

FACULTY OF CHEMICAL SCIENCES

SYLLABUS

FOR

B.Sc. in Optometry

(SEMESTER – I & II)

(Under Choice based Credit System)

Examinations: 2021 Onwards

**I K GUJRAL PUNJAB TECHNICAL UNIVERSITY
KAPURTHALA**

Note:

(i) Subject to change in the syllabi at any time. Please visit the University website time to time.

IK Gujral Punjab Technical University

VISION

To be an institution of excellence in the domain of higher technical education that serves as the fountainhead for nurturing the future leaders of technology and techno-innovation responsible for the techno-economic, social, cultural and environmental prosperity of the people of the State of Punjab, the Nation and the World.

MISSION

To provide seamless education through the pioneering use of technology, in partnership with industry and society with a view to promote research, discovery and entrepreneurship and To prepare its students to be responsible citizens of the world and the leaders of technology and techno-innovation of the 21st Century by developing in them the desirable knowledge, skill and attitudes base for the world of work and by instilling in them a culture for seamlessness in all facets of life.

OBJECTIVES

To offer globally-relevant, industry-linked, research-focused, technology-enabled seamless education at the graduate, postgraduate and research levels in various areas of engineering & technology and applied sciences keeping in mind that the manpower so spawned is excellent in quality, is relevant to the global technological needs, is motivated to give its best and is committed to the growth of the Nation;

To foster the creation of new and relevant technologies and to transfer them to industry for effective utilization;

To participate in the planning and solving of engineering and managerial problems of relevance to global industry and to society at large by conducting basic and applied research in the areas of technologies. To develop and conduct continuing education programmes for practicing engineers and managers with a view to update their fundamental knowledge base and problem-solving capabilities in the various areas of core competence of the University;

To develop strong collaborative and cooperative links with private and public sector industries and government user departments through various avenues such as undertaking

of consultancy projects, conducting of collaborative applied research projects, manpower development programmes in cutting-edge areas of technology, etc;

To develop comprehensive linkages with premier academic and research institutions within the country and abroad for mutual benefit;

To provide leadership in laboratory planning and in the development of instructional resource material in the conventional as well as in the audio-visual, the video and computer-based modes;

To develop programmes for faculty growth and development both for its own faculty as well as for the faculty of other engineering and technology institutions;

To anticipate the global technological needs and to plan and prepare to cater to them;

To interact and participate with the community/society at large with a view to inculcate in them a feel for scientific and technological thought and endeavour; and

To actively participate in the technological development of the State of Punjab through the undertaking of community development programmes including training and education programmes catering to the needs of the unorganized sector as well as that of the economically and socially weaker sections of society.

ACADEMIC PHILOSOPHY

The philosophy of the education to be imparted at the University is to awaken the “**deepest potential**” of its students as holistic human beings by nurturing qualities of self-confidence, courage, integrity, maturity, versatility of mind as well as a capacity to face the challenges of tomorrow so as to enable them to serve humanity and its highest values in the best possible way.

TITLE OF THE PROGRAM: B.Sc. OPTOMETRY

YEAR OF IMPLEMENTATION: New Syllabus will be implemented from June 2021 onwards.

DURATION: The course shall be three years, with semester system (6 semesters, with two semesters in a year). The Choice based credit system will be applicable to all the semesters.

ELGIBILITY FOR ADMISSION: Candidates with 50% marks (5% relaxation for SC/ST) in aggregate in 10+2 with Medical (Physics, Chemistry & Biology)/ Diploma in Optometry with minimum aggregate of 50% marks.

INTAKE CAPACITY: 30 (Thirty)

MEDIUM OF INSTRUCTION: English.

SCHEME OF THE PROGRAM:

Semester-I

| Sr. No. | Course Code | Course Type | Course Title | L-T-P* | Credits | Marks Distribution | | Marks |
|---------|-------------|--|--|---------|---------|--------------------|----------|-------|
| | | | | | | Internal | External | |
| 1. | BOPT 101-21 | Core Theory | Basics of Anatomy-I | 3-1-0 | 4 | 40 | 60 | 100 |
| 2. | BOPT 102-21 | Core Theory | Basics of Physiology-I | 3-1-0 | 4 | 40 | 60 | 100 |
| 3. | BOPT 103-21 | Core Theory | Basics of Biochemistry-I | 3-1-0 | 4 | 40 | 60 | 100 |
| 4. | BOPT 104-21 | Core Practical/Lab | Basics of Anatomy-I Practical | 0-0-4 | 2 | 60 | 40 | 100 |
| 5. | BOPT 105-21 | Core Practical/Lab | Basics of Physiology-I Practical | 0-0-4 | 2 | 60 | 40 | 100 |
| 6. | BOPT 106-21 | Core Practical/Lab | Basics of Biochemistry-I Practical | 0-0-4 | 2 | 60 | 40 | 100 |
| 7. | BTHU 101-18 | Ability Enhancement Compulsory Course (AECC)-I | English | 1-0-0 | 1 | 40 | 60 | 100 |
| 8. | BTHU 102-18 | Ability Enhancement Compulsory Course-(AECC) | English Practical/Laboratory | 0-0-2 | 1 | 30 | 20 | 50 |
| 9. | HVPE-101-18 | Ability Enhancement Compulsory Course-(AECC) | Human Values, De-addiction & Traffic Rules | 3-0-0 | 3 | 40 | 60 | 100 |
| 10. | HVPE-102-18 | Ability Enhancement Compulsory Course-(AECC) | Human Values, De-addiction & Traffic Rules (Lab/Seminar) | 0-0-1 | 1 | 25 | --** | 25 |
| 11. | BMPD 102-18 | | Mentoring & Professional Development | 0-0-1 | 1 | 25 | --** | 25 |
| | | Total | | 13-3-16 | 25 | 460 | 440 | 900 |

Semester-II

| Sr. No. | Course Code | Course Type | Course Title | L-T-P* | Credits | Marks Distribution | | Marks |
|---------|-------------|--|--------------------------------------|---------|---------|--------------------|----------|-------|
| | | | | | | Internal | External | |
| 1. | BOPT 201-21 | Core Theory | Basics of Anatomy-II | 3-1-0 | 4 | 40 | 60 | 100 |
| 2. | BOPT 202-21 | Core Theory | Basics of Physiology-II | 3-1-0 | 4 | 40 | 60 | 100 |
| 3. | BOPT 203-21 | Core Theory | Basics of Biochemistry-II | 3-1-0 | 4 | 40 | 60 | 100 |
| 4. | BOPT 204-21 | Core Practical/Lab | Basics of Anatomy-II Practical | 0-0-4 | 2 | 60 | 40 | 100 |
| 5. | BOPT 105-21 | Core Practical/Lab | Basics of Physiology-II Practical | 0-0-4 | 2 | 60 | 40 | 100 |
| 6. | BOPT 206-21 | Core Practical/Lab | Basics of Biochemistry-II Practical | 0-0-4 | 2 | 60 | 40 | 100 |
| 7. | EVS 102-18 | Ability Enhancement Compulsory Course (AECC) | Environmental Studies | 2-0-0 | 2 | 40 | 60 | 100 |
| 8. | BMPD 102-18 | | Mentoring & Professional Development | 0-0-1 | 1 | 25 | --** | 25 |
| | | Total | | 11-3-13 | 21 | 365 | 360 | 725 |

*A course can either have four Hrs Lecture or Three Hrs Lecture + One Hrs Tutorial as per requirement

**The Human Values, De-addiction and Traffic Rules (Lab/ Seminar) and Mentoring and Professional Development course will have internal evaluation only.

EXAMINATION AND EVALUATION

| THEORY | | | | | |
|-----------|---------------------|--|--------------------|-----------|---|
| S.No. | | | Weightage in Marks | | Remarks |
| 1 | Internal Evaluation | Mid-Semester Examination | 30 | 10 | MSTs, Quizzes, assignments, attendance, etc. Constitute internal evaluation. Best of two mid-semester exams will be considered for evaluation |
| 2 | | Attendance | 5 | 5 | |
| 3 | | Assignments | 5 | 5 | |
| 4 | External Evaluation | End-Semester Examination | 60 | 30 | Conduct and checking of the answer sheets will be at the university level. |
| | Total | | 100 | 50 | |
| PRACTICAL | | | | | |
| 1 | Internal Evaluation | Daily evaluation of practical performance/ record/ viva voce | 15 | | |
| 2 | | Attendance | 5 | | |
| 3 | | Internal Practical Examination | 10 | | |
| 4 | External Evaluation | Final Practical Examination | 20 | | |
| | Total | | 50 | | |

PATTERN OF END-SEMESTER EXAMINATION

- I. **Part A** will be One Compulsory question consisting of short answer type questions [Q No. 1(a-h)] covering whole syllabus. There will be no choice in this question. It will be of 16 marks comprising of **8 questions of 2 marks each**.
- II. **Part B** will be comprising of eight questions [2-9]. Student will have to attempt any six questions from this part. It will be of 24 marks with **6 questions of 4 marks each**.
- III. **Part C** will be comprising of two compulsory questions with internal choice in both these questions [10-11]. It will be of 20 marks with **2 questions of 10 marks each**.

SYLLABUS OF THE PROGRAM

The syllabus has been upgraded as per provision of the UGC module and demand of the academic environment. The contents of the syllabus have been duly arranged unit wise and included in such a manner so that due importance is given to requisite intellectual and laboratory skills. The application part of the respective contents has been appropriately emphasized.

SEMESTER-I

| I.K. GUJRAL PUNJAB TECHNICAL UNIVERSITY | | | | |
|--|--|------------|------------|------------------|
| Course Name | B.Sc. in Optometry | | | |
| Subject Code: | BOPT 101-21 | | | |
| Subject Title: | Basics of Anatomy-I | | | |
| Contact Hours: | L:3 | T:1 | P:0 | Credits:4 |
| Examination Duration (hours) | 3 | | | |
| Objective(s): | To teach the fundamental concepts of Human Anatomy | | | |

Details of the Course (Human Anatomy)

| Unit | Contents | Contact Hours |
|-------------|--|----------------------|
| I | Introduction: Definition of anatomy and its divisions, Terms of location, positions and planes. Embryology of Eye. General Anatomy of Eye: Eye Orbit, Sclera, Cornea, Choroid, Ciliary Body, Iris & Retina. Refractory media: Aqueous Humor, Anterior Chamber, Posterior Chamber, Lens, Vitreous Body, Eyelids, Conjunctiva. | 12 |
| II | Cardiovascular System: Arteries & veins, Capillaries & arterioles, Heart-size, location, chambers, blood supply of heart, pericardium, Systemic & pulmonary circulation, Major blood vessels of Heart- Aorta, pulmonary artery, common carotid artery, subclavian artery, axillary artery, brachial artery, common iliac artery, femoral artery, Inferior vena cava, portal circulation, great saphenous vein. | 12 |
| III | Central Nervous System: Brain, regions of brain, Cerebrum, Cerebellum, Brainstem, Cerebral Cortex and Diencephalon. Brain ventricles, Cranial Nerves. Types of Nerve Cells, Nerve Impulse: Conduction & Transmission. | 12 |
| IV | Musculoskeletal system: Structure of Bone & its types, Joints-Classification of joints with examples; details of synovial joint, Bones & joints of upper limb, lower limb and their movements, Axial skeleton & appendicular skeleton, Skull, spine & its movements, intervertebral disc, Muscles & its types, Muscles of the upper limb, lower limb, trunk and neck. | 10 |

| Subject Code: | BOPT 102-21 | | | |
| Subject Title: | Basics of Physiology-I | | | |
| Contact Hours: | L:3 | T:1 | P:0 | Credits:4 |
| Examination Duration (hours) | 3 | | | |
| Objective(s): | To teach the fundamental concepts of Human Physiology | | | |

