SYLLABUS

FOR

M.Sc. MEDICAL Microbiology (SEMESTER I & II)

(Under Choice based Credit System)

Examinations: 2021 Onwards

Board of Studies of Medical Laboratory Technology & Sciences

I K GUJRAL PUNJAB TECHNICAL UNIVERSITY KAPURTHALA

Note:

(i) Subject to change in the syllabi at any time. Please visit the University website time to time.

I.K. Gujral Punjab Technical University, Kapurthala

IK Gujral Punjab Technical University

VISION

To be an institution of excellence in the domain of higher technical education that serves as the fountainhead for nurturing the future leaders of technology and techno-innovation responsible for the techno-economic, social, cultural and environmental prosperity of the people of the State of Punjab, the Nation and the World.

MISSION

To provide seamless education through the pioneering use of technology, in partnership with industry and society with a view to promote research, discovery and entrepreneurship and To prepare its students to be responsible citizens of the world and the leaders of technology and techno-innovation of the 21st Century by developing in them the desirable knowledge, skill and attitudes base for the world of work and by instilling in them a culture for seamlessness in all facets of life.

OBJECTIVES

- To offer globally-relevant, industry-linked, research-focused, technology- enabled seamless education at the graduate, postgraduate and research levels in various areas of engineering & technology and applied sciences keeping in mind that the manpower so spawned is excellent in quality, is relevant to the global technological needs, is motivated to give its best and is committed to the growth of the Nation;
- To foster the creation of new and relevant technologies and to transfer them to industry for effective utilization;
- To participate in the planning and solving of engineering and managerial problems of
 relevance to global industry and to society at large by conducting basic and applied research
 in the areas of technologies. To develop and conduct continuing education programmes for
 practicing engineers and managers with a view to update their fundamental knowledge base
 and problem-solving capabilities in the various areas of core competence of the University;
- To develop strong collaborative and cooperative links with private and public sector industries and government user departments through various avenues such as undertaking

I.K. Gujral Punjab Technical University, Kapurthala

Page 2 of 17

- of consultancy projects, conducting of collaborative applied research projects, manpower development programmes in cutting-edge areas of technology, etc;
- To develop comprehensive linkages with premier academic and research institutions within the country and abroad for mutual benefit;
- To provide leadership in laboratory planning and in the development of instructional resource material in the conventional as well as in the audio- visual, the video and computer-based modes;
- To develop programmes for faculty growth and development both for its own faculty as well as for the faculty of other engineering and technology institutions;
- To anticipate the global technological needs and to plan and prepare to cater to them;
- To interact and participate with the community/society at large with a view to inculcate in them a feel for scientific and technological thought and endeavour; and
- To actively participate in the technological development of the State of Punjab through the undertaking of community development programmes including training and education programmes catering to the needs of the unorganized sector as well as that of the economically and socially weaker sections of society.

ACADEMIC PHILOSOPHY

The philosophy of the education to be imparted at the University is to awaken the "deepest potential" of its students as holistic human beings by nurturing qualities of self-confidence, courage, integrity, maturity, versatility of mind as well as a capacity to face the challenges of tomorrow so as to enable them to serve humanity and its highest values in the best possible way.

TITLE OF THE PROGRAM: M.Sc. MEDICAL Microbiology

YEAR OF IMPLIMENTATION: New Syllabus will be implemented from October, 2021 onwards.

DURATION: The course shall be two years, with semester system (4 semesters, with two semesters in a year). The Choice based credit system will be applicable to all the semesters.

ELGIBILITY FOR ADMISSION: Candidates with 50% marks (5% relaxation for reserved categories) in Bachelors Degree in Medical/B.Sc. (Hons.) in Microbiology/ B.Sc. MLT are eligible for admission to this course.

INTAKE CAPACITY: 30 (Thirty)

MEDIUM OF INSTRUCTION: English.

