single Dwelling House

Making Building Layout Plans with measurements of any (Own) Existing House and making Layout of Ground Floor Plan, Layout of First Floor Plan, Kitchen Detail, Toilet Detail. Student can use auto cad or draw manually. Submit the drawing at the end of training.

UNIT-III: Market Survey of Material

Student shall do Market Survey for availability and rates of Construction materials available in the market along with samples. Submit the report at the end of training.

UNIT-IV: Visit to BrickKiln.

Visit to Construction Site, Study and Visit to Brick Kiln and submit the report.

Course Outcomes:

Teaching Methodology

Four (04) weeks Institutional Summer Vacation Training after 2nd semester is a compulsory. The students are required to maintain a daily dairy and submit it along with the "Problem formulation report". Student falling short of 75% attendance criterion is required to repeat the training with next batch. Continuous evaluation to be done and proper record to be maintained.

Guidelines for Paper Setter

Evaluation Methodology

The students need to submit a summary report along with sheets of the institutional training of Module I-II.A detailed report/ scrapbook of inventory and market survey done in Module III. The viva exam for the subject will be conducted along with the practical exams of the End-Semester Examination of Third Semester