Details of the Course (Human Physiology)

| Unit | Contents | Contact Hours |
|-------------|---|----------------------|
| I | Gastrointestinal System: Physiological Anatomy, functions of GIT, Salivary Gland-functions of saliva, Stomach- structure and functions, Gastric secretions-composition, functions, Mechanism, Pancreas-structure, functions, composition of Pancreatic juice, Liver-Functions of liver, Bile-Composition, functions, Jaundice-Types and its causes, Gall Bladder- Functions, Intestine- Movements of small and large intestine, Digestion and Absorption of Carbohydrates, Proteins, Fats, Hormones of GIT- Functions of Gastrin, Secretin, CCK-PZ. | 12 |
| II | Respiratory System: Physiological Anatomy, Functions of the respiratory system, Types of respiration, respiratory membrane, Lung volumes and capacities, vital capacity and factors affecting it, Transport of Oxygen-Forms of transportation, Oxy-hemoglobin dissociation curve and factors affecting it, Transport of Carbon-Dioxide- Forms of transportation, Hypoxia-Definition, types, effects of hypoxia, Cyanosis-Definition and types, Artificial Respiration- CPR | 12 |
| III | Cardiovascular System: Heart-Physiological Anatomy, Nerve supply, Properties of cardiac muscle, Cardiac Cycle-Events –systole, diastole, Cardiac Output-Definition and factors affecting it, Heart sounds-normal heart sounds, its causes, areas of auscultations, Blood Pressure-Definition, normal value, Physiological variations, its measurement, ECG- normal waves, Shock-Definition, Types. | 10 |
| IV | Blood: Red Blood Cells- Functions, count, Physiological variations. Erythropoiesis-stages, Hemoglobin-Functions, Physiological variations, White Blood cells-Functions, count, morphology, Platelets-count, morphology, functions. Hemostasis-Definition, Mechanism, clotting factors, Blood groups-ABO system, Rh system, Blood transfusion-Indication, transfusion reactions, Anaemias-classification, morphological and Etiological, effects of anaemia on body. | 10 |

| Contact Hours: | L:3 | T:1 | P:0 | Credits:4 |
| Examination Duration (hours) | 3 | | | |
| Objective(s): | To teach the fundamental concepts of cell biology & biochemistry. | | | |

| Unit | Contents | Contact Hours |
|-------------|--|----------------------|
| I | <p>Cell: Morphology, structure & functions of cell, cell membrane, Nucleus, chromatin, Mitochondria, Endoplasmic Reticulum, Ribosomes.</p> <p>Carbohydrates: Definition, chemical structure, functions, sources, classifications, Monosaccharides, Disaccharides, Polysaccharides, mucopolysaccharide and its importance, glycoproteins</p> <p>Lipids: Definition, function, sources, classification, simple lipid, compound lipid, derived lipid, unsaturated and saturated fatty acid. Essential fatty acids and their importance, Blood lipids and their implications, cholesterol with its importance.</p> | 12 |
| II | <p>Proteins :Definition, sources, amino acids, structure of protein, their classification, simple protein, conjugated protein, derived proteins and their properties.</p> <p>Enzymes: Definitions, mechanism of action, factors affecting enzyme action, enzyme of clinical importance.</p> | 14 |
| III | <p>Nutrition</p> <p>1) Vitamins: Types, functions and role.</p> <p>2) Principal minerals and their functions(Ca, P, Mg, Na, K, Cl)</p> <p>3) Balanced diet, Diet for Chronically and terminally ill patients, post operative patients</p> <p>Bioenergetics: Energy rich compounds, Respiratory chain and Biological oxidation.</p> | 10 |
| IV | <p>Carbohydrate Metabolism: Glycolysis, TCA cycle, Glycogen metabolism, Gluconeogenesis, Maintenance of Blood Glucose. Diabetes Mellitus and its complications.</p> | 16 |

| I.K. GUJRAL PUNJAB TECHNICAL UNIVERSITY | | | | |
|--|--|------------|------------|------------------|
| Course Name | B.Sc. in Optometry | | | |
| Subject Code: | HVPE102-18 | | | |
| Subject Title: | Human Values, De-addiction & Traffic Rules Lab/Seminar | | | |
| Contact Hours: | L:0 | T:0 | P:4 | Credits:2 |
| Examination Duration (hours) | 3 | | | |
| Objective(s): | To develop a sense of social responsibility, traffic rules and about menace of drugs. | | | |

| Sr. No. | Contents |
|----------------|--|
| I | One each seminar will be organized on Drug De-addiction and Traffic Rules. Eminent scholar and experts of the subject will be called for the Seminar atleast once during the semester. It will be binding for all the students to attend the seminar |

| I.K. GUJRAL PUNJAB TECHNICAL UNIVERSITY | | | | |
|--|---|------------|------------|------------------|
| Course Name | B.Sc. in Optometry | | | |
| Subject Code: | BMPD 102-18 | | | |
| Subject Title: | Mentoring & Professional Development | | | |
| Contact Hours: | L:0 | T:0 | P:1 | Credits:1 |
| Examination Duration (hours) | 3 | | | |
| Objective(s): | To learn the life long learning skills. | | | |

| Sr. No. | Contents |
|---------|--|
| I | Part-A (Class Activities) 1. Expert and video lectures 2. Aptitude Test 3. Group Discussion 4. Quiz (General/Technical) 5. Presentations by the students 6. Team building Exercises 7* A part of above six points practicals on Fundamentals of Computers are also added as per Annexure-I |
| II | Part-B (Outdoor Activities) 1. Sports/NSS/NCC 2. Society Activities of various students chapter i.e. ISTE, SCIE, SAE, CSI, Cultural Club, etc. |

Evaluation shall be based on rubrics for Part – A & B

Mentors/Faculty incharges shall maintain proper record student wise of each activity conducted and the same shall be submitted to the department.

SEMESTER-II

| I.K. GUJRAL PUNJAB TECHNICAL UNIVERSITY | | | | |
|--|--|------------|------------|------------------|
| Course Name | B.Sc. in Optometry | | | |
| Subject Code: | BOPT 201-21 | | | |
| Subject Title: | Basics of Anatomy-II | | | |
| Contact Hours: | L:3 | T:1 | P:0 | Credits:4 |
| Examination Duration (hours) | 3 | | | |
| Objective(s): | To teach the fundamental concepts of Human Anatomy | | | |

Details of the Course (Human Anatomy)

| Unit | Contents | Contact Hours |
|-------------|---|----------------------|
| I | Introduction: Ocular Muscles, Visual Pathways, Sympathetic & Para-sympathetic nervous system, Vascular supply of eye, Lacrimal apparatus, , Aqueous Humor, Vitreous Humor. | 8 |
| II | Excretory System: Morphology and Anatomy of Human Kidney, Ureters, Urinary Bladder, Urethra. Structure of Nephron: Bowman’s Capsule, Proximal Convoluted Tubule, Distal Convoluted Tubule, Collecting Tubule, Loop of Henle, Collecting Duct. | 8 |
| III | Nervous System: Spinal Cord and Cranial Nerves, Sympathetic and Para-sympathetic Nervous System. Reflex Action and its types, Reflex Arc. Sensory Organs: Morphology and Anatomy of Ear, Tongue and Skin and their receptors. | 12 |
| IV | Endocrine System: Endocrine Glands and their types-Pituitary, Hypothalamus, Pineal, Thyroid, Parathyroids, Thymus, Adrenals, Kidneys, Pancreas, Gonads (Testes & Ovaries) and Alimentary Canal. | 8 |

| Examination Duration (hours) | 3 | | | |
| Objective(s): | To teach the fundamental concepts of Human Physiology | | | |

Details of the Course (Human Physiology)

| Unit | Contents | Contact Hours |
|-------------|---|----------------------|
| I | Ocular Physiology: Introduction of General Physiology of the eye, Extrinsic eye muscles and their actions (Ocular movements), Vision and its general aspects, Pigments of eye and its photochemistry, Electrophysiology of the eye, Visual acuity, Vernier acuity and its measurement, Visual Perception: Binocular vision, Stereoscopic vision, Scotopic and Photopic vision. Colour vision, Colour defects and Colour mixing. Mechanism of Accommodation. | 10 |
| II | Excretory System: Physiological functions of Kidneys and Osmoregulation. Mechanism of Urine formation, Counter-current mechanism, Urea Cycle, Various types of Kidney disorders. Kidney failure and its causes. Haemodialysis. | 10 |
| III | Nervous System: Functions of Spinal cord and Cranial nerves. Reflex action and its mechanism, Conditioned and Unconditioned Reflex action, Reflex arc. Mechanism of Nerve impulse generation and its transmission. Transmission of Nerve Impulse along the nerve fibre and at Synapse. The physiology of various receptors in tongue, nose and skin. Mechanism of hearing in ear. | 12 |
| IV | Endocrine System: Hormones and its types, Mechanism of Hormone action, Various hormones secreted by endocrine glands and their functions, Disorders of Endocrine Glands. | 8 |

| Objective(s): | To teach the fundamental concepts of cell biology & biochemistry. | | | |

| Unit | Contents | Contact Hours |
|-------------|--|----------------------|
| I | Nucleic Acids & its metabolism: Nucleosides, Nucleotides, Purines, Pyrimidines, Structure of DNA & its types (A, B & Z DNA's), RNA & its types, Metabolism of Purines & Pyrimidines and their disorders. | 8 |
| II | Metabolism of Fatty Acids: Digestion, absorption of lipids. Chylomicrons, Oxidation of Fatty Acids. Disorders of Fat metabolism, Fatty Liver & its causes. Ketosis & its salient features, causes and diagnosis of Ketosis. Lipoproteins, classification & types of Lipoproteins, LDL & HDL, their functions & clinical applications. Hyperlipidemias and Cardiovascular Diseases. | 10 |
| III | Metabolism of Amino Acids: Formation of ammonia, Transamination, Biological significance & clinical significance of Transamination. Transdeamination: oxidative & non-oxidative deamination, Urea Cycle, disorders of urea cycle. | 8 |
| IV | Clinical Biochemistry: Water and Electrolyte, Fluid compartment, daily intake and output sodium and potassium balance Hormones: Actions of Hormone Insulin, Glucagon, Thyroid and Parathyroid hormones, Cortical hormones. Acid Base Balance, role of lungs and kidneys, – Regulation of blood pH, acidosis, Alkalosis, Physical Chemistry: Osmosis, Dialysis, Donnan membrane equilibrium Liver, Gastric, Pancreatic and Kidney functions tests. | 12 |

| Objective(s): | To learn the basics of Environmental issues. | | | |

Details of Syllabus

| Unit | Contents | Contact Hours |
|-------------|---|----------------------|
| I | Introduction to Environmental Studies Multidisciplinary nature of Environmental Studies: Scope & Importance Need for Public Awareness Ecosystems Concept of an Ecosystem: Structure & functions of an ecosystem (Producers, Consumers & Decomposers) Energy Flow in an ecosystem: Food Chain, Food web and Ecological Pyramids Characteristic features, structure & functions of following Ecosystems: • Forest Ecosystem • Aquatic Ecosystem (Ponds, Lakes, River & Ocean) | 4 |
| II | Natural Resources Renewable & Non-renewable resources Forest Resources: Their uses, functions & values (Biodiversity conservation, role in climate change, medicines) & threats (Overexploitation, Deforestation, Timber extraction, Agriculture Pressure), Forest Conservation Act Water Resources: Their uses (Agriculture, Domestic & Industrial), functions & values, Overexploitation and Pollution of Ground & Surface water resources (Case study of Punjab), Water Conservation, Rainwater Harvesting, Land Resources: Land as a resource; Land degradation, soil erosion and desertification. Energy Resources: Renewable & non-renewable energy resources, use of alternate energy resources (Solar, Wind, Biomass, Thermal), Urban problems related to Energy | 8 |
| III | Biodiversity & its conservation Types of Biodiversity: Species, Genetic & Ecosystem India as a mega biodiversity nation, Biodiversity hot spots and biogeographic regions of India Examples of Endangered & Endemic species of India, Red data book Environmental Pollution & Social Issues Types, Causes, Effects & Control of Air, Water, Soil & Noise Pollution Nuclear hazards and accidents & Health risks Global Climate Change: Global warming, Ozone depletion, Acid rain, Melting of Glaciers & Ice caps, Rising sea levels Environmental disasters: Earthquakes, Floods, Cyclones, Landslides | 8 |
| IV | Field Work Visit to a National Park, Biosphere Reserve, Wildlife Sanctuary Documentation & preparation of a Biodiversity (flora & fauna) register of campus/river/forest Visit to a local polluted site : Urban/Rural/Industrial/Agricultural Identification & Photography of resident or migratory birds, insects (butterflies) Public hearing on environmental issues in a village | 16 |