SCHEME OF THE PROGRAM: Semester-I

| Course Code | Course Type | Course Title | | Load ocatio | n | Marks Distribution | | Total Marks | Credits |
|-------------|-------------------------------|-------------------------------------|----|----------------|---|--------------------|----------|----------------|---------|
| | | | L* | T* | P | Internal | External | | |
| MMB-101-21 | Core theory | Human Anatomy and Physiology | 3 | 1 | | 30 | 70 | 100 | 4 |
| MMB-102-21 | Core theory | Clinical Microbiology | 3 | 1 | 0 | 30 | 70 | 100 | 4 |
| MMB-103-21 | Core theory | Clinical Biochemistry | 3 | 1 | 0 | 30 | 70 | 100 | 4 |
| MMB-104-21 | Core theory | Immunology | 3 | 1 | 0 | 30 | 70 | 100 | 4 |
| MMB-105-21 | Core Practical/Laboratory | Human Anatomy and Physiology Lab | 0 | 0 | 6 | 25 | 50 | 75 | 3 |
| MMB-106-21 | Core practical/ laboratory | Clinical Microbiology Lab | 0 | 0 | 6 | 25 | 50 | 75 | 3 |
| MMB-107-21 | Core practical/ laboratory | Clinical Biochemistry Lab | 0 | 0 | 6 | 25 | 50 | 75 | 3 |
| MMB-108-21 | Elective practical | Seminar/Presentations | 0 | 0 | 1 | - | - | 25 | 1 |
| | TOTAL | | | | | 195 | 430 | 650 | 26 |

SECOND SEMESTER M.Sc. Medical Microbiology

| | | | Load | Load Allocation | | Marks Distribution | | Tatal | |
|-------------|-------------------------------|----------------------------------|------|-----------------|----|--------------------|----------|----------------|---------|
| Course Code | Course Type | Course Title | L* | T* | Р | Internal | External | Total Marks | Credits |
| MMB-201-21 | Core theory | Systemic bacteriology | 4 | 0 | 0 | 30 | 70 | 100 | 4 |
| MMB-202-21 | Core theory | Hematology | 3 | 1 | 0 | 30 | 70 | 100 | 4 |

| | TOTAL | | 16 | 3 | 12 | 225 | 575 | 900 | 25 |

EXAMINATION AND EVALUATION

| THEO | PRY | | | |
|-------|--|--------------------|----|---|
| S.No. | | Weightage in Marks | | Remarks |
| 1 | Mid-Semester Examination | 20 | 15 | MSTs, Quizzes, assignments, attendance, etc. Constitute internal |
| 2 | Attendance | 5 | 5 | evaluation. Average of two mid- |
| 3 | Assignments | 5 | 5 | semester exams will be considered for evaluation |
| 4 | End-Semester Examination | 70 | 50 | Conduct and checking of the answer sheets will be at the department level in case of university teaching department of Autonomous institutions. For affiliated colleges examination will be conducted at the university level |
| | Total | 100 | 75 | |
| PRAC | TICAL | | | |
| 1 | Daily evaluation of practical performance/ record/ viva voce | 30 | | Internal Evaluation |
| 2 | Attendance | 5 | | |
| 3 | Internal Practical Examination | 15 | | |
| 4 | Final Practical Examination | 25 | | External Evaluation |
| | Total | 75 | | |

PATTERN OF END-SEMESTER EXAMINATION

- I. **Part A** will be One Compulsory question consisting of short answer type questions [Q No. 1(a-j)] covering whole syllabus. There will be no choice in this question. It will be of 20 marks comprising of **10 questions of 2 marks each**.
- II. **Part B** will be comprising of eight questions [2-9]. Student will have to attempt any six questions from this part. It will be of 30 marks with **6 questions of 5 marks each**.
- III. **Part** C will be comprising of two compulsory questions with internal choice in both these questions [10-11]. It will be of 20 marks with **2 questions of 10 marks each**.

SYLLABUS OF THE PROGRAM

The syllabus has been upgraded as per provision of the UGC module and demand of the academic environment. The contents of the syllabus have been duly arranged unit wise and included in such a manner so that due importance is given to requisite intellectual and laboratory skills. The application part of the respective contents has been appropriately emphasized.

| UNIT | CONTENTS | HOURS |
|------|--|-------|
| I | INTODUCTION TO HUMAN ANATOMY AND PHYSIOLOGY | 15 |
| | Structural organisation of human body, homeostasis, directional and regional | |
| | terms of human anatomy and physiology, body planes, cavities and regions. | |
| | DIGESTIVE SYSTEM | |
| | Structure and functions of the organs of digestive system, gastrintestinal | |
| | glands, enzymes of digestive system, mechanism of digestion in | |
| | gastrointestinal/digestive system | |
| | RESPIRATORY SYSTEM | |
| | Structure and functions of respiratory organs, respiratory volumes and | |
| | capacities, mechanism of breathing and exchange of gases | |
| | | |
| II | CARDIOVASCULAR SYSTEM | 12 |
| | Blood composition, structure and function of heart and major blood vessels of | |
| | human body, blood circulation pathway, pulmonary circulation, general and | |
| | systematic circulation, conductive system of heart, cardiac cycle, ECG | |
| | ENDOCRINE SYSTEM | |
| | Location of pituitary gland, thyroid gland, parathyroid gland, adrenal gland, | |
| | hypothalamus, pancreatic iselets, pineal and thymus gland, structure and | |
| | function of all human glands. | |
| III | MUSCULAR SYSTEM | 12 |
| | Structure of different types of muscles in human body, mechanism of muscle | |
| | contraction, neuromuscular transmission | |
| | SKELETAL SYSTEM | |
| | Classification, structure and function of human skeletal system, | |
| | microanatomical and gross structureof a bone, tupes and developments of | |
| | bones, movement and types of bone joints in human body | |
| IV | NERVOUS SYSTEM | 15 |
| | Location of brain and spinal cord, structure and function of brain and spinal | |
| | cord, details of central nervous system, peripheral nervous system and | |
| | autonomous nervous system, structure of neuron, synapse,transmission and | |
| | conduction of nerve impulse | |
| | URINOGENITAL SYSTEM | |
| | Structure and functions of organs of urinary system, structure and function of | |
| | nephron, mechanism of urine formation, micturition, structure and function of | |
| | male and female reproductive system, menstrual cycle, infertility and | |
| | menopause, fertulisation and embryogenesis | |

