Key Responsibilities:-

***Hazard Identification & Control:**

- Identify and assess potential hazards within the plant.
- Develop and implement strategies to mitigate and control EHS-related risks.

***NOC Compliance:**

- Ensure compliance with relevant No Objection Certificates (NOCs).
- Maintain and renew NOCs as per industry regulations.

***Safe Work Practices:**

- Develop and enforce safe work procedures for handling, processing, storage, and transportation of materials.
- Ensure adherence to safety protocols across all plant operations.

***Housekeeping & Safety:**

- Ensure cleanliness and proper maintenance of the workplace to adhere to safety standards.
- Conduct regular safety inspections and audits to identify and address potential risks.

***SOP Development & Training:**

- Assist in the development, review, and update of Standard Operating Procedures (SOPs).
- Conduct training sessions to ensure that all employees follow proper safety protocols.

***HSE Culture Promotion:**

- Foster a safety-first culture in all areas of plant operations.
- Promote and enforce adherence to EHS practices within the organization.

***Contractor HSE Management:**

- Ensure contractors working on-site comply with established safety and environmental standards.
- Review and approve safety measures for external contractors.

***Fire Safety:**

- Ensure the proper maintenance of firefighting appliances and equipment.
- Conduct fire safety training and emergency drills for staff.

***PPE Provision:**

- Ensure the proper distribution and usage of Personal Protective Equipment (PPE) across the plant.
- Monitor compliance with PPE standards.

***Training & Development:**

- Facilitate health, safety, and environmental training sessions for employees.
- Assist in specialized training for new safety procedures or updates.

***Safety Committee Management:**

- Manage and participate in safety committee meetings with management and worker representatives.
- Actively implement safety improvement suggestions from the committee.

***Emergency Planning & Response:**

- Assist in the development and execution of emergency preparedness plans.
- Coordinate and conduct emergency drills to ensure staff are adequately trained.

***Compliance & Monitoring:**

- Monitor compliance with environmental, health, and safety regulations.
- Provide regular reports on the effectiveness of EHS programs and initiatives.

***Health & Wellness Collaboration:**

- Collaborate with medical and wellness teams to ensure the health and well-being of all employees.
- Assist in maintaining health standards in the workplace.

***Environmental Sustainability:**

- Promote and implement practices aimed at reducing environmental impact.
- Optimize resource utilization and minimize waste production.

***Waste Management:**

- Oversee and enforce compliance with waste management regulations.
- Help implement practices for reducing, reusing, and recycling waste.

***Effluent Management:**

- Ensure that effluent treatment meets the standards set by the Pollution Control Board.
- Monitor and manage effluent treatment processes to comply with environmental regulations.

***Skills:**

- Strong theoretical and practical knowledge of EHS principles and regulations.
- Knowledge of safety standards, environmental regulations, and waste management techniques.
- Good communication, interpersonal, and team collaboration skills.
- Problem-solving ability with a proactive approach to safety issues.

***Additional Requirements:**

- Willingness to work on-site in a manufacturing environment.
- Motivated and eager to learn and apply safety protocols.
- Ability to conduct training and lead safety initiatives within the organization.