Signature of Convenor (BOS) Signature of Chairman (BOS)

| Program Educational Objectives: | |
|--|---|
| PEO1 | The graduates will interpret the results of common ophthalmic procedures, develop differential and conclusive diagnoses, including the skillful use of Vision Care Instruments and material and management of Eye and Vision conditions. |
| PEO2 | The graduates will have successful careers as optometric health leaders and entrepreneurs (vision therapist, contact lens practitioner, low vision specialist, ocularist, occupational optometrist, academics, and research). |
| PEO3 | Graduates will possess considerable leadership skills in a broad and multidisciplinary team and be able to work and communicate effectively in an inter-disciplinary context either solo or in a team |
| PEO4 | Graduates' professional and ethical qualities will enable them to meaningfully contribute to teams. |
| Program Outcomes: | |
| PO1 | OPTOMETRIC PROBLEM SOLVING AND MANAGEMENT: To create, produce, and prescribe a variety of optical aids, such as eyeglasses, sunglasses, contact lenses, and ophthalmic lenses. |
| PO2 | OPTOMETRY KNOWLEDGE: To deliver care to patients under a range of different situations, efficiently, and affordably, while putting each patient's needs first. POLLUTION ANALYSIS: To illustrate the statistical and scientific concepts that underlie the practice of optometry |
| PO3 | FORMULATE/DESIGN A SOLUTION: using research-based knowledge and research techniques, such as data collection, analysis, and interpretation designs, and combining the data to provide a reliable result |
| PO4 | DESIGN AND DEVELOP COMPLEX PROBLEM: To develop systems that meet the necessary needs while taking into account the public's health and safety, as well as cultural, societal, and environmental factors, and to design solutions for complex optometry problems. |
| PO5 | DESIGN AND DEVELOP COMPLEX PROBLEM: To design solutions for complex optometry problems and develop systems that meet the required needs with appropriate consideration for the public health and safety, and the cultural, societal and environmental considerations. |
| PO6 | PROFESSIONAL DISCIPLINE: To undertake Public Health Optometry projects and vision screening eye camps for educating on ocular hygiene and related counseling |
| PO7 | ETHICAL LEARNING: To apply ethical principles and to commit professional ethics and responsibilities and norms of the optometric practice. |
| PO8 | COMMUNICATION: To communicate effectively on complex optometric activities with optometry Body and with society as such in eye screening and being able to comprehend and write effective reports, provide effective presentations and propose solutions |
| PO9 | LIFE LONG LEARNING: To recognize the need for and have the preparation and ability to engage in independent and life- long learning in the broadest context of technological change. |
| PO10 | ENVIRONMENT AND SUSTAINABILITY: Understand the impact of professional optometry solution in society as well as on environmental basis and display the |

| | knowledge of need of productive and sustainable development. |
|--|--|

| | |
|---|---|
| Program Specific Outcomes: At the end of the Program, the student will be able to: - | |
| PSO1 | Incremental development of students learning and clinical skills development through the stages of the programme. |
| PSO2 | Integration of theoretical, practical and clinical aspects of the curriculum |
| PSO3 | Knowledge and skills acquired during study will help the graduates to solve the wide range of ocular problems encountered in optometric clinical practice |
| PSO4 | Ability to develop a professional attitude towards the patients, colleagues and communities |

Details of Course Objectives

| | |
|------------|---|
| C01 | The course's objectives are to teach students about the general anatomical structures of the human body, evaluate those issues, and apply that knowledge to various diagnostic procedures and health problems. |
| C02 | The course aims to teach students about structural and functional anomalies of the visual system, how to investigate and treat them, the role of optometry in healthcare, and what is expected of and expected of healthcare professionals. |
| C03 | The course's objective is to increase students' understanding by teaching them about numerous transport mechanisms, biological oxidation, the nitrogen-sulfur cycle, and the biosynthesis of nucleic acids, as well as how to maintain these processes' normal values in day-to-day situations. |
| C04 | The purpose of the course is to provide in-depth knowledge of the physiological processes that occur within human organs and to correlate systemic and ocular disorders |
| C05 | The course's objectives are to teach students about the general anatomical structures of the human body, evaluate those issues, and apply that knowledge to various diagnostic procedures and health problems. |

Detailed syllabus of 3rd semester

| Semester | | First (3 rd) | | | | | | | | | |
|-------------|-----------------------|--------------------------|---------------------|-----------------|----------|-----------|-------------|--------------------|----------|-------------|--------|
| Course Code | Group | Course Type | Course Name / Title | Load Allocation | | | | Marks Distribution | | Total Marks | Credit |
| | | | | Lecture | Tutorial | Practical | Studio (If) | Internal | External | | |
| BOPT-301-21 | Allied health science | Core Theory | Ocular Microbiology | 3 | 1 | 0 | - | 25 | 75 | 100 | 4 |

Course Objective

This course covers the basic biological, biochemical and pathogenic characteristics of pathogenic organisms.

Course Outcomes

| | |
|------------|---|
| CO1 | The student would be able to produce knowledge of bacteria with diagrams |
| CO2 | Student will be able to tell the distinguishing features of prokaryotes and eukaryotes |
| CO3 | Students would have knowledge of different sterilization techniques and microbial preservation. |
| CO4 | Students will understand the structure and its working action of the microbes in the day to day living. |

| | | |
|--------------------|--|-----------------|
| Unit-1 | Introduction to microbes and microscopes | 12 Hours |
| Chapter 1.1 | History of Microbiology and Microscopy | |
| | History of Microbiology and Microscopy- Meaning, definition and history of Microbiology, Importance and applications of Microbiology. | |
| Chapter 1.2 | Principles and mechanisms of different microscopy | |
| | Principles and mechanisms of different microscopy – bright field, dark field, phase-contrast, fluorescent and electron microscopy (SEM and TEM). Ocular and stage micrometers. Size determination of microorganisms. | |

Signature of Convenor (BOS) Signature of Chairman (BOS)

| | | |
|--------------------|--|-----------------|
| Chapter 1.3 | Principles and types of stains | |
| | Principles and types of stains -Simple stain, differential stain, negative stain, structural stains - spore, capsule, flagella. Hanging-drop method, wet mount method Ocular bacterial, Fungal Infections | |
| Unit-2 | Bacteria and Virus | 12 Hours |
| Chapter 2.1 | Biology of Prokaryotic and Eukaryotic Microorganisms | |
| | Biology of Prokaryotic and Eukaryotic Microorganisms- Outline classification of living organisms: Prokaryotes - General characteristics of bacteria, archaebacteria, rickettsias, mycoplasmas, cyanobacteria and actinomycetes., Outline classification for bacteria as per the second edition of Bergey's Manual of Systematic Bacteriology (up to order level Structure and multiplication of lambda bacteriophage. Eukaryotes - General characteristics and classification (up to the order level) of eukaryotic microorganisms - Protozoa, microalgae, molds and yeasts. Hospital Infections- causative agents, transmission methods, investigation prevention and control, principles and practice of biomedical waste management | |
| Chapter 2.2 | Bacteria | |
| | Cell structure, elementary idea about classification and morphological basis. Staining reactions: Gram staining, spore staining, acid fast staining. Bacterial growth: nutritional requirements, physical factor affecting, culture media, and growth curve. Elementary idea about bactericidal agents: Phenol, alcohol. Sterilization (principles, types & methods). Pasteurization. Antibiotics: Bacteriostatic and bactericidal effects | |
| Chapter 2.3 | Virus | |
| | Elementary knowledge of viral-morphology, viral genome and classification, viral replication. Herpes viruses, hepatitis viruses, miscellaneous viruses, human immunodeficiency viruses. | |
| Unit-3 | Disinfections, Sterilizations and Fungi and Immunity | 14 Hours |
| Chapter 3.1 | Microbiological Techniques | |
| | Sterilization and disinfection techniques, Principles and methods of sterilization., Physical methods -autoclave, hot-air oven, pressure cooker, laminar air flow, filter sterilization., Radiation methods – UV rays, gamma rays, ultrasonic methods., Chemical methods - Use of alcohols, aldehydes, fumigants, phenols, halogens and hypochlorite's | |
| Chapter 3.2 | Disinfectants | |
| | Mode of action, use of various disinfectants, testing efficiency of various disinfectants. Preservation of microbial cultures - sub culturing, overlaying cultures with mineral oils, lyophilization, sand cultures, storage at low temperature. Microbial growth & death, Laboratory culture, host pathogen interactions, antimicrobial chemotherapy, pathogenic mechanisms common to external ocular infections process – clinical pathology. Physiology, pathology, treatment & epidemiology of infectious diseases caused by bacteria, virus, fungi & parasitic organisms with emphasis to disease with ocular manifestations & infectious eye diseases in hot climate as in India. AIDS & eye. | |
| Chapter 3.3 | Structure & function of immune system | |

Signature of Convenor (BOS) Signature of Chairman (BOS)

| | |
|--|--|
| | Structure & function of immune system – Structure and function of thymus, spleen & red Bone marrow- Immunity& its types, plasma proteins & immune reaction, cells involved in immune system. Humoral immunity theories of antibody formation. Structure & function of lymph nodes. Structure & function of thymus, spleen & red Bone marrow. Nonspecific immunity, Antibody mediated immunity, specific immunity, cell modified immunity, Active immunity, Passive immunity. Disorder of growth – metaplasia, dysplasia, neoplasia. Circulatory disturbances – thrombosis, infarction, ischemia, embolism. Degeneration (calcification). |
|--|--|

Signature of Convenor (BOS) Signature of Chairman (BOS)

| Semester | | First (3 rd) | | | | | | | | | |
|-------------|-----------------------|--------------------------|---------------------|-----------------|----------|-----------|-------------|--------------------|----------|-------------|--------|
| Course Code | Group | Course Type | Course Name / Title | Load Allocation | | | | Marks Distribution | | Total Marks | Credit |
| | | | | Lecture | Tutorial | Practical | Studio (If) | Internal | External | | |
| BOPT-302-21 | Allied health science | Core Theory | Visual optics –I | 3 | 1 | 0 | - | 25 | 75 | 100 | 4 |

Course Description

This course deals with the concept of eye as an optical instrument and thereby covers various optical components of eye, types of refractive errors, clinical approach in diagnosis and management of various types of refractive errors.