|------|---|-------|
| I | INTRODUCTION TO BIOMOLECULES | 8 |
| | Introduction to carbohydrates, proteins and lipids and their functions, | |
| | metabolic reactions of carbohydrates, lipids and proteins | |
| | | |
| II | LIVER FUNCTION TESTS | 12 |
| | Introduction and functions of liver, metabolic and excretory functions, | |
| | protection and detoxification, liver profile test: serum bilirubin and VD | |
| | Bergh reaction, serum transaminases, alkaline phosphatase, gamma-glutamyl transferase, principle and clinical importance of liver markers | |
| | KIDNEY FUCTION TESTS | |
| | Introduction and function of kidney, excretory and reabsorptive functions, | |
| | regulatory functions, urine formation, diseases of kidney, kidney profile test: | |
| | blood urea nitrogen, serum creatinine, total protein, albumins, globulins, A/G | |
| | ratio, clearance tests, urine examination | |
| | 1 1 1 1 1 1 1 1 1 1 1 1 1 1 1 1 1 1 1 | |
| III | MALNUTRITIONAL DISORDERS | 12 |
| | Marasmus, kwashiorkor, nutritional deficiency of vitamins & minerals, | |
| | prescribed diet, hyper vitaminosis and hypo vitaminosis | |
| | CANCER | |
| | Etiology of cancer, biochemical changes of cancer, role of oncogenes, | |
| | apoptosis, biochemical basis of metastasis | |
| | | |
| IV | BIOCHEMICAL CHANGES AND DISEASES | 12 |
| | Biochemistry of diabetes mellitus, fatty liver and biochemical changes, | |
| | atherosclerosis and biochemical changes | |
| | INBORN ERRORS BY BIOCHEMICAL METABOLISM | |
| | Inborn errors of carbohydrate metabolism: glycogen storage disease, essential | |
| | pentosuria, fructosuria, galactosemia, inborn errors of protein and amino acid | |
| | metabolism: phenyl ketonuria, alkeptonuria, albinism, cystinuria, | |
| | hypertyrosinemias, homocystinuria, inborn errors of lipid metabolism: | |
| | Gaucher's disease, Fabry's disease, Taysach's disease, Niemann pick disease | |

|----------|
|----------|

Simple staining of bacteria

• To prepare bacterial smear and perform simple staining using methylene blue

Gram staining

• To perform Gram staining of different bacterial cultures

Special stain

• To perform endospore staining, acid-fast staining and Albert's staining of bacterial cultures

Counting of bacterial cell

• To perform viable count of bacteria using pour plating technique

Effect of nutritional factors on growth

• To study the effect of different carbon & nitrogen sources on the growth of microorganisms

Effect of environmental factors on growth

- To study the effect of pH on the growth of microorganisms
- To study the effects of UV radiation on growth of microorganisms

Bacteriological examination of water & milk

- To perform the bacteriological examination of water and milk
- To perform the bacteriological examination of milk by methylene reductase test

Microbes in hospital environment

• To isolate and identify the bacteria and fungi from hospital environment

CONTENTS

Qualitative analysis of biomolecules

- Qualitative test for carbohydrates: Molisch Test, Benedict test
- Qualitative test for amino acid and protein: Biuret test, Ninhydrin test
- Qualitative test for lipid: Acrolein test

Quantitative analysis of blood parameters 1

- Quantitative estimation of blood cholesterol
- Quantitative estimation of blood glucose
- Quantitative estimation of blood urea

Quantitative analysis of blood parameters 2

- Quantitative estimation of creatinine
- Quantitative estimation of protein albumin
- Quantitative estimation of uric acid