Course Objectives

The course aims to develop the insight of the basic visual techniques and their optimization and to develop an understanding of the structure of eye and defects of the eye and an understanding of the diffraction and their relation to the correctness of various vision defects

Course Outcomes

| | |
|------------|---|
| CO1 | Student will come to know about the vision related defects and their correction measures. |
| CO2 | Student will come to know about the focus of the eye and change in power according to change in vertex distance |
| CO3 | Student will come to know the spectacle distance |
| CO4 | Students will know about the effects of convergence and accommodation in eye |

| | | |
|--------------------|--|-----------------|
| Unit-1 | | 12 Hours |
| Chapter 1.1 | Review of Geometrical Optics | |
| | Review of Geometrical Optics: Geometrical Optics, their properties. Optical constants of the eye and their measurement. Purkinje images. Corneal curvature and thickness. | |
| Chapter 1.2 | Optical Defects of the Eye | |
| | Optical Defects of the Eye- Shape of Cornea, Shape & RI of the lens, Optical axis, Visual axis (angle alpha, Fixation axis (angle gamma), Aberration of the Optical system of eye, Depth of focus, Diffraction & resolving power | |
| Unit-2 | | 12 Hours |
| Chapter 2.1 | Refractive errors | |
| | Emmetropia and ametropia, Axial versus spherical ametropia, Myopia | |

Signature of Convenor (BOS) Signature of Chairman (BOS)

| | |
|--------------------|---|
| | Hypermetropia (Hyperopia) Astigmatism. |
| Chapter 2.2 | Accommodation |
| | Accommodation- possible mechanism of accommodation- Schiener disc experiment- theories of accommodation- modern theory- changes in the lens during accommodation- the amplitude of accommodation- the measurement of the amplitude of accommodation |
| Chapter 2.3 | Presbyopia |
| | Depth of field, luminance and blur tolerance- amplitude of accommodation versus age. Presbyopia-near vision addition- estimate of addition-unequal near vision addition- effect of changing the spectacle distance – hypermetropia and accommodation. |
| Unit-3 | 14 Hours |
| Chapter 3.1 | Spectro radiometric curve |
| | Spectro radiometric curve- V_{λ} - λ curve- photopic and scotopic vision CIE standard observes. Photometric quantities and units- Luminous Flux, Lumen- Illuminance, lux Luminous intensity, Candela – Luminance, Candela/m ² . Inverse square law and Cosine law of illumination (Illuminance) |
| Chapter 3.2 | Photometry |
| | Photometry- Lumer Brodhum photometer, Guild Flicker photometer- Photocells photo multipliers – photodiodes-noise in physical photometers. Determination lighting of Polar curve of lamps. Glare and glare index- disability glare- discomfort glare- control of glare- contrast Light sources- Special energy distribution- luminous efficacy- color rendering properties- Flicker contracts- Daylight, its properties- color lamp – Incandescent. lamps - low pressure Hg-lamps- High pressure Hg-lamps- Low-pressure NA-lamp- High pressure NA-lamps- Typical applications |

| BOPT-303-21 | Allied health science | Core Theory | Optometric optics-I | 3 | 1 | 0 | - | 25 | 75 | 100 | 4 |

Course Description

This course deals with understanding the theory behind spectacle lenses and frames, their materials, types, advantages and disadvantages, calculations involved, when and how to prescribe. It will impart construction, design application and development of lenses, particularly of the methods of calculating their power and effect.

Course Objectives

Skills/knowledge to be acquired at the end of this course: -

- Measurement of lens power, lens centration using conventional techniques
- Transposition of various types of lenses
- Measurement of surface powers using lens measure.
- Method of laying off the lens for glazing process

Course Outcomes

| | |
|------------|---|
| CO1 | Knowledge to select the tool power for grinding process. |
| CO2 | Knowledge of prism and decent ration in ophthalmic lenses. Knowledge of different types of materials used to make lenses and its characteristics. |
| CO3 | Knowledge lens designs –single vision, bifocals, progressive lens. Knowledge on tinted and protective lenses. |
| CO4 | Knowledge on special lenses like iseikonic, spectacle magnifiers. Knowledge on spectacle frames –manufacture, materials |

| | | |
|--------------------|--|-----------------|
| Unit-1 | | 12 Hours |
| Chapter 1.1 | Introduction –Light, Mirror, Reflection, Refraction and Absorption | |
| Chapter 1.2 | Prisms –Definition, properties, Refraction through prisms, Thickness difference, Base-apex notation, uses, nomenclature and units, Sign Conventions, Fresnel's prisms, rotary prisms | |
| Chapter 1.3 | Lenses –Definition, units, terminology used to describe, form of lenses | |
| Chapter 1.4 | Vertex distance and vertex power, effectively calculations | |
| Unit-2 | | 12 Hours |
| Chapter 2.1 | Lens shape, size and types i.e., Spherical, cylindrical and Sphero-cylindrical | |

Signature of Convenor (BOS) Signature of Chairman (BOS)

| | | |
|--------------------|--|-----------------|
| | Transpositions –Simple, Toric and Spherical equivalent | |
| Chapter 2.2 | Prismatic effect, centration, decentration and Prentice rule, Prismatic effect of Planocylinder and Spherocylindrical lenses | |
| Chapter 2.3 | Spherometer & Sag formula, Edge thickness calculations | |
| Unit-3 | | 14 Hours |
| Chapter 3.1 | Magnification in high plus lenses, Minification in high minus lenses | |
| Chapter 3.2 | Tilt induced power in spectacles | |
| Chapter 3.3 | Aberration in Ophthalmic Lenses | |

Course Description

This course covers commonly used optometric instruments, its basic principle, description and usage in clinical practice.

Course Objectives

Upon completion of the course, the student should be able to gain theoretical knowledge and basic practical skill in handling the following instruments

1. Visual Acuity chart/drum
2. Retinoscope
3. Trail OMx
4. Jackson Cross cylinder
5. Direct ophthalmoscope
6. Slit lamp Bio microscope
7. Slit lamp Ophthalmoscopy (+90, 78 D)
8. Gonioscope
9. Tonometer: Applanation Tonometer
10. Keratometer
11. Perimeter
12. Electro diagnostic instrument (ERG, VEP, EOG)
13. A –Scan Ultrasound
14. Lens meter

Course Outcomes

| | |
|------------|--|
| CO1 | Students will come to know about the various instruments used in the optometry |
| CO2 | Student will be able to make a correct choice between the instruments used in the current day practice |
| CO3 | Student will be able to demonstrate the working of the various instruments used in the optometry |
| CO4 | Students will learn about the principle of working of various instruments and also will know to examine the various eye structures |

| | | |
|--------------------|--------------------------------------|-----------------|

| BOPT-305-21 | Allied health science | Core Theory | Ocular Disease-I | 3 | 1 | 0 | - | 25 | 75 | 100 | 4 |

Course Description

This course deals with various ocular diseases affecting various parts of the eyes. It covers clinical signs and symptoms, cause, pathophysiological mechanism, diagnostic approach, differential diagnosis and management aspects of the ocular diseases.

Course Objectives

In this course the student will learn general idea of the fundamental aspect of the topic regarding infectious disease of eye and the steps for diagnosing and prevention and management of the infection

Course Outcomes

| | |
|------------|--|
| CO1 | At the end of the course, the candidate will have sound knowledge of the agents responsible for causing human infections. |
| CO2 | Recall the etio-pathogenesis, the pathological effects & the clinico-pathological correlation of common infections & non-infectious diseases |
| CO3 | Correlate normal & altered morphology of eye in different diseases needed for understanding disease process & their clinical significance. |
| CO4 | Acquire knowledge of common immunological disorders & their resultant effects on the human Body. |

Signature of Convenor (BOS) Signature of Chairman (BOS)

| | | |
|--------------------|---|-----------------|
| Unit-1 | | 12 Hours |
| Chapter 1.1 | Anterior segment ocular diseases | |
| | Anterior segment ocular diseases involving orbit, eyelids, adnexa, conjunctiva, cornea, urea, sclera, anterior chamber, iris and lens. Symptomatology, clinical signs, diagnosis, pathogenesis, pathophysiology, systemic disease relationships and treatment of degenerative, infections and inflammatory conditions affecting these structures Disease of the | |
| Chapter 1.2 | Lids | |
| | Lids – Congenital Deformities of the Lids. | |
| Chapter 1.3 | Inflammatory Conditions of the Lids | |
| | Oedema of the Lids. Inflammatory Conditions of the Lids. Deformities of the Lid Margins. Deranged Movement of the Eyelids. Neoplasm's of the Lids. Injuries of the Lids. | |
| Unit-2 | | 12 Hours |
| Chapter 2.1 | Diseases of the Lachrymal Apparatus | |
| | Diseases of the Lachrymal Apparatus-. Dry Eye. Disease of the Lachrymal Gland. Disease of the Lachrymal Passages. Operations for Chronic Dacryocystitis. | |
| Chapter 2.2 | Disease of the Conjunctiva | |
| | Disease of the Conjunctiva- Subconjunctival Haemorrhage Infective Conjunctivitis. Follicular Conjunctivitis. Granulomatous Conjunctivitis. Allergic Conjunctivitis. Conjunctivitis Associated with Skin conditions. Degenerative conditions of the Conjunctiva. Vitamin- A Deficiency. | |
| Chapter 2.3 | Cysts and Tumours | |
| | Cysts and Tumours of the Conjunctiva. Conjunctival Pigmentation. Injuries of the Conjunctiva. | |
| Unit-3 | | 14 Hours |
| Chapter 3.1 | Disease of the Cornea | |
| | Disease of the Cornea –Congenital Anomalies. Inflammation of the Cornea (Keratitis). Superficial Keratitis. Deep Keratitis. Vascularisation of Cornea. Opacities of the Cornea. Keratoplasty. Corneal Degenerations. Corneal Dystrophy's. Corneal Pigmentation. Corneal Injuries. Refractive Corneal Surgery. Corneal Ulcer (Bacterial, Viral, Fungal) | |
| Chapter 3.2 | Disease of the Ciliary Body | |
| | Disease of the Ciliary Body- Inflammations of the Ciliary Body. Purulent Iridocyclitis Panophthalmitis). Evisceration. | |
| Chapter 3.3 | Sympathetic Ophthalmia | |
| | Sympathetic Ophthalmia. Vogt- Koyanagi – Harada Syndrome. Tumours of the Celery Body. Injuries of the Celery Body. Glaucoma-. Formation of Aqueous Humor. Drainage of Aqueous. Intraocular Pressure (IOP). Ocular Rigidity. | |

Course Description

This course covers various clinical optometry procedures involving external examination, anterior segment and posterior segment examination, neuroophthalmic examination, pediatric optometry examination, and Glaucoma evaluation.

Course Objectives

Knowing the purpose, setup and devices required for the test, indications and contraindications of the test, step-by-step procedures, documentation of the findings, and interpretation of the findings of the various clinical optometry procedures

Course Outcomes

| | |
|------------|---|
| CO1 | Students will be able to understand the purpose, setup and devices required for the test |
| CO2 | Student will be able to differentiate the various types of infections and their origin. |
| CO3 | Student will develop the knowledge of chemotherapy and culture preparation. |
| CO4 | Students will able to understand the various microbial mechanism of action towards eye infections |

d. Syllabus

| Unit-1 | | 12 Hours |
|--------------------|--|----------|
| Chapter 1.1 | History taking | |
| Chapter 1.2 | Visual acuity estimation | |
| Chapter 1.3 | Extraocular motility, Cover test, Alternating cover test | |

| BOPT-308-21 | Allied health science | Practical | Clinical optometry II | 3 | 0 | 1 | - | 25 | 75 | 100 | 4 |

Course Objectives

The resident will efficiently develop diagnosis differentials and diagnosis plans based on history intake

Course Outcomes

| | |
|------------|--|
| CO1 | Student will understand the basic and advanced principles of Clinical Optometry. |
| CO2 | Students will familiar with basic and advanced diagnostic procedures in Optometry. |
| CO3 | Students apply knowledge from previous clinical learning experience under the supervision of a registered optometrist. |
| CO4 | To do a thorough comprehensive eye examination. |

d. Syllabus

| | | |
|--------------------|--|-----------------|
| Unit-1 | | 12 Hours |
| Chapter 1.1 | Students will gain additional skills in clinical procedures, interaction with patients and professional personnel. Students will apply knowledge from previous clinical learning experience under the supervision of a registered optometrist. Students are tested on intermediate clinical optometry skills. The practical aspects of the dispensing optics (hand-on in optical), optometric instruments, clinical examination of visual system (Hands-on under supervision) and ocular diseases (Slides and case discussion) will be given to the students during their clinical training. | |
| Unit-2 | | 12 Hours |
| Chapter 2.1 | Practice of Streak Retinoscopy <ul style="list-style-type: none"> • Direct Ophthalmoscopy-Normal Fundus • Subjective refraction – fogging, clockdial, fan, JCC, prism balance, TIB, duochrome, cyclodeimia, Slit refraction • Measurement of amplitude of accommodation. • Assessment of children Vision & Paediatric evaluation, diagnosis & management • Writing prescription. | |
| Unit-3 | | 14 Hours |

Signature of Convenor (BOS) Signature of Chairman (BOS)

| | |
|--------------------|--|
| Chapter 3.1 | The students will perform vision examination, refraction and related measurements under the guidance of working clinical optometrist. Evaluation, Diagnosis & Optometric management of children with mental retardation C.P. Dyslexia, Multiple Sensory Motor Haudicap. Visual Disorders in senior citizens, evaluation, diagnosis+ management |

Detailed Syllabus of 4th semester

| Semester | | (4 th) | | | | | | | | | |
|-------------|-----------------------|--------------------|---|-----------------|----------|-----------|-------------|--------------------|----------|-------------|--------|
| Course Code | Group | Course Type | Course Name / Title | Load Allocation | | | | Marks Distribution | | Total Marks | Credit |
| | | | | Lecture | Tutorial | Practical | Studio (If) | Internal | External | | |
| BOPT-401-21 | Allied health science | Core Theory | Optometric Optics-II & Dispensing Optics | 3 | 1 | 0 | - | 25 | 75 | 100 | 4 |

Course Description

This course deals with understanding the theory behind spectacle lenses and frames, their materials, types, advantages and disadvantages, calculations involved, when and how to prescribe. It will impart construction, design application and development of lenses, particularly of the methods of calculating their power and effect. In addition, deals with role of optometrists in optical set-up.

Course Objectives

Skills/knowledge to be acquired at the end of this course:

1. To select the tool power for grinding process
2. Different types of materials used to make lenses and its characteristics
3. Lens designs–Bifocals, progressive lens
4. Tinted, Protective & Special lenses
5. Spectacle frames –manufacture process & materials
6. Art and science of dispensing spectacle lens and frames based on the glass prescription.
7. Reading of spectacle prescription. Counselling the patient
8. Lens edge thickness calculation
9. Frame & lens measurements and selection
10. Writing spectacle lens order
11. Facial measurements - Interpupillary distance measurement and measuring heights (single vision, multifocal, progressives)
12. Lens verification and axis marking and fitting of all lens types

Signature of Convenor (BOS) Signature of Chairman (BOS)

13. Final checking of finished spectacle with frame adjustments
14. Delivery and follow-up
15. Troubleshooting complaints and handling patient's questions

Course Outcomes

| | |
|------------|---|
| CO1 | The candidate has clear understanding in terms and by calculation, various characteristics of advanced single vision and multifocal spectacle lenses and bifocal lenses |
| CO2 | The candidate must have fundamental knowledge of spectacle lenses, so as to understand new technology as it arises and to appreciate what is fit for a given purpose |
| CO3 | Student must be able to troubleshoot the spectacle related issues. |
| CO4 | Students must be able to help the subjects to find the best suitable spectacle frames as per their professional and personal needs |

d. Syllabus

| | | |
|--------------------|---|-----------------|
| Unit-1 | | 12 Hours |
| Chapter 1.1 | Spectacle Lenses – II | |
| | Manufacture of glass <ul style="list-style-type: none"> • Lens materials • Lens surfacing • Principle of surface generation and glass cements • Terminology used in Lens workshop • Lens properties • Lens quality • Faults in lens material • Faults on lens surface • Methods of Inspecting the quality of lenses • Safety standards for ophthalmic lenses (FDA, ANSI, ISI, Others) | |
| Chapter 1.2 | Spectacle Frames | |
| | <ul style="list-style-type: none"> • Types and parts • Classification of spectacle frames-material, weight, temple position, Coloration • Frame construction • Frame selection • Size, shape, mounting and field of view of ophthalmic lenses | |
| Chapter 1.3 | Tinted & Protective Lenses | |
| | <ul style="list-style-type: none"> • Characteristics of tinted lenses Absorptive Glasses • Polarizing Filters, Photochromic & Reflecting filters • Safety lenses-Toughened lenses, Laminated Lenses, CR 39, Polycarbonate | |
| Chapter 1.4 | Multifocal Lenses | |
| | <ul style="list-style-type: none"> • Introduction, history and development, types • Bifocal lenses, Trifocal & Progressive addition lenses | |
| Unit-2 | | 12 Hours |
| Chapter 2.1 | Reflection from spectacle lens surface & lens coatings: | |
| | <ul style="list-style-type: none"> • Reflection from spectacle lenses - ghost images -Reflections in bifocals at the dividing line • Antireflection coating, Mirror coating, Hard Multi Coating [HMC], | |

Signature of Convenor (BOS) Signature of Chairman (BOS)

| | | |
|---------------------|--|-----------------|
| | Hydrophobic coating | |
| Chapter 2.2 | Miscellaneous Spectacle | |
| | <ul style="list-style-type: none"> • Iseikonic lenses • Spectacle magnifiers • Recumbent prisms • Fresnel prism and lenses • Lenticular & A spherical lenses • High Refractive index glasses | |
| Unit-3 | Dispensing Optics | 14 Hours |
| Chapter 3.1 | Components of spectacle prescription & interpretation, transposition, Add and near power relation | |
| Chapter 3.2 | Frame selection –based on spectacle prescription, professional requirements, age group, face shape | |
| Chapter 3.3 | Measuring Inter-pupillary distance (IPD) for distance & near, bifocal height | |
| Chapter 3.4 | Lens & Frame markings, Pupillary centers, bifocal heights, Progressive markings & adjustments –facial wrap, pantoscopic tilt | |
| Chapter 3.5 | Recording and ordering of lenses (power, add, diameter, base, material, type, lens enhancements) | |
| Chapter 3.6 | Faults in spectacles (lens fitting, frame fitting, patients complaints, description, detection and correction) | |
| Chapter 3.7 | Final checking & dispensing of spectacles to customers, counseling on wearing & maintaining of spectacles, Accessories –Bands, chains, OMxes, slevets, cleaners, screwdriver kit | |
| Chapter 3.8 | Spectacle repairs –tools, methods, soldering, riveting, frame adjustments | |
| Chapter 3.9 | Special types of spectacle frames | |
| | <ul style="list-style-type: none"> • Monocles • Ptosis crutches • Industrial safety glasses • Welding glasses | |
| Chapter 3.10 | Frame availability in Indian market FAQ's by customers and their ideal answers | |

| BOPT-402-21 | Allied health science | Core Theory | Visual Optics-II | 3 | 1 | 0 | - | 25 | 75 | 100 | 4 |

Course Objectives

The course aims to develop the insight of the basic visual techniques and their optimization and to develop an understanding of the diffraction and their relation to the correctness of various vision defects

Course Outcomes

| | |
|------------|--|
| CO1 | Overview of the visual system and its optical system |
| CO2 | Imaging using optic measures and the abnormalities in the optical measurements |
| CO3 | Physical optics of the human eye |
| CO4 | Correction of various visual defects |

d. Syllabus

| | | |
|--------------------|--|-----------------|
| Unit-1 | | 12 Hours |
| Chapter 1.1 | Spectacle refraction (F) & ocular refraction(K) | |
| | Correction of myopia- spectacle refraction (F) – ocular refraction(K) – Relationship between F and K. correction of hypermetropia- the effect of vertex distance change. Correction of ametropia with thick lenses. Some problems involving K. | |
| Chapter 1.2 | Blurred images in the reduced and simplified schematic eyes | |
| | Clear and blurred images in the reduced and simplified schematic eyes. The visual axis. Pupil size and blur disc diameter. Depth of field. retinal image size in uncorrected reduced eye. Spectacle magnification in reduced and corrected eyes. Nodal points and clear image size. Retinal images with a near object. | |

Signature of Convenor (BOS) Signature of Chairman (BOS)

| | | |
|--------------------|---|-----------------|
| Chapter 1.3 | Magnification | |
| | Spectacle magnification in near vision. The simple magnifier. Relative spectacle magnification. Correction of spherical ametropia with contact lens. Spectacle magnification with a contact lens. | |
| Unit-2 | | 12 Hours |
| Chapter 2.1 | Ametropia | |
| | Ametropia in the actual human eye. The growth of the human eye in emmetropia. Spherical ametropia in adult eye. Genetic aspects of refractive error. Summary of the causative factors involved in ametropia. | |
| Chapter 2.2 | Progressive myopia | |
| | Progressive myopia. Juvenile stress myopia. | |
| Chapter 2.3 | Aphakia | |
| | Aphakia. Refractive error in aphakia. The retinal image size in aphakia. Correction of aphakia by a contact lens. Use of an intraocular implant. Power of the implant and retinal image size. Clinical aspects of aphakia. | |
| Unit-3 | | 14 Hours |
| Chapter 3.1 | Astigmatism | |
| | Astigmatism. → Oblique astigmatism. Astigmatism in the reduced eye. The retinal images of point and extended objects. | |
| Chapter 3.2 | Correction of astigmatism | |
| | Classification of astigmatism. Correction of astigmatism by spherocylindrical, toric and contact lenses Retinoscopy – principle and use. Clinical recording of standard of vision-visual acuity. Review of subjective refractive methods. | |
| Chapter 3.3 | Review of objective refractive methods | |
| | Problem of review of objective refractive methods Cross cylindrical method of detecting astigmatism | |

Course Description

This course deals with various ocular diseases affecting various parts of the eyes. It covers clinical signs and symptoms, cause, pathophysiological mechanism, diagnostic approach, differential diagnosis and management aspects of the ocular diseases.