Quantitative analysis of liver enzymatic markers

- Quantitative estimation of SGPT
- Quantitative estimation of ALP

Quantitative analysis of heart enzymatic marker

• Quantitative estimation of SGOT a cardiac marker

Quantitative analysis of prostate gland enzymatic marker

Quantitative estimation of ACP

| Subject Title | Systemic Bacteriology |
| Objective | To teach basic concepts of Systemic Bacteriology |

| UNIT | CONTENTS | HOURS |
|------|--|-------|
| I | Epidemiology and control of community infections: | 10 |
| | Study of normal flora of human body, control and prevention of | |
| | community, Epidemiological markers, different carries and sources of | |
| | infection. | |
| | Gram positive cocci and bacilli: | |
| | A detailed account of morphological characteristics, pathogenicity, clinical | |
| | manifestations and laboratory diagnosis of Staphylococcus, Streptococcus, | |
| ** | Pneumococcus, Corynebacterium, Bacillus and Clostridium. | |
| II | Acid fast bacteria and Gram-negative cocci: | 8 |
| | A detailed account of cultural and morphological characteristics, | |
| | pathogenicity, clinical manifestations and laboratory diagnosis of | |
| | Mycobacterium tuberculosis and Mycobacterium leprae, Neisseria | |
| | Gram negative bacilli: | |
| | A detailed account of cultural and Morphological characteristics, | |
| | pathogenicity, clinical manifestations and laboratory diagnosis of | |
| | Pseudomonas aeruginosa and Vibrio, Hemophilus influenzae and | |
| | Campylobacter jejune, Bordetella pertussis and Yersinia pestis, Bacteroides and Helicobacter pylori | |
| | bacteroldes and Hencobacter pylori | |
| III | Enterobacteriaceae: | 10 |
| | A detailed account of cultural and Morphological characteristics, | |
| | pathogenicity, clinical manifestations and laboratory diagnosis of | |
| | Enterobacteriaceae family like E. coli, Klebsiella, Shigella, Salmonella, | |
| | Proteus, Acinetobacter, Hafnia, Enterobacter, Serratia marcescens and | |
| | Citrobacter | |
| | | |
| IV | Miscellaneous bacteria: | 8 |
| | A detailed account of cultural and morphological characteristics, | |
| | pathogenicity, clinical manifestations and laboratory diagnosis of | |
| | Actinomycetes (Actinomyces and Nocardia) and Spirochaetes | |
| | (Treponema, Borrelia, Leptospira), Brucellae, Listeria, Monocytogenes, | |
| | Mycoplasma, Rickettsia, | |
| | Ehrlichia, Chlamydiae, Moraxella catarrhalis | |

| Course Name | M.Sc. Medical Microbiology |
| Subject Code | MMB 202-21 |
| Subject Title | Hematology |
| Objective | To teach basic concepts of Hematology |

| UNIT | CONTENTS | HOURS |
|------|---|-------|
| I | Introduction to hematology and anticoagulants: Introduction to hematology, naturally occurring anticoagulants, commonly used anticoagulants EDTA, citrates, oxalates, heparin anticoagulants and their mode of action. Blood and its composition: Plasma and cellular composition of blood, formation of blood - erythropoiesis, leucopoiesis, thrombopoiesis, morphology of normal blood | |
| II | Routine hematological tests: Methods, principle, procedure, normal values and clinical significance of hemoglobin, total leucocyte count, red blood cell count, differential leucocyte count, erythrocyte sedimentation rate, packed cell volume, red cell indices Cytochemical stains: introduction, myeloperoxidase, periodic acid Schiff's, Sudan black, specific and non-specific esterase stains, and stain | 10 |
| III | for neutrophil alkaline phosphatase activity. Hematology Laboratory Automation: introduction, types, principle, working and maintenance of cell counters, hemoglobin analyzer, hematocrit analyzer, reticulocyte and platelets analyzer, automated digital analysis of cells, coagulometer, and ESR analyzer | 6 |
| IV | Disorders of red blood cells: introduction to anemia, classification – morphological and etiological classification of red blood cells, clinical features, pathophysiology, laboratory investigations of, iron deficiency anemia, megaloblastic anemia, hemolytic anemia. Brief introduction to thalassemia's. Disorders of white blood cells: Introduction, classification - French American and British- FAB classification, pathophysiology, clinical features, Lab investigations, leukemoid reaction Hemorrhagic disorders: Hemostasis mechanism, pathogenesis, clinical feature, classification of, vascular disorders, platelet disorders, coagulation disorders | 10 |