Course Objectives

At the end of the course the students will be knowledgeable in the following aspects of ocular diseases: knowledge on

Course Outcomes

| | |
|------------|--|
| CO1 | Students will be knowledgeable in Etiology. Epidemiology of the ocular diseases. |
| CO2 | Student will able to learn about Symptoms and Signs of the ocular diseases. |
| CO3 | Students will know about Diagnostic approach of the ocular diseases. |
| CO4 | Student will learn Management of the ocular diseases. |

Detailed Syllabus

| | | |
|--------------------|---|-----------------|
| Unit-1 | | 12 Hours |
| Chapter 1.1 | Retina and Vitreous | |
| | <ul style="list-style-type: none"> Applied Anatomy Congenital and Developmental Disorders (Optic Disc: ColoOMma, Drusen, Hypoplasia, Medullated nerve fibers; Persistent Hyaloid Artery) Inflammatory disorders (Retinitis: Acute purulent, Bacterial, Virus, mycotic) | |

Signature of Convenor (BOS) Signature of Chairman (BOS)

| | |
|--------------------|---|
| | <ul style="list-style-type: none"> • Retinal Vasculitis (Eales's) • Retinal Artery Occlusion (Central retinal Artery occlusion) • Retinal Vein occlusion (Ischaemic, Non-Ischaemic, Branch retinal vein occlusion) • Retinal degenerations: Retinitis Pigmentosa, Lattice degenerations • Macular disorders: Solar retinopathy, central serous retinopathy, cystoid macular edema, Age related macular degeneration. • Retinal Detachment: Rhegmatogenous, Tractional, Exudative) • Retina blastoma • Diabetic retinopathy |
| Chapter 1.2 | Ocular Injuries: Terminology |
| | <p>Closed globe injury (Contusion, lamellar laceration) Open globe injury (Rupture, laceration, penetrating injury, perforating injury)</p> <ul style="list-style-type: none"> • Mechanical injuries (Extraocular foreign Body, blunt trauma, perforating injury, sympathetic ophthalmitis) • Non-Mechanical Injuries (Chemical injuries, Thermal, Electrical, Radiational) • Clinical approach towards ocular injury patients |
| Unit-2 | 12 Hours |
| Chapter 2.1 | Lens |
| | <ul style="list-style-type: none"> • Applied Anatomy and Physiology • Clinical examination • Classification of cataract • Congenital and Developmental cataract • Acquired (Senile, Traumatic, Complicated, Metabolic, Electric, Radiational, Toxic) • Morphological: Capsular, Subcapsular, Cortical, Supranuclear, Nuclear, Polar. • Management of cataract (non-surgical and surgical measures; preoperative evaluation, Types of surgeries,) • Complications of cataract surgery • Displacement of lens: Subluxation, Displacement • Lens complications, Lenticulus, Microspherophakia. |
| Chapter 2.2 | Clinical Neuro-ophthalmology |
| | <ul style="list-style-type: none"> • Anatomy of visual pathway • Lesions of the visual pathway • Pupillary reflexes and abnormalities (Amaurotic light reflex, Efferent pathway defect, Wernicke's hemianopic pupil, Marcus gunn pupil. Argyll Robertson pupil, Adie's tonic pupil) • Optic neuritis, Anterior Ischemic optic neuropathy, Papilledema, optic atrophy • Cortical blindness • Malingering • Nystagmus • Clinical examination |
| Unit-3 | 14 Hours |
| Chapter 3.1 | Glaucoma |
| | <ul style="list-style-type: none"> • Applied anatomy and physiology of anterior segment |

Signature of Convenor (BOS) Signature of Chairman (BOS)

| | |
|--|---|
| | <ul style="list-style-type: none">• Clinical Examination• Definitions and classification of glaucoma• Pathogenesis of glaucomatous ocular damage• Congenital glaucoma's• Primary open angle glaucoma• Ocular hypertension• Normal Tension Glaucoma• Primary angle closure glaucoma (Primary angle closure suspect, Intermittent glaucoma, acute congestive, chronic angle closure)• Secondary Glaucoma's• Management: common medications, laser intervention and surgical techniques |

Course Description

This course describes basic aspects of disease processes with to specific entities relevant in optometry/ophthalmology.

Course Objectives

At the end of the course students will acquire knowledge in the following aspects:

1. Inflammation and repair aspects.
2. Pathology of various eye parts and adnexa.

Course Outcomes

| | |
|------------|---|
| CO1 | Students will be able to understand the pathological states of the eye and their etiology |
| CO2 | Student will be able to differentiate the various types of infections and their origin. |
| CO3 | Student will develop the knowledge of chemotherapy and culture preparation. |
| CO4 | Students will able to understand the various microbial mechanism of action towards eye infections |

Detailed Syllabus

| | | |
|--------------------|---|-----------------|
| Unit-1 | | 12 Hours |
| Chapter 1.1 | Inflammation and repair | |

Course Description

This course covers the actions, uses, adverse effects and mode of administration of drugs, especially related to eyes.

Course Objectives

At the end of the course the students will acquire knowledge in the following aspects

1. Basic principle of pharmacokinetics & Pharmacodynamics.
2. Commonly used ocular drugs, mechanism, indications, contraindications, drug dosage and adverse effects.

Course Outcomes

| | |
|------------|--|
| CO1 | Students will be able to make the correct choice of drug for a particular condition. |
| CO2 | Student will be able to report an adverse drug reaction related to drug. |
| CO3 | Student will be suggesting the pharmacotherapy. |
| CO4 | Students will learn about the drugs mechanism of action and the routes of drugs for administration of ocular as well as systemic |

Detailed Syllabus

| Unit-1 | General Pharmacology | 12 Hours |
|--------------------|---|----------|
| Chapter 1.1 | Introduction & sources of drugs, Routes of drug administration, Pharmacokinetics (emphasis on ocular pharmacokinetics), Pharmacodynamics & factors modifying drug actions | |

Signature of Convenor (BOS) Signature of Chairman (BOS)

| | | |
|--------------------|--|-----------------|
| Chapter 1.2 | Systemic Pharmacology | |
| | Autonomic nervous system: Drugs affecting papillary size and light reflex, Intraocular tension, Accommodation; Cardiovascular system: Antihypertensive and drugs useful in Angina; Diuretics: Drugs used in ocular disorders; Central Nervous System: Alcohol, sedative hypnotics, General & local anesthetics, Opioids & non-opioids; Chemotherapy : Introduction on general chemotherapy, Specific chemotherapy –Antiviral, antifungal, antibiotics; Hormones : Corticosteroids, Antidiabetics; Blood Coagulants | |
| Unit-2 | | 12 Hours |
| Chapter 2.1 | Ocular Pharmacology | |
| | Ocular preparations, formulations and requirements of an ideal agent; Ocular Pharmacokinetics, methods of drug administration & Special drug delivery system; Ocular Toxicology | |
| Unit-3 | | 14 Hours |
| Chapter 3.1 | Diagnostic & Therapeutic applications of drugs used in Ophthalmology: Diagnostic Drugs & biological agents used in ocular surgery, Anesthetics used in ophthalmic procedures, Anti-glaucoma drugs; Pharmacotherapy of ocular infections –Bacterial, viral, fungal & chlamydial; Drugs used in allergic, inflammatory & degenerative conditions of the eye; Immune modulators in Ophthalmic practice, Wetting agents & tear substitutes, Antioxidants | |

| BOPT-406-21 | Allied health science | Core Theory | Introduction to Quality & Patient safety | 2 | 1 | 0 | - | 25 | 75 | 100 | 4 |

Course Description

This course deals with various aspects of quality and safety issues in health care services.

Course Objectives

At the end of the course, students will gain introductory knowledge about quality and patient safety aspects from Indian perspectives

Course Outcomes

| | |
|------------|---|
| CO1 | Student will identify instances of national patient safety goal non-compliance |
| CO2 | Students will Identifies hazards/risks and opportunities for unsafe inpatient care through tracers and mapping of key patient care processes in inpatient setting |
| CO3 | Student will actively participate in hospital committees and safety initiatives |
| CO4 | Students will identify and demonstrates critical actions that contribute to error reduction and patient safety. |

Detailed Syllabus

| | | |
|--------------------|--|-----------------|
| Unit-1 | | 12 Hours |
| Chapter 1.1 | Quality assurance and management | |
| Chapter 1.2 | Basics of emergency care and life support skills | |
| Unit-2 | | 12 Hours |

Course Objectives

The resident will efficiently develop diagnosis differentials and diagnosis plans based on history intake.

Course Outcomes

| | |
|------------|--|
| CO1 | Students will understand the basic and advanced principles of Clinical Optometry. |
| CO2 | Students will be familiar with basic and advanced diagnostic procedures in Optometry. |
| CO3 | Students will learn to apply knowledge from previous clinical learning experience under the supervision of a registered optometrist. |
| CO4 | Students will learn to do a thorough comprehensive eye examination. |

Detailed Syllabus

| | | |
|--------------------|---|-----------------|
| Unit-1 | | 12 Hours |
| Chapter 1.1 | Students will improve their skills in clinical procedures, and then progressive interactions with patients and professional personal are monitored as students practice optometry in supervised setting. Additional area includes problem solving and complications of various managements will be inculcated. Students should have exposure to eye bank facilities and must be made aware of eye donation, collection of eyes, preservation, pre and post-operative instructions and latest techniques for preservation of donor cornea. The students will get clinical training on the practical aspects of the following courses namely optometric optic--II & dispensing optics, visual optics – II and ocular disease -II. | |
| Unit-2 | | 12 Hours |
| Chapter 2.1 | Sports vision. Refraction in special cases (pseudophakia, aphakia, irregular corneal astigmatism, coloboma of iris, choroids, retina, nystagmus, post R.K., PRK, LASIK) Congenital cataract, glaucoma. Patient with low vision. Patient with anisometropia (Anisokonia) | |

History of Contact Lenses

Optics of contact lens

Magnification & Visual field; Accommodation & Convergence; Back & Front Vertex
Power / Vertex distance calculation

Tear film; Cornea; Lids & Conjunctiva

Unit-2

Introduction to CL material

15HR

Monomers; Polymers

Properties of CL materials

Physiological (Dk, Ionicity, Water content); Physical (Elasticity, Tensile strength, Rigidity); Optical (Transmission, Refractive index)

Indications and contraindications

Parameters / Designs of Contact Lenses & Terminology

Unit-3

RGP Contact Lens materials

10Hrs

Manufacturing Rigid and Soft Contact Lenses – various methods

B.Sc. Optometry, Choice Based Credit System, Batch 2021 and onwards

| | |
|---------------|---|
| | Pre-Fitting examination |
| | steps, significance, recording of results; Correction of Astigmatism with RGP lens , |
| | Types of fit |
| | Steep, Flat, Optimum – on spherical corneawith spherical lenses |
| Unit-4 | |
| | Calculation and finalising Contact lens 5hrs |
| | Ordering Rigid Contact Lenses – writing a prescription to the Laboratory |
| | Checking and verifying Contact lenses |
| | Checking and verifying Contact lenses from Laboratory; Modifications possible with Rigid lenses |
| | |
| | Common Handling Instructions |
| | Insertion & Removal Techniques; Do's and Dont's |
| | Care and Maintenance |
| | Cleaning agents & Importance; Rinsing agents & Importance; Disinfecting agents & importance; Lubricating & Enzymatic cleaners |
| | Follow up visit examination; Complications of RGP lenses |

Contact Lens (Practical) BOPT 507-21

1. Measurement of Ocular dimensions
2. Pupillary diameter and lid characteristics
3. Blink rate and TBUT
4. Schrimers test, Slit lamp examination of tear layer
5. Keratometry
6. Placido's disc
7. Soft Contact Lens fitting – Aspherical
8. Soft Contact Lens fitting – Lathe cut lenses
9. Soft Contact Lens over refraction
10. Lens insertion and removal
11. Lens handling and cleaning

B.Sc. Optometry, Choice Based Credit System, Batch 2021 and onwards

| Semester | | 5th | | | | | | | | | |
|-------------|-----------------------|-------------|-------------------------------|-----------------|----------|-----------|-------------|--------------------|----------|-------------|--------|
| Course Code | Group | Course Type | Course Name / Title | Load Allocation | | | | Marks Distribution | | Total Marks | Credit |
| | | | | Lecture | Tutorial | Practical | Studio (If) | Internal | External | | |
| BOPT 502-21 | Allied health science | Core Theory | Low Vision & Rehabilitation-I | 2 | 1 | 0 | - | 25 | 75 | 100 | 3 |

a. Course Objective

This course deal with the definition of low vision, epidemiology aspect of visual impairment, types of low vision devices and its optical principles, clinical approach of the low vision patients, assistive devices for totally visually challenged, art of prescribing low vision devices and training the low vision patients.

b. Course Outcomes

| | |
|------------|--|
| CO1 | Defining, listing and learning the types of low vision aids. |
| CO2 | Recognizing, Understanding, characterizing, explaining the use of lowvision aids and rehabilitation. |
| CO3 | Identifying, locating and demonstrating the concept of basic principlesof optics in management of low vision patients. |
| CO4 | Performing, implementing and applying types of low vision aids andrehabilitation techniques |
| CO5 | Analyzing, categorizing, comparing and differentiating various types oflow vision devices. |

c. Syllabus

| | | |
|---------------|---|-----------------|
| Unit-1 | Introduction | 10 Hours |
| | Definitions & classification of Low vision; Epidemiology of low vision [magnitude] | |
| Unit 2 | Pre-clinical evaluation of low vision patients | |
| | Functional needs assessment, prognostic & psychological factors;psycho-social impact of low vision; | |
| | | 10Hrs |

B.Sc. Optometry, Choice Based Credit System, Batch 2021 and onwards

| | |
|---------------|--|
| Unit-3 | Types of low vision aids – optical aids; non-optical aids ; electronic devices; |
| | Assistive technology devices, Optics of low vision aids |
| | assessment of visual acuity, visual field; Selection of low vision aids, instruction & training ; Pediatric Low Vision care; |
| Unit-4 | 10hrs |
| | Dispensing Low vision devices |
| | Low vision aids – dispensing & prescribing aspects |
| | Visual rehabilitation & counseling; Legal aspects of Low vision in India; Eye Disorders & Low vision; Introduction to Optometry rehabilitation Practice; Model of Low Vision services in India; |
| | Rehabilitation: Model of Low Vision services in India; |
| | Introduction to Optometry rehabilitation Practice; Clinical Case Presentation |

B.Sc. Optometry, Choice Based Credit System, Batch 2021 and onwards

a. Course Objective

This course deals with general and ocular physiological changes of ageing, common geriatric systemic and ocular diseases, clinical approach of geriatric patients, pharmacological aspects of ageing and spectacle dispensing aspects in ageing patients.

b. Course Outcomes

| | |
|------------|---|
| CO1 | Be able to identify, investigate the age related changes in the eyes. |
| CO2 | Be able to counsel the elderly |
| CO3 | Be able to dispense spectacles with proper instructions. |
| CO4 | Adequately gained knowledge on common ocular diseases. |

| | | |
|---------------|--|---------------|
| Unit-1 | Introduction | 5Hours |
| | Structural changes of eye in elderly | |
| | Morphological changes of eye in elderly | |
| | Physiological changes in eye in the course of aging. | |
| Unit-2 | | |
| | Introduction to geriatric medicine – epidemiology | 10hrs |
| | Need for optometry care | |
| | Systemic diseases(Hypertension, Atherosclerosis,coronary heart disease, congestive Heart failure, Cerebrovascular disease, Diabetes, COPD) | |
| Unit-3 | | 10hrs |
| | Optometric Examination of the Older Adult | |
| | Ocular diseases common in old eye, with special reference to cataract, glaucoma, macular disorders, | |
| | Vascular diseases of the eye | |
| Unit-4 | | |
| | Contact lenses in elderly | 5hr |
| | Pharmacological aspects of aging | |
| | Low vision causes, management and rehabilitation in geriatrics. | |

Pediatric Optometry

a.Course Objective

This course is designed to provide the students adequate knowledge in theoretical and practical aspects of diagnosis, and management of eye conditions related to paediatric population. Also it will inculcate the skill of transferring / communicating the medical information to the attender / patient by the students. The scope of this subject is to train the optometrists to develop a systematic way of dealing with children below 12, so as to implement primary eye care and have better, specialized management of anomalies.

b.Course Outcomes

| | |
|-----|---|
| CO1 | Have a knowledge of the principal theories of childhood development, and visual development |
| CO2 | Have the ability to take a thorough paediatric history which encompasses the relevant developmental, visual, medical and educational issues |
| CO3 | Be familiar with the accommodative-vergence system, the genesis of ametropia, the disorders of refraction, accommodation and vergence, and the assessment and management of these disorders |
| CO4 | Be familiar with the aetiology, clinical presentation and treatment of amblyopia, comitant strabismus and commonly presenting incomitant strabismus |
| CO5 | Have a knowledge of the epidemiology of eye disease in children, the assessment techniques available for examining visual function of children of all ages and an understanding varied management concepts of paediatric vision disorders |
| CO6 | Have knowledge of the art of dispensing contact lens, low vision aids and referral to the surgeon or other specialists at the appropriate timing. |
| CO7 | Have a capacity for highly evolved communication and co-management with other professionals involved in paediatric assessment and care |

B.Sc. Optometry, Choice Based Credit System, Batch 2021 and onwards

C. Syllabus

| Unit-1 | Introduction | Hours |
|--------|--|-------|
| | The Development of Eye and Vision History taking: Paediatric subjects | |
| | Assessment of visual acuity | |
| Unit-2 | Normal appearance, pathology and structural anomalies | |
| | Orbit, Eye lids, Lacrimal system; Conjunctiva, Cornea, Sclera | |
| | Anterior chamber, Uveal tract, Pupil; Lens, vitreous, Fundus; Oculomotor system | |
| | Refractive Examination | |
| Unit-3 | | |
| | Determining binocular status | |
| | Determining sensory motor adaptability | |
| | Compensatory treatment and remedial therapy for :Myopia, Pseudomyopia, Hyperopia, Astigmatism, Anisometropia, Amblyopia Remedial and compensatory treatment of Strabismus and Nystagmus | |
| Unit-4 | | |
| | Anterior segment dysgenesis: Aniridia, Microphthalmos, Coloboma, Albinism | |
| | Paediatric eye disorders: Cataract, Retinopathy of Prematurity, Retinoblastoma; Neuromuscular conditions (myotonic dystrophy, mitochondrial cytopathy), and Genetics | |
| | Spectacle dispensing for children Paediatric contact lenses Low vision assessment in children | |

Suggested Books

B.Sc. Optometry, Choice Based Credit System, Batch 2021 and onwards

a. Course Objective

This course provides theoretical aspects of Binocular Vision and its clinical application. It deals with basis of normal binocular vision and space perception, Gross anatomy and physiology of extraocular muscles, various binocular vision anomalies, its diagnostic approaches and management

b. Course Outcomes

c. Syllabus

| | |
|------------|--|
| CO1 | Defining, listing and learning the grades of binocular vision. |
| CO2 | Recognizing, Understanding, characterizing, explaining the kind of binocular vision anomalies present in patient eye. |
| CO3 | Identifying, locating and demonstrating the principles of binocular vision in early diagnosis and treatment. |
| CO4 | Performing, implementing and applying the types of binocular abnormalities on the basis of symptoms, signs and diagnostic procedure. |
| CO5 | Analyzing, categorizing, comparing and differentiating various grade of binocular vision. |

| | | |
|---------------|---|----------------|
| Unit-1 | Binocular Vision and Space perception | 10Hours |
| | Relative subjective visual direction; Retinomotor value; Grades of BSV; SMP and Cyclopean Eye; Correspondence; Fusion, Diplopia, Retinal rivalry Horopter; Physiological Diplopia and Suppression; Stereopsis, Panum's area, BSV; Stereopsis and monocular clues – significance, Egocentric location, clinical applications; Theories of Binocular vision | |
| Unit 2 | | 15hrs |
| | Anatomy of Extra Ocular Muscles: Recti and Obliques, LPS; Innervation & Blood Supply. Near Vision Complex Accommodation 6.1 Definition and mechanism (process); Methods of measurement, Stimulus and innervations; Types of accommodation; Anomalies of accommodation – aetiology and management. | |
| Unit 3 | Convergence: Definition and mechanism; Methods of measurement; Types and components of convergence - Tonic, accommodative, fusional, proximal; Anomalies of Convergence – aetiology and management. | |
| Unit-4 | | 20hrs |
| | Sensory adaptations: Confusion, Suppression: Investigations; Management; Blind spot syndrome Amblyopia: Classification; Aetiology ; Investigation; Management Abnormal Retinal Correspondence: Investigation and management; Blindspot syndrome, Eccentric Fixation: Investigation and management | |

Binocular Vision- I (Practical) BOPT 508-21

Comprehensive oral examination

Investigation & Management of binocular vision anomalies & Interpret clinical results

1. AC/A Ratio
2. ARC
3. Eccentric fixation
4. Amblyopia
5. Suppression

| BOPT 505-21 | Allied health science | Core Theory | Systemic disease | 2 | | 0 | - | 25 | 75 | 100 | 2 |

a. Course Objective

This course deals with definition, classification, clinical diagnosis, complications and management of various systemic diseases. In indicated cases ocular manifestations also will be discussed.

b. Course Outcomes

c. Syllabus

| | |
|------------|---|
| CO1 | Common Systemic conditions: Definition, diagnostic approach, complications and management options |
| CO2 | Ocular findings of the systemic conditions |
| CO3 | First Aid knowledge |

| | | |
|---------------|---|---------------|
| Unit-1 | Hypertension, | 5Hours |
| | Definition, classification, Epidemiology, clinical examination, complications, and management. | |
| | Hypertensive retinopathy | |
| | Diabetes Mellitus | 2hrs |
| | Classification, pathophysiology, clinical presentations, diagnosis, and management, Complications | |
| | Diabetic Retinopathy | |
| | Thyroid Disease | 3hrs |
| | Physiology, testing for thyroid disease, Hyperthyroidism, Hypothyroidism, Thyroiditis, Thyroid tumors | |
| Unit-2 | Cancer | 3hrs |
| | incidence | |
| | Etiology of Retinoblastoma & choroidal melanoma | |
| | Therapy and Ophthalmic consideration | |

B.Sc. Optometry, Choice Based Credit System, Batch 2021 and onwards

| | |
|---------------|---|
| | Connective Tissue Disease |
| | Rheumatic arthritis, Systemic lupus erythematosus, Scleroderma |
| | Eye and connective tissue disease |
| | Tuberculosis & Ocular Manifestations |
| | |
| Unit 3 | Herpes virus (Herpes simplex, Varicella Zoster, Cytomegalovirus, Epstein Barr Virus) |
| | Herpes and the eye |
| | Acquired Immunodeficiency Syndrome & Ocular Manifestations |
| | Anemia (Diagnosis, clinical evaluation, consequences, Sickle cell disease, treatment, Ophthalmologic considerations) |
| | Hyperlipidemias |
| Unit 4 | Vitamin A & Eye Disease |
| | Myasthenia Gravis |
| | General Medical Emergencies |
| | Preoperative precautions in ocular surgery |

| BOPT 506-21 | Allied health science | Core Theory | Research Methodology & Biostatistics | 2 | | 0 | - | 25 | 75 | 100 | 2 |

a. Course Objective

The objective of this module is to help the students understand the basic principles of research and methods applied to draw inferences from the research findings.