Course Contents

| UNIT | CONTENTS | HOURS |
|------|--|-------|
| I | Centrifugation techniques: Theory and principle of centrifugation, centrifuges and their uses, preparative and analytical centrifugation, rotors types and safety aspects of centrifugation. Electrophoretic techniques: Theory and application of electrophoresis, polyacrylamide gel electrophoresis, isoelectric focusing, capillary electrophoresis, 2D gel electrophoresis. | 12 |
| П | Spectrophotometric techniques: Electromagnetic radiations, theory and applications of UV-vis, infrared, fluorescence and atomic absorption spectrophotometry. Spectroscopy techniques: Electro spin resonance (ESR), Nuclear Magnetic resonance (NMR) spectroscopy, mass spectroscopy (MS). Microscopy: Theory and principles of microscopy, light, dark field, fluorescent, UV microscopy, TEM, SEM, confocal microscopy, flow cytometry, phase contract microscopy | 12 |
| III | Chromatography: Separation of biomolecules: chromatographic Techniques: principles and applications of column, thin-layer, paper chromatography, ion-exchange and affinity chromatography, high performance liquid chromatography (HPLC), and gas chromatography (GC). | 8 |
| IV | Radioisotope techniques: Radioactivity and radioisotopes, detection and measurement of radioactivity and Cerenkov counting, applications in biological sciences - analytical, diagnostics and metabolic studies, safety aspects of radioactive handling. | 8 |

| Subject Code | MMB 204-21 | | |
| Subject Title | ubject Title Elements of Molecular Biology | | |
| Objective | | | |

| UNIT | CONTENTS | HOURS |
|------|--|-------|
| I | Molecular basis of heredity: central dogma, structure of DNA & RNA, denaturation and renaturation of DNA, genetic code, Wobble hypothesis DNA replication: components, mechanism, unidirectional and Bidirectional replication, rolling circle mechanism of replication | 10 |
| | DNA damage and repair: types of DNA damages (alkylation, De-amination, pyrimidine dimmers), repair mechanisms (light dependent repair, methyl-directed mismatch repair, nucleotide excision repair, post-replication repair, SOS repair) | |
| II | Genetic variability: mutations- types of mutations (spontaneous, induced, forward, backward, suppressor, point and frame shift), chemical mutagens- base analogues, nitrous acid, acridines, alkylating and hydroxylating agents, biochemical basis of mutations & genetic mechanism of drug resistance Genetic recombination in bacteria: types of plasmids- F-plasmid, R plasmid, colplasmid, Ti-plasmid, transformation, conjugation, Transduction | 10 |
| Ш | Transcription: prokaryotic transcription, transcription cycle (initiation, elongation and termination), bacterial promoters and regulating factors, rho dependent and rho independent terminations, eukaryotic transcription- RNA polymerases, transcription factors, processing of mRNA in eukaryotes. Differences between Eukaryotic from prokaryotic transcription. | 6 |
| IV | Translation: initiation of translation, elongation and termination of translation (both prokaryotic and eukaryotic) Regulation of gene expression: operon concept, lac operon- positive control and negative control, trp operon- repressible regulation and attenuator regulation | 10 |

| Subject Code | MMB 206-21 | | | | |
| Subject Title | Systemic Bacteriology Lab | | | | |
| Objective | To learn the basic skills and practical knowledge of Systemic Bacteriology | | | | |

Details of the Course

CONTENTS

1. Skin/pus /wound pathogens:

• Isolation and identification of microbes from skin/pus/wound

2. Blood pathogens:

• Isolation and identification of microorganisms from blood sample

3. Pathogens in urine:

• Isolation and identification of microorganisms from urine sample

4. Upper respiratory tract:

• Isolation and identification of microorganisms from throat

5. Lower respiratory tract:

• Isolation and identification of microorganisms from sputum sample.

6. Air-borne pathogens:

• Bacteriological examination of pathogens present in air

7. Antimicrobial susceptibility testing :

• Antimicrobial susceptibility testing by Kirby Bauer disc diffusion method

8. Determination of MIC and MBC :

• Determination of Minimum Inhibitory Concentration(MIC) and Minimum Bactericidal Concentration (MBC).

9. Microbial flora of the mouth :

• To isolate and identify microbial flora of mouth teeth crevices, Determination of dental caries susceptibility

I.K. Gujral Punjab Technical University, Kapurthala

| Objective | To learn the basic skills and practical knowledge of Medical Bio techniques | | | | |

Details of the Course

| | NT | ΓF | NT | ГC |
|--|----|------------|----|----|
| | | | | |

1. Spectrophotometry:

• Demonstration of Beer-Lambert's law using UV-vis spectrophotometer

2. Microscopy:

• To demonstrate the principles of bright field microscopy using a bacterial culture.

3. Chromatography techniques:

- To separate different chlorophyll pigments using paper chromatography,
- To analyze a given sample for various amino acids using thin layer chromatography (TLC),
- To analyze a microbial extract for the presence of high value compounds using column chromatography.

4. Electrophoretic techniques:

• Separation of various proteins from a given microbial extract using Poly acrylamide gel electrophoresis (PAGE).

5. Molecular biology techniques:

- To perform isolation of plasmid DNA from a given E. coli strain,
- Quantification of the isolated DNA.
- To determine the molecular weight of a given DNA sample using agarose gel electrophoresis

| Objective | To learn the basic skills and practical knowledge of Hematology | | | | |

Details of the Course

| COI | NTI | CNI | Т |
|-----|-------|------|----|
| | N I I | T.IN | н. |

1. Hemoglobin estimation.

• Estimation of Hb by Sahli's method and cyanmethahaemoglobin method.

2. Total leucocyte count

• Estimation of total leukocytes count.

3. Differential leucocyte count

Preparation blood smear, staining and differential leukocytes count.

4. Platelet count

Determination of platelets count.

5. Red cell count

Determination of red cell count.

6. Reticulocyte count and RCI.

Determination of rectics count and red cell indices.

7. Absolute Eosinophil count

Determination of absolute eosinophil count.

8. Plasma hemoglobin

• Estimation of plasma hemoglobin.

9. Coagulation disorders test

Estimation of PT & PTTK.

10. Myeloperoxidase stain

To prepare and perform the myelo-peroxidase stain

11. PAS stain

• To prepare and perform the PAS stain

12. Erythrocyte sedimentation rate

• To perform ESR by Wintrobe's and Westergren's method.

13. Packed cell volume

To perform packed cell volume

14. Hemolytic anemia

• To perform red cell osmotic fragility test

| Objective | To teach basic concepts of Virology and Mycology | | | | |
| Examination | 3 Hours | | | | |
| Hours | | | | | |
| (Duration) | | | | | |

| UNIT | CONTENTS | HOURS |
|------|---|-------|
| I | General Properties of Viruses: Origin of virology, properties of | 10 |
| | viruses, classification and nomenclature of viruses, structure of viruses, | |
| | capsid symmetry and architecture | |
| | Cultivation and Purification of Viruses : Cultivation, isolation, | |
| | purification and virus assays, virus receptors, interaction with host cell, | |
| | attachment and penetration, uncoating and replication, lysogenic and | |
| | lytic bacteriophages, lysogeny with special reference to lambda and mu | |
| | phages. | |
| II | DNA & RNA viruses : Transmission of viruses, epidemiology of viral | 8 |
| | infection, prevention and control measures of viral infection, molecular | |
| | techniques for clinical diagnosis of viral diseases | |
| | Pathogenicity, medical features, laboratory diagnosis, | |
| | immunoprophylaxis and prophylaxis : Dengue, Japanese encephalitis, | |
| | Yellow fever, Kyasanur forest disease, Polio, Influenza virus, Rubella | |
| | virus, Hepatitis, HIV, Smallpox, Rabies, Rotavirus and Oncovirus | |
| III | Introduction to medical mycology : Introduction and classification of | 10 |
| | fungi, media used for culturing fungi, chemotherapeutic agents for fungi, | |
| | mechanism of resistance of chemotherapeutic agents | |
| | Pathogenicity, clinical features and laboratory diagnosis of | |
| | superficial and subcutaneous mycosis: Dermatophytoses, Piedra, | |
| | Tinea nigra, Tinea versicolor, chromoblastomycosis, mycetoma, | |
| | sporotrichosis and rhinosporidiosis. | |
| IV | Pathogenicity, medical features and laboratory diagnosis of | 8 |
| | systemic and opportunistic mycosis : | |
| | Paracoccidioidomycosis, coccidiodomycosis, histoplasmosis, | |
| | blastomycosis, cryptococcosis candidiasis, aspergillosis, penicillosis | |
| | Molecular techniques : Recent molecular techniques used for the | |
| | diagnosis of fungal infection | |

| Subject Title | Biostatistics | | |
| Objective | To teach basic concepts of Biostatistics | | |