B. Syllabus

| | Research Methodology | 10hrs |
|---------------|--|--------------|
| Unit 1 | Introduction | |
| | Introduction to research methods | |
| | Identifying research problem | |
| | Ethics of research | |
| Unit 2 | Research Methodology | |
| | Basics of Research design | |
| | Basics of Types of Data | |
| | Basics of Research tools and Data collection methods | |
| | Basics of Sampling methods | |
| | Developing a research proposal | |
| | Biostatistics | |
| Unit 3 | Basics of Biostatistics | 10hrs |
| | Introduction of Biostatistics , Sampling, Statistical significance, Correlation, Sample size determination. | |
| | Statistics– Collection of Data, presentation including classification and diagrammatic representation–frequency distribution. Measures of central tendency; measures of dispersion | |

B.Sc. Optometry, Choice Based Credit System, Batch 2021 and onwards

| | | |
|---------------|--|--------------|
| Unit 4 | Theoretical distributions | 10hrs |
| | Binomial Normal Sampling –necessity of methods and techniques. Chi. Square test (2 x 2) | |

| BOPT 509-21 | Allied health science | Core Theory | Clinics IV | 0 | 0 | 6 | - | 30 | 70 | 100 | 3 |

a. Course Objective

The course provides students the opportunity to continue to develop confidence and increased skill in diagnosis and treatment delivery. Students will demonstrate competence in basic, intermediate and advance procedure in those areas. Students will participate in advance and specialized diagnostic and management procedure. Students will get practical experience of the knowledge acquired from geriatric and pediatric optometry courses. Hands-on experience under supervision will be provided in various outreach programmes namely, school vision screening, glaucoma and diabetic retinopathy screening etc., Students also get hand-on practical sessions.

a. Course Objective

The subject provides the student with suitable knowledge both in theoretical and practical aspects of Contact Lenses.

b. Course Outcomes

| | |
|------------|--|
| CO1 | Defining, listing and learning the types of contact lens. |
| CO2 | Recognizing, Understanding, characterizing, explaining the contact lens in therapeutic and diagnostic use in different ocular condition. |
| CO3 | Identifying, locating and demonstrating the concept of basic principles of using contact lenses to treat and manage the ocular abnormalities |
| CO4 | Performing, implementing and applying the types of contact lenses and fitting criteria. |
| CO5 | Analyzing, categorizing, comparing and differentiating various types of contact lens. |

C. Syllabus

| | | |
|---------------|--|----------------|
| Unit-1 | Pre fitting examination | 10Hours |
| | Review of Basics | |
| | Patient Selection; Pre screening for contact lens wear | |
| | Slit Lamp examination; Assessment of Cornea Assessment of Tear film | |
| Unit-2 | Contact lens fitting | 15 |
| | Soft contact lens fitting, Soft Toric Contact Lens fitting | |
| Unit 3 | Rigid Contact lens fitting; Managing the Presbyope | |
| | Silicone Hydrogel Lenses, Extended Wear | |
| Unit-4 | Contact lens care | 15 |
| | Contact lens After Care | |
| | Overview of Special considerations for fitting contact lenses | |
| | Therapeutic and Prosthetic contact lenses | |

Contact Lens II (Practical) BOPT 607-21

- Soft Contact Lens fitting – Aspherical
- Soft Contact Lens fitting – Lathe cut lenses
- Soft Contact Lens over refraction
- Lens insertion and removal
- Lens handling and cleaning
- Examination of old soft Lens
- RGP Lens fitting
- RGP Lens Fit Assessment and fluorescein pattern
- Special RGP fitting (Aphakia, pseudophakia & Keratoconus)
- RGP over refraction and Lens flexure
- Examination of old RGP Lens
- RGP Lens parameters
- Slit lamp examination of Contact Lens wearers

| BOPT 602-21 | Allied health science | Core Theory | Binocular vision-II | 3 | 1 | 2 | - | 25 | 75 | 100 | 5 |

a. Course Objective

This course deals with understanding of strabismus, its classification, necessary orthoptic investigations, diagnosis and non-surgical management. Along with theoretical knowledge it teaches the clinical aspects and application.

b. Course Outcomes

| | |
|------------|---|
| CO1 | Defining, listing and learning the grades of binocular vision. |
| CO2 | Recognizing, Understanding, characterizing, explaining the kind of binocular vision anomalies present in patient eye. |
| CO3 | Identifying, locating and demonstrating the principles of binocular vision in early diagnosis and treatment. |
| CO4 | Performing, implementing and applying the types of binocular abnormalities on the basis of symptoms, signs and diagnostic procedure |
| CO5 | Analyzing, categorizing, comparing and differentiating various grade of binocular vision. |

B.Sc. Optometry, Choice Based Credit System, Batch 2021 and onwards

c. Syllabus

| | | |
|---------------|---|-----------|
| Unit-1 | | 10 |
| | Neuro-muscular anomalies; Classification and etiological factors | |
| | History – recording and significance, Accommodative and Non Accommodative convergent squint; Classification; Investigation and Management | |
| | Divergent Strabismus: Classification; A& V phenomenon; Investigation and Management, | |
| Unit-2 | | |
| | Vertical strabismus: Classification; Investigation and Management | 15Hrs |
| | Paralytic Strabismus: Acquired and Congenital; Clinical Characteristics | |
| Unit 3 | Distinction from comitant and restrictive Squint, Investigations: History and symptoms; Head Posture; Diplopia Charting; Hess chart; PBCT; Nine directions; Binocular field of vision | |
| | Amblyopia and Treatment of Amblyopia, Nystagmus, | 15hrs |
| | Non-surgical Management of Squint | |
| Unit-4 | Restrictive Strabismus Features; Musculo-fascial anomalies; Duane's Retraction syndrome; Clinical features and management, Brown's Superior oblique sheath syndrome; Strabismus fixus; Congenital muscle fibrosis | |

Binocular Vision -II (Practical) BOPT 608-21

Investigations and also Management Of Non Strabismic Binocular vision Anomalies

| BOPT 603-21 | Allied health science | Core Theory | Community Optometry | 2 | 0 | 0 | - | 25 | 75 | 100 | 2 |

a. Course Objective

Introduction to the foundation and basic sciences of public health optometry with an emphasis on the epidemiology of vision problems especially focused on Indian scenario.

Also deals with general aspects of occupational health, Visual demand in various job, task analysing method ,visual standards for various jobs, occupational hazards and remedial aspects through classroom sessions and field visit to the factories.

b. Course Outcomes

| | |
|------------|---|
| CO1 | Defining, listing and learning the main role of optometrist in the community health care profession. |
| CO2 | Recognizing, Understanding, characterizing, explaining those diseases that are the most common reason for worldwide blindness. |
| CO3 | Identifying, locating and demonstrating the management and treatment skills to eradicate avoidable blindness from worldwide population. |
| CO4 | Performing, implementing and applying the types of health care programs that can avoid the blindness and visual impairment |
| CO5 | Analyzing, categorizing, comparing and differentiating various diseases that are the most common reason for worldwide blindness. |

B.Sc. Optometry, Choice Based Credit System, Batch 2021 and onwards

c.Syllabus

| | | |
|---------------|---|---------------|
| Unit 1 | Public Health Optometry | 15 hrs |
| | Concepts and implementation; Stages of diseases; | |
| | Epidemiology of blindness – Defining blindness and visual impairment; Eye in primary health care; Contrasting between Clinical and community health programs; | |
| Unit 2 | Community Eye Care Programs; Community based rehabilitation programs; Nutritional Blindness with reference to Vitamin A deficiency; | |
| Unit 3 | | 15 hrs |
| | Vision 2020: The Right to Sight; Screening for eye diseases; National and International health agencies, NPCB; Role of an optometrist in Public Health; | |
| Unit 4 | Organization and Management of Eye Care Programs – Service Delivery models; Health manpower and planning & Health Economics; Evaluation and assessment of health programmers’ Optometrists’ role in school eye health programme; Basics of Tele Optometry and its application in Public Health; Information, Education and Communication for Eye Care programs | |

a. Course Objective

b. This advanced course focuses on specialized management strategies, rehabilitation techniques, and interdisciplinary approaches to supporting individuals with low vision. Students will gain in-depth knowledge of complex cases, assistive technologies, and evidence-based practices in low vision care.

c. Course Outcomes

| | |
|------------|--|
| CO1 | Understand advanced principles of low vision assessment and management. |
| CO2 | Develop individualized rehabilitation plans for patients with specific visual impairments. |
| CO3 | Gain hands-on experience with advanced assistive devices and technologies. |
| CO4 | Collaborate effectively with multidisciplinary teams to enhance patient outcomes. |

d. Syllabus

| | | |
|---------------|--|-----------------|
| Unit-1 | Low Vision Rehabilitation | 10 Hours |
| | Goal-oriented functional rehabilitation planning. | |
| | Orientation and mobility (O&M) training for low vision individuals. Skills for activities of daily living (ADL) with vision loss. Case-based learning: Developing customized rehabilitation plans. | |
| Unit 2 | Assistive Devices and Technology | 10 Hours |
| | Overview of optical and non-optical devices: Advanced magnifiers (stand, hand-held, electronic). | |
| | Telescopic systems for distance viewing. | |
| | Cutting-edge technologies: | |

| | |
|--|--|
| | <p>Wearable devices (e.g., eSight, OrCam).</p> <p>Screen readers and software (JAWS, NVDA).</p> <p>Braille displays and tactile devices.</p> <p>Device fitting and training methods.</p> |
| | |

| | | |
|---------------|---|----------|
| Unit-3 | Managing Complex Cases | 10 Hours |
| | Low vision and comorbid conditions: Dual sensory loss (e.g., vision and hearing), Neurological conditions (e.g., stroke, traumatic brain injury). Pediatric low vision management. Geriatric low vision care. Strategies for progressive diseases (e.g., AMD, glaucoma, retinitis pigmentosa). | |
| | | |
| | | |
| Unit-4 | Advocacy and Accessibility | 10 Hours |
| | Legal rights of individuals with low vision (e.g., ADA compliance). | |
| | Accessible design principles for environments, websites, and materials. | |
| | Community resources and support systems. | |
| | Promoting independence and social inclusion. | |
| | Current research trends in low vision care. Evaluating clinical outcomes in rehabilitation programs. <i>Ethical considerations in low vision care.</i> | |

| BOPT 605-21 | Allied health science | Core Theory | Medical Law and Ethics | 1 | 0 | 0 | - | 25 | 75 | 100 | 1 |

a.Course Objective

Legal and ethical considerations are firmly believed to be an integral part of medical practice in planning patient care. Advances in medical sciences, growing sophistication of the modern society's legal framework, increasing awareness of human rights and changing moral principles of the community at large, now result in frequent occurrences of healthcare professionals being caught in dilemmas over aspects arising from daily practice.

Medical ethics has developed into a well based discipline which acts as a "bridge" between theoretical bioethics and the bedside. The goal is "to improve the quality of patient care by identifying, analyzing, and attempting to resolve the ethical problems that arise in practice". Doctors are bound by, not just moral obligations, but also by laws and official regulations that form the legal framework to regulate medical practice. Hence, it is now a universal consensus that legal and ethical considerations are inherent and inseparable parts of good medical practice across the whole spectrum.

b.syllabus

| | | |
|---------------|---|---------------|
| Unit 1 | | 15 hrs |
| | Medical ethics - Definition - Goal - Scope b | |
| Unit 2 | Introduction to Code of conduct Basic principles of medical ethics –Confidentiality Malpractice and negligence - Rational and irrational drug therapy Autonomy and informed consent - Right of patients | |
| Unit 3 | Introduction –Medico legal case and type- Records and document related to MLC - ownership of medical records - Confidentiality Privilege communication - Release of medical information - Unauthorized disclosure - retention of medical records - other various aspects. | |
| Unit 4 | Professional Indemnity insurance policy , Development of standardized protocol to avoid near miss or sentinel events | |

B.Sc. Optometry, Choice Based Credit System, Batch 2021 and onwards

| Semester | | 6 th | | | | | | | | | |
|-------------|-----------------------|-----------------|---------------------------|-----------------|----------|-----------|--------|--------------------|----------|-------------|--------|
| Course Code | Group | Course Type | Course Name / Title | Load Allocation | | | | Marks Distribution | | Total Marks | Credit |
| | | | | Lecture | Tutorial | Practical | Studio | Internal | External | | |
| BOPT 606-21 | Allied health science | Core Theory | Research Project (Review) | - | - | 2 | - | 30 | 70 | 100 | 1 |

Team of students will be doing a research project under the guidance of a supervisor (who could be optometrists/vision scientists/ ophthalmologist). Student will get the experience of doing a research in systematic approach – identifying the primary question, literature search, identifying the gaps in the literature, identifying the research question, writing up the research proposal, data collection, data analysis, thesis writing and presentation.