| UNIT | CONTENTS | HOURS |
|------|--|-------|
| I | Introduction to biostatistics and descriptive statistics: | 8 |
| | Introduction, biological variations and | |
| | uncertainties, role of statistics, Variables, variations and | |
| | distributions | |
| II | Correlation and Regression : Association between variables, | 8 |
| | positive and negative correlation, linear and non-linear correlation, | |
| | Linear and non-linear regression, regression analysis. | |
| III | Testing of hypothesis : Student's t-test, chi-square test, F-test and | 10 |
| | Fisher's z- test, one way ANOVA, two way ANOVA | |
| | Elements of probability: Introduction, independent and non- | |
| | independent event, law of additivity, multiplication law of | |
| | probability, | |
| | inverse probability, elementary law of probability | |
| IV | Introduction to research methods : Meaning, objective, types and | 10 |
| | significance of research methods, research designs, research process | |
| | and problem | |
| | Interpretation and report writing: Meaning, techniques, | |
| | precaution | |
| | and significance of report writing, different steps in writing report, | |
| | mechanism and precaution of writing a research report | |

| Subject Title Histopathology and Cytology | | | |
| Objective | To teach basic concepts of Histopathology and Cytology | | |

| UNIT | CONTENTS | HOURS |
|------|--|-------|
| I | Introduction and lab organization : Histopathology lab | 12 |
| | organization, maintenance of important equipments used in lab | |
| | Histological specimens : Types, transportation, preservation, | |
| | labeling & fixation, types of fixatives, simple fixatives, compound | |
| | fixatives, fixatives for special component of tissue | |
| | Hormonal assessment: Introduction, menstrual cycle, and | |
| | hormonal assessment on PAP smear | |
| II | Tissue processing : Tissue processing, dehydration and dehydrating | 12 |
| | media, clearing and clearing agents, embedding and embedding | |
| | agents, | |
| | different types of embedding methods, alternative tissue processing | |
| | method, automated tissue processor, microwave tissue processor, | |
| | open and closed tissue processor, paraffin embedding station and | |
| | cryostat, Microtomy, haematoxylin and eosin stain | |
| | Electron microscopy and allied techniques : Preparation of | |
| | specimen, fixation, tissue processing schedule, ultramicrotomy and | |
| | knives used for cutting, staining of sections for electron microscopy., | |
| | frozen section of muscle biopsy. | |
| III | Cytological Staining: History and types of sample submitted for | 8 |
| | cytology, collection of various types of samples for cytology, their | |
| | fixation, cytological preparation with special emphasis on MGG, PAP | |
| | stain, cytological fixatives, cytological screening and quality control | |
| | in | |
| | cytology lab., thinprep 2000, automated slide strainer, automatic coversliper and PAPNET | |
| | Immunohistochemistry: Immunofluorescence, preparation of | |
| | material, staining, tests for specificity and applications, types of | |
| | method, blocking of non specific reactive sites, controls, procedure | |
| | and | |
| | application, automated slide strainers for IHC | |
| IV | Detection and identification of bacteria, virus, protozoa and | 8 |
| | fungi : | |
| | Gram stain and modified methods, Ziehl Neelsen stain for | |
| | mycobacterium tuberculosis, fluorescence method for Mycobaterium | |
| | tuberculosis, methods for Mycobacterium leprae, cresyl violet | |
| | acetate | |

and Gimenez method for Helicobacter pylori, Warthin Starry method for spirochetes, Grocott methenamine silver method, McManus PAS method for fungi, demonstration of rickettsia, detection and identification of viruses, demonstration of protozoa and other organisms.

Enzymes: Fixation, types of enzymes and types of histochemical reactions, methods for specific phosphatases, methods for specific and

non-specific esterases, and oxidative enzymes., methods for demonstration of hydrolytic enzymes, specific phosphatases, specific and non-specific esterases

| UNIT | CONTENTS | HOURS |
|------|--|-------|
| I | Sources of information : using and comprehending primary, | 8 |
| | secondary, tertiary, gray source, citing source, using different | |
| | editorial | |
| | styles | |
| | Manuscript writing : Different types of writing – descriptive, | |
| | comparative, argumentative, covering the role of different editorial | |
| | styles -American medical association (AMA), modern language | |
| | association (MLA) and American psychological association (APA). | |
| II | Professional writing : reviews, critical appraisals of topics, case | 10 |
| | reports, commentaries and opinion piece, overview of life/health | |
| | insurance underwriting. | |
| | Medical transcript writing : learning key medical and statistical | |
| | terms, grammar essentials for medical writers, assistance of | |
| | computer | |
| | programmes and websites, basic writing skills, future of medical | |
| | writing. | |
| III | Issues in scientific writing : quoting (when to quote, integrating | 8 |
| | quotations, accurate quoting, punctuating quotations), plagiarism | |
| | (introduction, how to avoid and implications), critical analysis | |
| IV | Preparation of manuscript : writing scientific paper and format of | 8 |
| | an original manuscript, publication process covered by specific | |
| | journal, | |
| | different types of journal metrics, authorship, ghostwriting | |
| | Introduction to Intellectual Property: Historical perspectives and need | |
| | for for the introduction of Intellectual property right, Types of IP; | |
| | Patents, Trademarks, copyright & related Rights, Industrial Design, | |
| | Traditional Knowledge, Geographical Indications, Protection of GMOs IP | |
| | as a factor in R&D, Protection of Plant varieties. | |

| Objective | To teach basic concepts of Applied Medical Microbiology and Quality | | |
| | Assuarance | | |

| UNIT | CONTENTS | HOURS |
|------|--|-------|
| I | Recombinant DNA technology: Integration of DNA insert into the vector, introduction of recombinant DNA into a suitable host, integration of DNA inserts through site specific recombination, selection of the desired recombinant clones, selection of clones containing recombinant DNA, selection of the clone containing a Specific DNA inserts. Expression of recombinant proteins: Production of recombinant proteins in E.coli, transcriptional, translational fusions, runaway plasmid, production of recombinant proteins in other organisms, | 10 |
| П | Gene Cloning: Steps in gene cloning, restriction endonucleases, recognition sequences, modification of cut ends, other enzymes used in cloning, properties of good vectors, E.coli vectors, bacteriophage vectors, cosmid vectors, phagemid vectors, phasmid vectors, artificial chromosome vectors, cloning and expression vectors, shuttle vectors, yeast vectors, complementary DNA library, isolation of desired gene, identification of desired clone, problems in cDNA preparation, genomic library. | 10 |
| III | Molecular Techniques: Chemical Synthesis of Gene, gene amplification through PCR, variations of PCR, applications, limitations and advantages of PCR, RFLP, RAPD and AFLP Automation: BACTEC, Vitek 2, Microscan walkaway, Phoenix, Sensititre Aris 2X, use of MALDI-TOF for microbial identification (Vitek MS). | 8 |
| IV | Quality Control and assuarance: Introduction, quality assurance, specimen collection, preservation and transport, levy-jennings chart, internal and external quality control, Clinical Establishment Act Standard for Medical (Clinical) Laboratory, in vitro diagnostic (IVD) regulation, professionalism, ethical responsibility and code of conduct. | 8 |

Biosafety: Introduction, Historical Background; Introduction to Biosafety cabinets; Primary contaminant for biohazards, Biosafety levels of specific microorganisms,; Recommended biosafety levels for infectious agents, Biosafety committee composition and role of biosafety committee.

|----------|

Serodiagnosis

- To perform serodiagnosis of HIV infection by tridot kit
- To perform serodiagnosis of hepatitis B infection by cassette method
- To perform serodiagnosis of hepatitis C infection by cassette method
- To perform serodiagnosis of hepatitis A infection by cassette method
- To perform serodiagnosis of hepatitis E infection by cassette method

Staining

- To perform staining of fungi by lactophenol cotton blue
- To perform staining of fungi with 10% and 40% KOH

Identification of Fungi

- To isolate and identify the fungi from soil sample
- To isolate and identify the fungi from nail sample
- To isolate and identify the fungi from skin sample
- To isolate and identify the fungi from hair sample
- To isolate and identify Candida sp. and perform germ tube test

Slide Culture technique

• To perform slide culture technique for studying morphology of mould

| I.K. GUJRAL PUNJAB TECHNICAL UNIVERSITY | | |
|---|---|--|
| Course Name | M.Sc. Medical Microbiology | |
| Subject Code | MMB 307-21 | |
| Subject Title | Histopathology and Cytology Laboratory | |
| Objective | To learn the basic skills and practical knowledge of Histopathology | |
| | and Cytology Laboratory | |

Details of the Course

Alternative processing

| CONTENTS | | |
|---|--|--|
| Histology specimen | | |
| • To receive/gross the histological specimen. | | |
| Tissue processing | | |
| To process the tissue for embedding. | | |
| Section cutting | | |
| • To perform the tissue cutting. | | |

• To process a tissue using chloroform and acetone

Routine stain

• To perform haematoxylin and eosin stain.

PAP stain

• To prepare and stain the buccal smear using PAP stain.

Cytological stain

• To perform MGG stain.

Bacterial stain

• To perform Gram's stain on tissue.

Acid fast stain

• To perform Z-N stain on tissue.

Metal impregnation

• To perform Grocott's methenamine silver method

PAS stain

- To prepare the reagents and perform the periodic acid schiff's stain on paraffin section
- Congo red stain
